Carpenter Interview Questions And Answers Guide.

Question - 1:

As the mother of two toddlers, I am obviously concerned about the safety aspects of having decking. My main worries are the nails and fixings that are used.

Ans:

The problems that can arise with using nails to hold the decking in place is that they can loosen and lift, this leaves a nasty barb that is potentially dangerous to hands and feet of adults and children alike. However, our system of imported deck fixings is totally concealed, therefore eliminating this danger.

Question - 2:

I am concerned about the time, effort and expense of maintaining a deck.

Ans:

The upkeep of a deck is minimal and restricted to a yearly wash down to prevent the possible build up of any algae.

Question - 3:

How long does a wooden deck last?

Ans:

All of our timbers are pressure treated which ensures a life expectancy of at least 15 years in direct contact with the ground, and 40 years when the timbers are suspended. The fixings we use are all galvanised steel this prevents rusting which causes unsightly staining on the timber and would eventually decay.

Question - 4:

How much does it cost?

Ans:

Our prices range from as little as £1500, to £50,000+ as we custom design each deck for the individual. Hopefully, somewhere between those figures we can tailor your deck to suit your property and your budget.

Question - 5:

I thought I had found the ideal place in my garden for a deck, however there are two manholes in the way, will I have to choose another area?

Ans:

No, we can overcome the problem of manholes by building in a trap door that is easily removed for access.

Question - 6:

Once the deck is in place how do you prevent weeds growing up through the spaces?

Ans:

We lay a polymer membrane on top of the carcass structure, which the decking boards are placed upon. This prevents sunlight penetration, preventing the growth of any weeds.

Question - 7:

Will my deck need building regulations or planning permission?

Ans:

This is unlikely unless your deck is on a first floor elevation or on a listed building. We will advise you and will apply for planning or building regulations if

necessary.

Question - 8:

What are your weak and strong points?

Ans:

It is a nice question which gives you a nice opportunity to put an optimistic turn on something negative. You have to mold your negatives into positives. Like in weakness you can say that I am too focused toward my work and I think I should take out time for myself. As far as strong points are concerned, they expect a simple answer from you. Just tell that you are hardworking, perfectionist and ambitious.

During the entire course of an interview, you may be asked various questions. Just one bad answer can stand out and cost you the job. Make sure that you are well prepared and have good answers for the typical interview questions.

Question - 11:

Tell us something about the skills that are required to become a good carpenter?

Ans:

A good carpenter is one who is capable of solving mathematical problems quickly and accurately to avoid costly mistakes. People who hold this position should also be able to select material, plan sequences and method of work. They must be efficient in cutting and shaping material, and joining them together.

Question - 12:

Please tell us something about your educational qualifications and skills?

Ans:

I have an intensive experience of 10 years in this field. I have broad knowledge of residential construction, practices, procedures, techniques, tools, equipments, materials, and safety. I am efficient in tasks such as strain grade trimming, hanging doors, drilling and setting door hardware, and setting windows. I have strong interpersonal, communication and relationship building skills. I can easily read blueprints and understand written instructions.
