## Systems Analysts Systems Programmer Interview Questions And Answers Guide.

### Question - 1:

What do you like to do for fun?

#### Ans:

Be open to sharing hobbies and activities that you enjoy. Make sure you're genuine about it and don't list off things you don't really like because if they ask you a follow up question it'll be harder for you to answer.

### Question - 2:

What is your dream job?

#### Ans:

There is almost no good answer to this question, so don't be specific. If you tell the interviewer that the job you're applying for with his/her company is the perfect job you may lose credibility if you don't sound believable (which you probably won't if you're not telling the truth.) If you give the interviewer some other job the interviewer may get concerned that you'll get dissatisfied with the position if you're hired. Again, don't be specific. A good response could be, "A job where my work ethic and abilities are recognized and I can make a meaningful difference to the organization."

### Question - 3:

What can you offer us that someone else can not?

#### Ans:

Bad Answer: Going negative - if the candidate starts trash talking other candidates, it's a sure sign of a bad attitude. Also, if they can't provide a solid answer, it may show that they lack thorough knowledge of the skills the job requires, and an understanding of where they fit in.

Good answer: The candidate can name specific skills, abilities or understandings they have that apply directly to the job that other candidates are unlikely to have, or are in short supply.
