What your interviewer is really trying to do with this question-beyond identifying any major red flags-is to gauge your self-awareness and honesty. Strike a balance by thinking of something that you struggle with but that you're working to improve. ### Question - 14:

Why are manhole covers round?

#### Ans:

This is a classic brainteaser, which was reportedly first asked by a Microsoft interviewer. Here's how to ""solve"" this brainteaser (remember to speak and reason out loud while solving this brainteaser): Why are manhole covers round? Could there be a structural reason? Why aren't manhole covers square? It would make it harder to fit with a cover. You'd have to rotate it exactly the right way.

The pipes below are also round, so fitting them might be easier, as might be making them. So many manhole covers are round because they don't need to be rotated. There are no corners to deal with. Also, a round manhole cover won't fall into a hole because it was rotated the wrong way, so it's safer. Looking at this, it seems corners are a problem. You can't cut yourself on a round manhole cover. And because it's round, it can be more easily transported. One person can roll it.

What was the most important task you ever had?

#### Ans:

There are two common answers to this question that do little to impress recruiters:

\* 'I passed my driving test'
