Production Supervisor Interview Questions And Answers Guide.

Question - 1:

Can you define your supervisory style?

Ans:

Well, here I can hardly advice you. It depends on your style. It's a tough question, I know. But it's up to you to think about it and prepare a good description of your style.

[View All Answers](#)

Question - 2:

Explain me do you work well on a team? How would you define teamwork?

Ans:

I would define team work as getting the job done whether that means if I have to do more then the guy next to me as long as the work gets finished.

[View All Answers](#)

Question - 3:

Tell me what is six Sigma?

Ans:

Six sigma is a data-driven methodology and approach for eliminating defects in any process from manufacturing to transactional and from product to service.

[View All Answers](#)

Question - 4:

Tell me when have you negotiated a better deal with a vendor?

Ans:

In Care and Maintenance at the moment we fly in on a Tuesday which is our allotted freight day. Discussed with the PH Manager if there was an opportunity to change days of delivery that suits him and as Thursday was there non freight day we agreed on that day. Saved the delivery driver waiting up to 4 hours on site prior to getting unloaded.

[View All Answers](#)

Question - 5:

Please explain us a time you had to introduce important change in your last job?

Ans:

Your ability to persuade and influence your employees or team members to accept change is key.

Show how you were able to gain support and commitment from them by using the appropriate communication style, by listening and responding to concerns and questions, by asking for their help and commitment and by providing support.

[View All Answers](#)

Question - 6:

Explain me what leadership roles have you had in the past?

Ans:

I have always worked my way up to leadership positions from the time I was 18 years old. I have been a team leader at a fast food restaurant, a supervisor for a department to a manager at 2 of my previous jobs.

[View All Answers](#)

Question - 7:

Please tell me what do you consider the essential qualities for a supervisor?

Ans:

In your interview answer include these key competencies or skills that apply to all supervisor jobs. Planning and organizing, problem-solving, decision-making, delegating, motivating, influencing, communicating and managing conflict.

[View All Answers](#)

Question - 8:

Explain me how would you observe the level of motivation of your subordinates?

Ans:

Choosing the right metrics and comparing productivity of everyone on daily basis is a good answer, doesn't matter in which company you apply for a supervisory role.

[View All Answers](#)

Question - 9:

Please explain do you have supervising experience?

Ans:

Yes, I have supervised up to 30 employees in one department. Each employee is different and each is handled according to their working techniques. however, one must never lose focus of the goal of the department and should enforce rules and regulation for everyone equally.

[View All Answers](#)

Question - 10:

What are some of the motivations of a supervisor? What are your motivations?

Ans:

Speak about different styles of management that you have observed and admired. Describe how you have attempted to shape your style, using your abilities, and selecting the processes with which you felt you could achieve the most. Admiring others' accomplishments allows you to speak about yours as well, in a non-conceited manner. When discussing strengths and weaknesses, use the sandwich technique. List a few strengths, mention a weakness briefly, and conclude with more positive attributes. It is not necessary to list more than one weakness. If applicable, you may explain what steps you are taking to overcome it.

[View All Answers](#)

Question - 11:

How do you stay organized as Production Supervisor?

Ans:

By maintaining proper routine every day. Putting my strongest points with my weakness. High priority always comes first.

[View All Answers](#)

Question - 12:

Explain me how to motivate your employees/team members?

Ans:

The more your employees or team members understand about their jobs and responsibilities the more motivated they are. Show how you ensure each subordinate has clarity about his or her role and responsibilities. Discuss how you set clear, specific and realistic targets that are agreed on rather than dictated. Focus on how you involve employees by asking for suggestions, ideas and feedback.

[View All Answers](#)

Question - 13:

Ans:

WMS warehouse management system, which provide us the best way to handle the stocks and in inventory field.

[View All Answers](#)

Question - 42:

Explain the difference between lean manufacturing and JIT (Just-in-Time) Manufacturing?

Ans:

* Lean Manufacturing: It takes the concept of JIT and re-examines it from the customer point of view. Anything that is produced should add something of valuable to the customer's requirement. For example, if you are making stereo system for a luxury car, you will think from the customer point of view like sound quality, durability, space occupancy, loud or medium sound, etc.

* JIT (Just-in-Time): This methodology is designed to ensure that a product or part would arrive just in time to be used. This technique saves the cost behind the unused inventory, and eliminating the need of piling up inventory.

[View All Answers](#)

Question - 43:

What are the factors that can affect the manufacturing process?

Ans:

The factors affect the manufacturing process are

* Supplies: A well-managed supply and inventory is very crucial in order to run manufacturing process smoothly. The manufacturers must brace themselves up and ready to overcome any unexpected delays in supplies due to weather or transportation hindrance.

* Equipment: Equipment's are the central unit for any manufacturing plant; regular maintenance are utmost necessary to avoid a breakdown in the middle of production. Identify the means of improving the efficiency of every part of the equipment.

* Factory Overhead: Without power supply, manufacturing is not possible. Always keep plan B ready in case of temporary power cut down.

* Special Parts: Replacing any special spare parts with different specification may slow down your production, so before ordering any special spare parts ensure it fits your demand especially if it is imported from long distance.

* Work Force: Human resource is equally important and plays a major role in manufacturing unit.

[View All Answers](#)
