Question - 7:

What is a Burn Down Chart in Agile(Scrum) Methodology?

Ans:

The sprint burn down chart is a publicly displayed chart showing remaining work in the sprint backlog. Updated every day, it gives a simple view of the sprint progress. It also provides quick visualizations for reference. There are also other types of burndown, for example the Release Burndown Chart that shows the amount of work left to complete the target commitment for a Product Release (normally spanning through multiple iterations) and the Alternative Release Burndown Chart, which basically does the same, but allows to show clearly scope changes into a Release Content, by resetting the baseline.
