Java JNDI Interview Questions And Answers Guide.

Question - 1:

How to use LDAP to work with a directory service?

Ans:

An LDAP directory can be distributed among many servers.

Each server can have a replicated version of the total directory that is synchronized periodically.

An LDAP server is called a Directory System Agent (DSA).

An LDAP server that receives a request from a user takes responsibility for the request, passing it to other DSAs as necessary, but ensuring a single coordinated response for the user.
