Question - 2:

Determine when to use stored procedure to complete SQL Server tasks?

Ans:

If a large piece of code needs to be performed repeatedly, stored procedures are ideal

When hundreds of lines of SQL code need to be sent; it is better to use stored procedure through a single statement that executes the code in a procedure, rather than by sending hundreds of lines of code over the network.

When security is required.

Question - 3:

What are the purposes and advantages stored procedure?

Ans:

Purposes and advantages of stored procedures:

- Manage, control and validate data

- It can also be used for access mechanisms

- Large queries can be avoided

- Reduces network traffic since they need not be recompiled

Even though the stored procedure itself may be a complex piece of code, we need not write it over and over again. Hence stored procedures increases reusability of code

- Permissions can be granted for stored procedures. Hence, increases security.
