Orthopaedics Interview Questions And Answers Guide.

Question - 1:

What is an ACL reconstruction?

Ans:

ACL reconstruction is a surgical procedure that repairs a torn anterior cruciate ligament (ACL), one of the four ligaments that help stabilize the knee. The ligament is reconstructed using a tendon that is passed through the inside of the knee joint and secured to the upper leg bone (femur) and one of the two lower leg bones (tibia).

Question - 3:

How long do artificial joints last?

Ans:

On average, artificial joints have a lifespan of 10 to 20 years. If you are in your 40s or 50s when you have joint replacement surgery, especially if you are very active, you are likely to need another joint replacement surgery later in life.

Question - 4:

What is joint replacement surgery?

Ans:

Joint replacement surgery is performed to replace an arthritic or damaged joint with a new, artificial joint called a prosthesis. The knee and hip are the most commonly replaced joints, although shoulders, elbows and ankles can also be replaced.
