Nuclear Steam Supply System Engineer (NSSS Enginee Interview Questions And Answers Guide.

Question - 1:

Tell us about a typical day at work. How does it start? What do you do?

Ans:

At the beginning of each day, I inspect the work site to make sure that it is hazard-free. Once the work site is secured, I verify that all tools and equipment are adequate in supply. As soon as the work orders are delivered, I provide workers with security guidelines and carry out drills. During the workday, it is my duty to monitor workers to ensure that they are working according to the enforced safety policies and that any problems or accidents are quickly addressed.

[View All Answers](#)

Question - 2:

What would your previous employer say is your greatest strength?

Ans:

Be prepared for this question. If you have to sit and think about it it's going to appear as if you're not sure or that you've never identified your own value in the work place - not good. You don't have to have a complex response. Keep it simple and honest. For example, several possibilities could be Leadership, Problem solving ability, Initiative, Energy, Work ethic, Innovative, etc., etc.

[View All Answers](#)

Question - 3:

Can you describe your ideal boss/supervisor?

Ans:

During the interview As Nuclear Steam Supply System Engineer (NSSS Enginee process employers will want to find out how you respond to supervision. They want to know whether you have any problems with authority, If you can work well as part of a group (see previous question) and if you take instructions well etc. Never ever ever, criticize a past supervisor or boss. This is a red flag for airlines and your prospective employer will likely assume you are a difficult employee, unable to work in a team or take instruction and side with your former employer.

[View All Answers](#)

Question - 4:

How long do you want to work for us if we hire you?

Ans:

Here being specific is probably not the best approach. You may consider responding, "I hope a very long time." Or "As long as we're both happy with my performance."

[View All Answers](#)

Question - 5:

Do you work well within a team?

Ans:

Some people are thrown when they are asked this Nuclear Steam Supply System Engineer (NSSS Enginee question when they are applying for a position to work alone. Every company works as a team, so you are a good team player. give an example of when you have worked well within a team.

[View All Answers](#)

Question - 6:

What position do you prefer on a team working on a project?

Ans:

Do not claim to be comfortable with a specific role if you in are in fact not comfortable with it. However, if you have no problem working in certain roles or situations, be sure to discuss this with the interviewer.

[View All Answers](#)

Question - 7:

How do you think your colleagues at your last job would describe you?

Ans:

While your CV will say a lot about your work history As Nuclear Steam Supply System Engineer (NSSS Enginee, the interviewer will most likely look for greater detail with questions such as this. Be positive about previous experience, highlighting your own strengths.

[View All Answers](#)

Question - 8:

If you were hiring a person for this job As Nuclear Steam Supply System Engineer (NSSS Enginee, what would you look for?

Ans:

Discuss qualities you possess required to successfully complete the job duties.

[View All Answers](#)

Question - 9:

What qualities do you look for in a boss?

Ans:

Remain optimistic and do not be too specific. Good attributes include moral character, honesty, and intelligence since managers usually believe they possess these qualities.

[View All Answers](#)

Question - 10:

Explain me about a problem or disagreement you had with previous supervisor?

Ans:

This question is trap. It is meant to see whether or not you'll speak poorly of an employer. No one wants to hire someone who's going to speak poorly of them down the road. Stay upbeat and positive - and most of all don't say anything negative about a previous employer.

[View All Answers](#)

Question - 11:

Tell us about a suggestion you have made that has benefited an organization you've worked for?

Ans:

This is another opportunity to show the interviewer what you're capable of so make sure to be prepared for this type of question. Have an example ready and make sure its an example of a suggestion you've made that was accepted and that have positive influence. If you can come up with an example that relates to the position you're applying for that would be even better.

[View All Answers](#)

Question - 12:

What have you learned from mistakes on this job?

Ans:

Candidates without specific examples often do not seem credible. However, the example shared should be fairly inconsequential, unintentional, and a learned lesson should be gleaned from it. Moving ahead without group assistance while assigned to a group project meant to be collaborative is a good example.

[View All Answers](#)

Question - 13:

How do you prioritize your work?

Ans:

Depends on the situation... I like to label certain tasks as either A B or C...A being the one that requires immediate attention, and C which are tasks that aren't urgent but eventually need to get done... I like to focus my work As Nuclear Steam Supply System Engineer (NSSS Enginee on the things that need to get done, and done quickly... While balancing the other work alongside our first priorities.

[View All Answers](#)

Question - 14:

What motivates you at the work place?

Ans:

Keep your answer simple, direct and positive. Some good answers may be the ability to achieve, recognition or challenging assignments.

[View All Answers](#)

Question - 15:

Do you think you are overqualified for this position As Nuclear Steam Supply System Engineer (NSSS Enginee?

Ans:

No matter your previous job experience or educational background, be sure to tell the interviewer you have the knowledge and skills to successfully execute the job

responsibilities.

[View All Answers](#)

Question - 16:

How do you stay organized?

Ans:

By maintaining proper routine every day. Putting my strongest points with my weakness. High priority always comes first As Nuclear Steam Supply System Engineer (NSSS Enginee.

[View All Answers](#)

Question - 17:

What have you done to improve your knowledge As Nuclear Steam Supply System Engineer (NSSS Enginee in the last year?

Ans:

Try to include improvement activities that relate to the job As Nuclear Steam Supply System Engineer (NSSS Enginee. A wide variety of activities can be mentioned as positive self-improvement. Have some good ones handy to mention.

[View All Answers](#)

Question - 18:

What type of salary are you looking for?

Ans:

This can be a very tricky question as the individual asking it is probably digging for something other than a simple answer to the question. We recommend that you don't immediately respond to the question directly. Instead, say something like, "That a difficult question. What is range for this position?" More often than not the interviewer will tell you. If the interviewer insists on direct answer you may want say that it depends on the details of the job - then give a wide salary range.

[View All Answers](#)

Question - 19:

Tell me about yourself?

Ans:

There are some questions that your potential employer aren't allowed to ask (but trust me, they probably want to). For instance, they shouldn't really ask about your family or how far away you live from your potential place of employment. If you can find a way to answer these questions anyway (with the answers they want to hear), that will give them a little added info to help them make the (right) decision!

[View All Answers](#)

Question - 20:

Have you ever been caught stealing, or better yet, have you ever stole anything?

Ans:

I guess everyone takes a pen or paper or little things like that. But other than that, NO. I have never stole from my employers or better yet As Nuclear Steam Supply System Engineer (NSSS Enginee, from anyone.

[View All Answers](#)

Question - 21:

How would your boss and co-workers describe you?

Ans:

First of all, be honest (remember, if you get this job, the hiring manager will be calling your former bosses and co-workers!). Then, try to pull out strengths and traits you haven't discussed in other aspects of the interview As Nuclear Steam Supply System Engineer (NSSS Enginee, such as your strong work ethic or your willingness to pitch in on other projects when needed.

[View All Answers](#)

Question - 22:

Why do you think you'll do well at this job?

Ans:

Provide several reasons including skills, experience and interest. If you can show how you've been successful in a similar career field or job position that will go along way to helping the interviewer believe you'll also be successful at this new job.

[View All Answers](#)

Question - 23:

Do you ever take work home with you?

Ans:

Here are two great sample answers that might help get you started:

- * I am an extremely organized person, so I tend to be able to get my work done at work. However, if the need arose I would not be against taking work home. I try not to make it a habit, since I do value my free time. I do realize though that the work we do is important, and sometimes you have to do what needs to be done.
- * I do not shy away from taking work home with me. I know that meeting deadlines and doing outstanding work sometimes means taking a bit of it home. I do not have a problem doing that when the need arises.
- * Make sure to give an honest answer. Lying about taking work home may turn out badly for you if it is required and you do not do it.

[View All Answers](#)

Question - 24:

Tell me a difficult situation you have overcome in the workplace?

Ans:

Conflict resolution, problem solving, communication and coping under pressure are transferable skills desired by many employers As Nuclear Steam Supply System Engineer (NSSS Enginee.

Answering this question right can help you demonstrate all of these traits.

* Use real-life examples from your previous roles that you are comfortable explaining

* Choose an example that demonstrates the role you played in resolving the situation clearly

* Remain professional at all times - you need to demonstrate that you can keep a cool head and know how to communicate with people

[View All Answers](#)

Question - 25:

What is your biggest weakness As Nuclear Steam Supply System Engineer (NSSS Enginee?

Ans:

No one likes to answer this question because it requires a very delicate balance. You simply can't lie and say you don't have one; you can't trick the interviewer by offering up a personal weakness As Nuclear Steam Supply System Engineer (NSSS Enginee that is really a strength ("Sometimes, I work too much and don't maintain a work-life balance."); and you shouldn't be so honest that you throw yourself under the bus ("I'm not a morning person so I'm working on getting to the office on time.")

[View All Answers](#)

Question - 26:

Describe your management style?

Ans:

Try to avoid specific classifications, whatever it may be. Organizations usually prefer managers who can adapt their skills to different situations.

[View All Answers](#)

Question - 27:

What challenges are you looking for in this position?

Ans:

A typical interview question to determine what you are looking for your in next job, and whether you would be a good fit for the position being hired for, is "What challenges are you looking for in a position As Nuclear Steam Supply System Engineer (NSSS Enginee?" The best way to answer questions about the challenges you are seeking is to discuss how you would like to be able to effectively utilize your skills and experience if you were hired for the job. You can also mention that you are motivated by challenges, have the ability to effectively meet challenges, and have the flexibility and skills necessary to handle a challenging job. You can continue by describing specific examples of challenges you have met and goals you have achieved in the past.

[View All Answers](#)

Question - 28:

What was the most difficult employee situation you found yourself As Nuclear Steam Supply System Engineer (NSSS Enginee? How did you overcome the problem?

Ans:

One of employees was conflicting with other and colleague who was prove his was wrong hi denied and was invite union to defend him but we have prove his wrong and I was facing disciplinary action.

[View All Answers](#)

Question - 29:

What is it about this position As Nuclear Steam Supply System Engineer (NSSS Enginee that attracts you the most?

Ans:

Use your knowledge of the job description to demonstrate how you are a suitable match for the role.

[View All Answers](#)

Question - 30:

What motivates you to succeed?

Ans:

Your interviewer will likely want to know the reasons why you will remain motivated to do your best during your employment with the company As Nuclear Steam Supply System Engineer (NSSS Enginee. Perhaps you are interested in being challenged, but you may also have interest in being recognized for your hard work in the form of the number of sales you can attain. A great example answer for this question is "I always do my best in everything, including my job. I take pride in my success, and I also want the company for which I work to be successful. Being affiliated with a company that is known for its excellence is very important to me."

[View All Answers](#)

Question - 31:

What does success mean to you?

Ans:

I am punctual, I always have excellent attendance on any job As Nuclear Steam Supply System Engineer (NSSS Enginee, I have a keen eye for both large and small

details, and I am always finding ways to improve a process and shorten the length of time it takes to complete a project.

[View All Answers](#)

Question - 32:

What do you already know about our company?

Ans:

Good reputation of a large home grown company that has various departments and product.

[View All Answers](#)

Question - 33:

How do you handle your anger?

Ans:

I don't get angry very easily but in the rare occasion that I do, I hold it in and act as though nothing is wrong.

[View All Answers](#)

Question - 34:

How would you estimate the weight of the Chrysler building?

Ans:

This is a process guesstimate where the interviewer wants to know if you know what to ask. First, you would find out the dimensions of the building (height, weight, depth). This will allow you to determine the volume of the building. Does it taper at the top? (Yes.) Then, you need to estimate the composition of the Chrysler building. Is it mostly steel? Concrete? How much would those components weigh per square inch? Remember the extra step: find out whether you're considering the building totally empty or with office furniture, people, etc. If you're including the contents, you might have to add 20 percent or so to the building's weight.

[View All Answers](#)

Question - 35:

How many basketballs would fit in this room?

Ans:

One. You did not ask what is the maximum number of basketballs you can fit in the room.

[View All Answers](#)

Question - 36:

If you were an animal, which one would you want to be?

Ans:

Seemingly random personality-test type questions like these come up in interviews generally because hiring managers want to see how you can think on your feet. There's no wrong answer here, but you'll immediately gain bonus points if your answer helps you share your strengths or personality or connect with the hiring manager. Pro tip: Come up with a stalling tactic to buy yourself some thinking time, such as saying, "Now, that is a great question. I think I would have to say..."

[View All Answers](#)

Question - 37:

What makes a product successful?

Ans:

Basing on the monetization, these questions give you the chance to prove your personal try. Do not show extremely your optimism and pursue the unreality. Give your answers the reality.

It is useful to predict a five to ten- year- scenario of expectations in order to gain your targets that you set up and it is the period of time to see how your plans and targets are performed.

Therefore, the quality of the product and marketability of the mentioned industry need to be highlighted. This will help you to achieve the interviewer's attention and insurance to you personality and you can get the honest and long- term goals.

[View All Answers](#)

Question - 38:

How do you handle conflicts with people you supervise?

Ans:

At first place, you try to avoid conflicts if you can. But once it happens and there's no way to avoid it, you try to understand the point of view of the other person and find the solution good for everyone. But you always keep the authority of your position.

[View All Answers](#)

Question - 39:

Suppose there are three light switches outside a room. Inside is a single light bulb, controlled by one of the three switches. You need to determine which switch operates the bulb. You can turn the switches on and off as many times as you wish (they are all off to begin with), but may only enter the room once. There is no one there to help you. The door to the room is closed, and there are no windows, so you cannot see inside. How can you discover which switch operates the bulb?

Ans:

Do the following steps:

* 1. Turn ON two switches, and leave one OFF.

* 2. Wait a few minutes.

- * 3. Turn one switch from ON to OFF. One is now ON and two are OFF
- * 4. Enter the room. - If the light is ON, it is controlled by the switch you left ON. - If the light bulb is OFF, touch it. If it is warm it is controlled by the switch you turned ON and OFF. If it is cold, it is controlled by the switch you never turned on.

[View All Answers](#)

Question - 40:

Why do you want to join our company?

Ans:

This is a question that is aimed at finding out whether you know enough about the company and the basic market. The best way to answer this question is to do some research on the company and highlight its positive points.

[View All Answers](#)

Question - 41:

How well do you know this industry?

Ans:

Two things businesses need to pay attention to in their industries are what their competition is doing and the customers. You may not always agree with your competitors but it is important to be aware of what changes they are making. Very well. I have been in the industry for over 6 years.

[View All Answers](#)

Question - 42:

How do you deal with conflict in the workplace As Nuclear Steam Supply System Engineer (NSSS Enginee?

Ans:

When people work together, conflict is often unavoidable because of differences in work goals and personal styles. Follow these guidelines for handling conflict in the workplace.

- * 1. Talk with the other person.
- * 2. Focus on behavior and events, not on personalities.
- * 3. Listen carefully.
- * 4. Identify points of agreement and disagreement.
- * 5. Prioritize the areas of conflict.
- * 6. Develop a plan to work on each conflict.
- * 7. Follow through on your plan.
- * 8. Build on your success.

[View All Answers](#)

Question - 43:

What is your greatest strength? How does it help you As Nuclear Steam Supply System Engineer (NSSS Enginee?

Ans:

One of my greatest strengths, and that I am a diligent worker... I care about the work getting done.. I am always willing to help others in the team.. Being patient helps me not jump to conclusions... Patience helps me stay calm when I have to work under pressure.. Being a diligent worker.. It ensures that the team has the same goals in accomplishing certain things.

[View All Answers](#)

Question - 44:

Why should we select you not others?

Ans:

Here you need to give strong reasons to your interviewer to select you not others. Sell yourself to your interviewer in interview in every possible best way. You may say like I think I am really qualified for the position. I am a hard worker and a fast learner, and though I may not have all of the qualifications that you need, I know I can learn the job and do it well."

[View All Answers](#)

Question - 45:

How many tennis balls can you fit into a limousine? 1,000? 10,000? 100,000? Seriously?

Ans:

Well, seriously, you might get asked brainteaser questions like these, especially in quantitative jobs. But remember that the interviewer doesn't necessarily want an exact number-he wants to make sure that you understand what's being asked of you, and that you can set into motion a systematic and logical way to respond. So, just take a deep breath, and start thinking through the math. (Yes, it's OK to ask for a pen and paper!)

[View All Answers](#)

Question - 46:

Are You a 'People' Person?

Ans:

Although it may be phrased a little differently, the gist of this question is clear:

Do you like being around people? If you don't, being a medical assistant isn't a good fit for you. After all, you'll be working directly with patients throughout the day. It helps a lot if you sincerely like interacting with them. While answering this question, make sure to mention that you like helping people too. This will drive home the point that you are a talented medical assistant and would be a valuable part of the team As Nuclear Steam Supply System Engineer (NSSS Enginee.

[View All Answers](#)

**Question - 47:**

If you look at a clock and the time is 3:15, what's the angle between the hour and the minute hands?

Ans:

Usually, if the answer to a brainteaser seems too easy, chances are the answer's wrong. And in this case, the answer is not zero degrees. The hour hand, remember, moves as well. That is, in addition to the minute hand. And so, at 3:15, the hour hand and the minute hand are not on top of each other. In fact, the hour hand has moved a quarter of the way between the 3 and 4. This means it's moved a quarter of 30 degrees (360 degrees divided by 12 equals 30). So the answer, to be exact, is seven and a half degrees (30 divided by four).

[View All Answers](#)

Question - 48:

How do you deal with pressure or stressful situations?

Ans:

Choose an answer that shows that you can meet a stressful situation head-on in a productive, positive manner and let nothing stop you from accomplishing your goals. A great approach is to talk through your go-to stress-reduction tactics (making the world's greatest to-do list, stopping to take 10 deep breaths), and then share an example of a stressful situation you navigated with ease.

[View All Answers](#)

Question - 49:

What have you done to reduce costs, increase revenue, or save time?

Ans:

Even if your only experience is an internship, you have likely created or streamlined a process that has contributed to the earning potential or efficiency of the practice. Choose at least one suitable example and explain how you got the idea, how you implemented the plan, and the benefits to the practice.

[View All Answers](#)

Question - 50:

Why should I hire you As Nuclear Steam Supply System Engineer (NSSS Enginee?

Ans:

To close the deal on a job offer, you MUST be prepared with a concise summary of the top reasons to choose you. Even if your interviewer doesn't ask one of these question in so many words, you should have an answer prepared and be looking for ways to communicate your top reasons throughout the interview process.

[View All Answers](#)

Question - 51:

If hired, how do you intend on making a difference with our company?

Ans:

Dedicate myself to learn everything about the new company that I can, look for ways and ideas that could improve, processes, safety, removing obstacles from the associates, I want to advance within the company.

[View All Answers](#)

Question - 52:

Explain a time when you did not get along with your coworker?

Ans:

I used to lock heads with a fellows. We disagreed over a lot of things - from the care of civilians to who got what shifts to how to speak with a victim's family. Our personalities just didn't mesh. After three months of arguing, I pulled her aside and asked her to lunch. At lunch, we talked about our differences and why we weren't getting along. It turns out, it was all about communication. We communicated differently and once we knew that, we began to work well together. I really believe that talking a problem through with someone can help solve any issue.

[View All Answers](#)

Question - 53:

Are you planning to continue your studies and training As Nuclear Steam Supply System Engineer (NSSS Enginee?

Ans:

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

[View All Answers](#)

Question - 54:

How do you evaluate your ability to handle conflict?

Ans:

I pride myself on being a good problem solver. Through my previous job and management positions I have faced numerous conflicts in different situations, and my experiences have helped me to hone my issue resolution skills. I believe that it is important to get to and address the root of the issue, in a respectable manner.

[View All Answers](#)

**Question - 55:**

How much do you expect to get paid As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

For this be prepared and research salary to find out what similar positions are paying in your area before you go to the interview. Try to find this information out before giving your salary expectations. You can and should provide a range instead of an exact number. But again, don't say any numbers you're not comfortable with because if the employer offers you a salary at the lowest end of your range, you don't have much to negotiate with when it comes to getting a higher salary.

[View All Answers](#)

Question - 56:

What is your greatest weakness As Nuclear Steam Supply System Engineer (NSSS Enginee? What are you doing to improve it?

Ans:

I believe my biggest weakness As Nuclear Steam Supply System Engineer (NSSS Enginee is wanting to help anyone I can help. What I mean is I am willing to take on task that are not my job. I want to learn all I can. However, that has helped me get promoted or even asked to help in times of need in other department. I have been know as the "go to person" when help is needed.

[View All Answers](#)

Question - 57:

Where do you see yourself professionally five years from now As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

Demonstrate both loyalty and ambition in the answer to this question. After sharing your personal ambition, it may be a good time to ask the interviewer if your ambitions match those of the company.

[View All Answers](#)

Question - 58:

Do you have good computer skills?

Ans:

It is becoming increasingly important for medical assistants to be knowledgeable about computers. If you are a long-time computer user with experience with different software applications, mention it. It is also a good idea to mention any other computer skills you have, such as a high typing rate, website creation, and more.

[View All Answers](#)

Question - 59:

Describe a typical work week for this position As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

Interviewers expect a candidate for employment to discuss what they do while they are working in detail. Before you answer, consider the position As Nuclear Steam Supply System Engineer (NSSS Enginee you are applying for and how your current or past positions relate to it. The more you can connect your past experience with the job opening, the more successful you will be at answering the questions.

[View All Answers](#)

Question - 60:

Why should the we hire you as this position As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

This is the part where you link your skills, experience, education and your personality to the job itself. This is why you need to be utterly familiar with the job description as well as the company culture. Remember though, it's best to back them up with actual examples of say, how you are a good team player.

[View All Answers](#)

Question - 61:

How do you keep each member of the team involved and motivated?

Ans:

Many managers mistakenly think that money is the prime motivator for their employees. However, according to surveys by several different companies, money is consistently ranked five or lower by most employees. So if money is not the best way to motivate your team, what is?

Employees' three most important issues according to employees are:

- * Respect
- * A sense of accomplishment
- * Recognition

[View All Answers](#)

Question - 62:

Explain me about your experience working in this field As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

I am dedicated, hardworking and great team player for the common goal of the company I work with. I am fast learner and quickly adopt to fast pace and dynamic area. I am well organized, detail oriented and punctual person.

[View All Answers](#)

Question - 63:

Give me an example of an emergency situation that you faced. How did you handle it?

Ans:

There was a time when one of my employers faced the quitting of a manager in another country. I was asked to go fill in for him while they found a replacement and stay to train that person. I would be at least 30 days. I quickly accepted because I knew that my department couldn't function without me.

[View All Answers](#)

Question - 64:

What does quality work mean to you?

Ans:

Quality work to be is about doing work to the require or set standard, which is very important when it comes to warehouse operations.

[View All Answers](#)

Question - 65:

How do you handle stressful situations?

Ans:

By remaining calm, weighing out all my options and executing a plan to get the situation resolve .

[View All Answers](#)

Question - 66:

Tell me something about your family background?

Ans:

First, always feel proud while discussing about your family background. Just simple share the details with the things that how they influenced you to work in an airline field.

[View All Answers](#)

Question - 67:

What was the most important task you ever had?

Ans:

There are two common answers to this question that do little to impress recruiters:

* 'I got a 2.1'

* 'I passed my driving test'

No matter how proud you are of these achievements, they don't say anything exciting about you. When you're going for a graduate job, having a degree is hardly going to make you stand out from the crowd and neither is having a driving licence, which is a requirement of many jobs.

[View All Answers](#)

Question - 68:

How would your friends describe you?

Ans:

My friends would probably say that I'm extremely persistent - I've never been afraid to keep going back until I get what I want. When I worked as a program developer, recruiting keynote speakers for a major tech conference, I got one rejection after another - this was just the nature of the job. But I really wanted the big players - so I wouldn't take no for an answer. I kept going back to them every time there was a new company on board, or some new value proposition. Eventually, many of them actually said "yes" - the program turned out to be so great that we doubled our attendees from the year before. A lot of people might have given up after the first rejection, but it's just not in my nature. If I know something is possible, I have to keep trying until I get it.

Question - 69:

Give an example of a time you successfully worked As Nuclear Steam Supply System Engineer (NSSS Enginee on a team?

Ans:

On the whole I prefer to stick to doing what I'm told rather than setting myself up to fail by doing things off my own bat. But there was this one time when I suggested to my boss at the pizza parlor that she try offering an 'all you can eat' deal to students to boost trade on Mondays. She thought it was an interesting idea but nothing ever came of it.

Question - 70:

Why are you leaving your current job?

Ans:

This is a toughie, but one you can be sure you'll be asked. Definitely keep things positive-you have nothing to gain by being negative about your past employers. Instead, frame things in a way that shows that you're eager to take on new opportunities and that the role you're interviewing for is a better fit for you than your current or last position. For example, "I'd really love to be part of product development from beginning to end, and I know I'd have that opportunity here." And if you were let go? Keep it simple: "Unfortunately, I was let go," is a totally OK answer.

Question - 72:

Describe to me the position As Nuclear Steam Supply System Engineer (NSSS Enginee you're applying for?

Ans:

This is a "homework" question, too, but it also gives some clues as to the perspective the person brings to the table. The best preparation you can do is to read the job description and repeat it to yourself in your own words so that you can do this smoothly at the interview.

Question - 73:

What problems have you encountered at work?

Ans:

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.

Question - 74:

How would you rate your communication and interpersonal skills for this job As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

These are important for support workers. But they differ from the communication skills of a CEO or a desktop support technician. Communication must be adapted to the special ways and needs of the clients. Workers must be able to not only understand and help their clients, but must project empathy and be a warm, humane presence in their lives.

Question - 75:

How many square feet of pizza are eaten in the United States each month?

Ans:

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

Question - 76:

What's your salary history?

Ans:

When you are interviewing for a new job, it is common practice for the company to ask you about your salary history. I typically want to know what the candidate's base salary is, if they receive any bonus, the average bonus amount, and any additional compensation or perks, such as 500k matching, stock grants or stock options, paid time off and how much they are required to pay towards their medical premiums.

Question - 77:

What would your first 30, 60, or 90 days look like in this role As Nuclear Steam Supply System Engineer (NSSS Enginee)?

Ans:

Start by explaining what you'd need to do to get ramped up. What information would you need? What parts of the company would you need to familiarize yourself with? What other employees would you want to sit down with? Next, choose a couple of areas where you think you can make meaningful contributions right away. (e.g., "I think a great starter project would be diving into your email marketing campaigns and setting up a tracking system for them.") Sure, if you get the job, you (or your new employer) might decide there's a better starting place, but having an answer prepared will show the interviewer where you can add immediate impact-and that you're excited to get started.

Question - 78:

Explain an idea that you have had and have then implemented in practice?

Ans:

Often an interview guide will outline the so-called 'STAR' approach for answering such questions; Structure the answer as a situation, task, action, and result: what

the context was, what you needed to achieve, what you did, and what the outcome was as a result of your actions.

Question - 79:

What do you know about the company?

Ans:

Any candidate can read and regurgitate the company's "About" page. So, when interviewers ask this, they aren't necessarily trying to gauge whether you understand the mission—they want to know whether you care about it. Start with one line that shows you understand the company's goals, using a couple key words and phrases from the website, but then go on to make it personal. Say, "I'm personally drawn to this mission because..." or "I really believe in this approach because..." and share a personal example or two.

Question - 80:

What schedule do you hope to work? Are you willing to work extra hours?

Ans:

Be honest. If you really want the job and are willing to work any schedule needed, say so. If, however, you have no intention of working late hours or weekends, simply let the interviewer know the hours that you are available to work. The same applies to extra hours. You are more likely to be hired if you are willing to work any time you are needed. However, saying that you are willing and then complaining about the hours once you start working is a recipe for disaster.
