# Semiconductor Design Engineer Interview Questions And Answers Guide.

## Question - 1:

Top 17 Behavioral Interview Questions As Semiconductor Design Engineer:

### Ans:

Behavioral interviews As Semiconductor Design Engineer where popularized by industrial psychologists in the 1970s, and have been used at big companies like AT&T. The idea behind them is that past responses to situations are the best predictor of how candidates will respond in the future.

1. Tell me about a time you faced a conflict while working as part of a team.
2. Talk about a goal you set for yourself. What did you do to make sure you met the goal?
3. Give an example of a time when you had to work with someone with a very different personality from yours.
4. Talk about an instance where you wish you'd handled a situation differently with a team member.
5. What's the most difficult problem you have had to solve As Semiconductor Design Engineer?
6. Give an example of how you handled a situation where you needed information from a colleague who wasn't responsive.
7. Talk about a time when you had problems building a relationship with a key team member. What did you do?
8. Tell me about an instance when it was important to make a great impression on a client. What did you do?
9. Tell me about a situation where you had to work with a difficult client.
10. Tell me about a situation where you disappointed a client, and how you tried to fix it.
11. Talk about a time when you had to strategize to meet all your obligations.
12. Talk about a time when you failed at something. How did you react?
13. Talk about a time you took on a leadership role.
14. Tell me about a long-term project you oversaw. How did you keep it focused and on schedule?
15. Talk about a time when you were under a lot of stress. What caused it, and how did you manage?
16. Do you prefer to work alone or with others As Semiconductor Design Engineer?
17. Tell me about a time when you were overwhelmed by the amount of work on your agenda. How did you handle it?

## Question - 2:

Tell us about a typical day at work. How does it start? What do you do?

### Ans:

At the beginning of each day, I inspect the work site to make sure that it is hazard-free. Once the work site is secured, I verify that all tools and equipment are adequate in supply. As soon as the work orders are delivered, I provide workers with security guidelines and carry out drills. During the workday, it is my duty to monitor workers to ensure that they are working according to the enforced safety policies and that any problems or accidents are quickly addressed.

## Question - 3:

Describe your work ethic?

### Ans:

While discussing this, be sure to stress specific examples of what you bring to the company. Good qualities include resolve to fulfill job responsibilities, optimism, and a desire to be as efficient as possible while at work.

[View All Answers](#)

## Question - 4:

What position do you prefer on a team working on a project?

### Ans:

Do not claim to be comfortable with a specific role if you are in fact not comfortable with it. However, if you have no problem working in certain roles or situations, be sure to discuss this with the interviewer.

## Question - 5:

Top 11 Questions to Verify Experience and Credentials As Semiconductor Design Engineer:

### Ans:

Sometimes people want a job a little too bad - and they may fudge their credentials and experience a bit.

If you've run into this problem, are worried about it, or have credentials and experience that are absolutely essential, you may need to ask a few verification questions. If you are a candidate, you should review your resume and make sure you know all the key points, and that nothing has been misconstrued.

1. What grades did you get in college?
2. What were your responsibilities when you worked in job x?
3. How many people were on your team at your last job?
4. What will your previous manager/supervisor say when I ask where you needed to improve?
5. What was your beginning and ending salary at job x?
6. What were your beginning and ending titles at job x?
7. Are you eligible for rehire at job x?
8. What tools are necessary for performing job x?
9. Describe to me how you would perform [x typical job task].
10. What was the focus of your thesis?
11. When did you leave company x?

[View All Answers](#)

### Question - 6:

Tell me about a time when you had to give someone difficult feedback As Semiconductor Design Engineer?

### Ans:

By asking this question, your interviewer hopes to learn whether you can communicate effectively, address issues in the workplace and motivate others during difficult times. Giving negative feedback requires honesty, thoughtfulness and tact. Answering this question well can help show an interviewer that you would be a good fit for a managerial position or a position that involves working closely with others.

[View All Answers](#)

### Question - 7:

What type of salary are you looking for?

### Ans:

This can be a very tricky question as the individual asking it is probably digging for something other than a simple answer to the question. We recommend that you don't immediately respond to the question directly. Instead, say something like, "That a difficult question. What is range for this position?" More often than not the interviewer will tell you. If the interviewer insists on direct answer you may want say that it depends on the details of the job - then give a wide salary range.

### Question - 8:

Top 11 Interview Questions to Ask when Emotional Intelligence Matters As Semiconductor Design Engineer:

### Ans:

Emotional intelligence, or EQ, has come into vogue as a good trait to hire for.

EQ is the ability to use emotional information to guide thinking and behavior, to recognize other people's emotions and your own, and to discriminate between different feelings and label them appropriately.

EQ is considered essential to help teams function well. Here are some of the top questions to help you get an idea of how candidates perceive their emotions and those of others.

1. If you started a company today, what would its top values be?
2. Who inspires you? Why?
3. How could you create more balance in your life?
4. What makes you angry?
5. How do you have fun?
6. How good are you at asking for help?
7. How did you deal with a bad day?
8. What's something you're really proud of? Why?
9. Tell me about a time when your mood altered your performance (positively or negatively).
10. Has there ever been a time when you felt you needed to change your behavior at work? How did you do it?
11. Did you create friendships that lasted while working at a previous job?

[View All Answers](#)

### Question - 9:

Do you ever take work home with you?

### Ans:

Here are two great sample answers that might help get you started:

\* I am an extremely organized person, so I tend to be able to get my work done at work. However, if the need arose I would not be against taking work home. I try not to make it a habit, since I do value my free time. I do realize though that the work we do is important, and sometimes you have to do what needs to be done.

\* I do not shy away from taking work home with me. I know that meeting deadlines and doing outstanding work sometimes means taking a bit of it home. I do not have a problem doing that when the need arises.

\* Make sure to give an honest answer. Lying about taking work home may turn out badly for you if it is required and you do not do it.

[View All Answers](#)

### Question - 10:

Explain yourself in one line?

### Ans:

When you respond, keep in mind the type of position you are interviewing for like Semiconductor Design Engineer based job, the company culture, and the work environment. Your answer should help show the interviewer why you're a match for the job and for the company.

Sample answers are:

- \* I'm a people person. I really enjoy meeting and working with a lot of different people.
- \* I'm a perfectionist. I pay attention to all the details, and like to be sure that everything is just right.
- \* I'm a creative thinker. I like to explore alternative solutions to problems and have an open mind about what will work best.
- \* I'm efficient and highly organized. This enables me to be as productive as possible on the job.
- \* I enjoy solving problems, troubleshooting issues, and coming up with solutions in a timely manner.

### **Question - 11:**

Why do you want this job As Semiconductor Design Engineer?

#### **Ans:**

This question typically follows on from the previous one. Here is where your research will come in handy. You may want to say that you want to work for a company that is Global Guideline, (market leader, innovator, provides a vital service, whatever it may be). Put some thought into this beforehand, be specific, and link the company's values and mission statement to your own goals and career plans.

[View All Answers](#)

### **Question - 12:**

How do you think your colleagues at your last job would describe you?

#### **Ans:**

While your CV will say a lot about your work history As Semiconductor Design Engineer, the interviewer will most likely look for greater detail with questions such as this. Be positive about previous experience, highlighting your own strengths.

[View All Answers](#)

### **Question - 13:**

Describe your management style?

#### **Ans:**

Try to avoid specific classifications, whatever it may be. Organizations usually prefer managers who can adapt their skills to different situations.

[View All Answers](#)

### **Question - 14:**

Why did you leave your last job As Semiconductor Design Engineer?

#### **Ans:**

Regardless of why you left your last job make sure to stay positive. Always smile and focus on the positive reason such you were seeking the opportunity to expand your career opportunities, your interest in working with a new firm that provided greater opportunity, you desired to work in a new location, etc. Don't reference previous job problems or differences with management that caused you to leave. If you stay positive, your answer may help you. If you're negative, you will likely decrease your chances of getting the job for which you're interviewing.

[View All Answers](#)

### **Question - 15:**

Top 12 Stress Based Interview Questions As Semiconductor Design Engineer:

#### **Ans:**

Some jobs require employees to work under stress, and some interviewers just like to see how applicants handle stressful questions. There are many questions designed for putting the interviewee into an awkward situation, or throwing them off, to see how they do under stress. Here are some samples.

1. How do you feel this interview is going As Semiconductor Design Engineer?
2. How would you handle undeserved criticism from a superior?
3. How many other jobs are you applying for?
4. What would you do if you saw a colleague stealing supplies or equipment?
5. What did you do when you had a boss you didn't get along with?
6. What would you do if a colleague took credit for your idea, and got a promotion?
7. Was the stress of your previous job too much for you?
8. What would you do if a colleague admitted to lying on their resume to get the job?
9. What would you do if a customer verbally insulted you in front of co-workers?
10. What would you change about the design of a baseball hat?
11. Why were you fired from your previous job As Semiconductor Design Engineer?
12. How successful do you think you've been so far?

[View All Answers](#)

### **Question - 16:**

What's your dream job?

#### **Ans:**

Along similar lines, the interviewer wants to uncover whether this position As Semiconductor Design Engineer is really in line with your ultimate career goals. While "an GGL star" might get you a few laughs, a better bet is to talk about your goals and ambitions-and why this job will get you closer to them.

[View All Answers](#)

### **Question - 17:**

What would your previous employer say is your greatest strength?

#### **Ans:**

Be prepared for this question. If you have to sit and think about it it's going to appear as if you're not sure or that you've never identified your own value in the work place - not good. You don't have to have a complex response. Keep it simple and honest. For example, several possibilities could be Leadership, Problem solving ability, Initiative, Energy, Work ethic, Innovative, etc., etc.

[View All Answers](#)

### Question - 18:

What education or training have you had that makes you fit for this profession As Semiconductor Design Engineer?

#### Ans:

This would be the first question asked in any interview. Therefore, it is important that you give a proper reply to the question regarding your education. You should have all the documents and certificates pertaining to your education and/or training, although time may not allow the interviewer to review all of them.

[View All Answers](#)

### Question - 19:

Tell us about a suggestion you have made that has benefited an organization you've worked for?

#### Ans:

This is another opportunity to show the interviewer what you're capable of so make sure to be prepared for this type of question. Have an example ready and make sure its an example of a suggestion you've made that was accepted and that have positive influence. If you can come up with an example that relates to the position you're applying for that would be even better.

[View All Answers](#)

### Question - 20:

How do you evaluate success As Semiconductor Design Engineer?

#### Ans:

I evaluate success As Semiconductor Design Engineer in different ways. At work, it is meeting the goals set by my supervisors and my fellow workers. It is my understanding, from talking to other employees, that the Global Guideline company is recognized for not only rewarding success but giving employees opportunity to grow as well.

[View All Answers](#)

### Question - 21:

What motivates you?

#### Ans:

I've always been motivated by the challenge - in my last role, I was responsible for training our new recruits and having a 100% success rate in passing scores. I know that this job is very fast-paced and I'm more than up for the challenge. In fact, I thrive on it.

[View All Answers](#)

### Question - 22:

What is your greatest professional achievement?

#### Ans:

Nothing says "hire me" better than a track record of achieving amazing results in past jobs As Semiconductor Design Engineer, so don't be shy when answering this interview question! A great way to do so is by using the S-T-A-R method: Set up the situation and the task that you were required to complete to provide the interviewer with background context (e.g., "In my last job as a Semiconductor Design Engineer, it was my role to manage the invoicing process"), but spend the bulk of your time describing what you actually did (the action) and what you achieved (the result). For example, "In one month, I streamlined the process, which saved my group 10 man-hours each month and reduced errors on invoices by 25%."

[View All Answers](#)

### Question - 23:

How do you think you might fit this position As Semiconductor Design Engineer?

#### Ans:

An important part of research before the interview is what the company does and how the job role relates to that. This includes the company philosophy and working methods. Questions such as this seek to find out how a candidate will fit into the organisation As Semiconductor Design Engineer. Answer positively; including practical examples of how you anticipate you would perform in the new role.

[View All Answers](#)

### Question - 24:

What did you like least about your last (or current) job As Semiconductor Design Engineer?

#### Ans:

Don't vent or focus on the negative with brutally honest answers such as "My boss was a jerk," or "The company culture was too politically correct," or "They just weren't giving me the opportunity to take my career to the next level." Instead, keep the emphasis on the positive, even though there are sure to be things you weren't happy about.

[View All Answers](#)

### Question - 25:

What challenges are you looking for in this position?

#### Ans:

A typical interview question to determine what you are looking for your in next job, and whether you would be a good fit for the position being hired for, is "What challenges are you looking for in a position As Semiconductor Design Engineer?" The best way to answer questions about the challenges you are seeking is to discuss how you would like to be able to effectively utilize your skills and experience if you were hired for the job. You can also mention that you are motivated by challenges, have the ability to effectively meet challenges, and have the flexibility and skills necessary to handle a challenging job. You can continue by describing specific examples of challenges you have met and goals you have achieved in the past.

[View All Answers](#)

### Question - 26:

What motivates you to succeed?

#### Ans:

Your interviewer will likely want to know the reasons why you will remain motivated to do your best during your employment with the company As Semiconductor Design Engineer. Perhaps you are interested in being challenged, but you may also have interest in being recognized for your hard work in the form of the number of sales you can attain. A great example answer for this question is "I always do my best in everything, including my job. I take pride in my success, and I also want the company for which I work to be successful. Being affiliated with a company that is known for its excellence is very important to me."

[View All Answers](#)

### Question - 27:

What is your greatest failure As Semiconductor Design Engineer, and what did you learn from it?

#### Ans:

When I was in college, I took an art class to supplement my curriculum. I didn't take it very seriously, and assumed that, compared to my Engineering classes, it would be a walk in the park. My failing grades at midterm showed me otherwise. I'd even jeopardized my scholarship status. I knew I had to get my act together. I spent the rest of the semester making up for it, ended up getting a decent grade in the class. I learned that no matter what I'm doing, I should strive to do it to the best of my ability. Otherwise, it's not worth doing at all.

[View All Answers](#)

### Question - 28:

What do you like to do outside of work?

#### Ans:

Interviewers ask personal questions in an interview to "see if candidates will fit in with the culture [and] give them the opportunity to open up and display their personality, too." In other words, if someone asks about your hobbies outside of work, it's totally OK to open up and share what really makes you tick. (Do keep it semi-professional, though: Saying you like to have a few beers at the local hot spot on Saturday night is fine. Telling them that Monday is usually a rough day for you because you're always hungover is not.)

[View All Answers](#)

### Question - 29:

What's a time you disagreed with a decision that was made at work?

#### Ans:

Everyone disagrees with the boss from time to time, but in asking this interview question As Semiconductor Design Engineer, hiring managers want to know that you can do so in a productive, professional way. "You don't want to tell the story about the time when you disagreed but your boss was being a jerk and you just gave in to keep the peace. And you don't want to tell the one where you realized you were wrong." Tell the one where your actions made a positive difference on the outcome of the situation, whether it was a work-related outcome or a more effective and productive working relationship.

[View All Answers](#)

### Question - 30:

Explain a time when you did not get along with your coworker?

#### Ans:

I used to lock heads with a fellows. We disagreed over a lot of things - from the care of civilians to who got what shifts to how to speak with a victim's family. Our personalities just didn't mesh. After three months of arguing, I pulled her aside and asked her to lunch. At lunch, we talked about our differences and why we weren't getting along. It turns out, it was all about communication. We communicated differently and once we knew that, we began to work well together. I really believe that talking a problem through with someone can help solve any issue.

[View All Answers](#)

### Question - 31:

How would your former employer describe you?

#### Ans:

In all likelihood, the interviewer will actually speak with your former employer so honesty is key. Answer as confidently and positively as possible and list all of the positive things your past employer would recognize about you. Do not make the mistake of simply saying you are responsible, organized, and dependable. Instead, include traits that are directly related to your work as a medical assistant, such as the ability to handle stressful situations and difficult patients, the way you kept meticulous records, and more.

[View All Answers](#)

### Question - 32:

What is it about this position As Semiconductor Design Engineer that attracts you the most?

#### Ans:

Use your knowledge of the job description to demonstrate how you are a suitable match for the role.

[View All Answers](#)

**Question - 33:**

What can you tell me about team work as part of the job As Semiconductor Design Engineer?

**Ans:**

There is usually a team of staff nurses working in cooperation with each other. A team of nurses has to get along well and coordinate their actions, usually by dividing their responsibilities into sectors or specific activities. They help each other perform tasks requiring more than one person.

[View All Answers](#)

**Question - 34:**

How do you imagine a typical day of an employee in our company As Semiconductor Design Engineer?

**Ans:**

Just do not say that you imagine to only walk and watch what people do. Rather try to show them your attention to details and proactive attitude to job. Mention that you would try to observe the problems, weaknesses as well as opportunities to improve the results and take measures according to it.

[View All Answers](#)

**Question - 35:**

What makes a product successful?

**Ans:**

Basing on the monetization, these questions give you the chance to prove your personal try. Do not show extremely your optimism and pursue the unreality. Give your answers the reality.

It is useful to predict a five to ten- year- scenario of expectations in order to gain your targets that you set up and it is the period of time to see how your plans and targets are performed.

Therefore, the quality of the product and marketability of the mentioned industry need to be highlighted. This will help you to achieve the interviewer's attention and insurance to you personality and you can get the honest and long- term goals.

[View All Answers](#)

**Question - 36:**

Why should we select you not others?

**Ans:**

Here you need to give strong reasons to your interviewer to select you not others. Sell yourself to your interviewer in interview in every possible best way. You may say like I think I am really qualified for the position. I am a hard worker and a fast learner, and though I may not have all of the qualifications that you need, I know I can learn the job and do it well."

[View All Answers](#)

**Question - 37:**

How do you handle conflicts with people you supervise?

**Ans:**

At first place, you try to avoid conflicts if you can. But once it happens and there's no way to avoid it, you try to understand the point of view of the other person and find the solution good for everyone. But you always keep the authority of your position.

[View All Answers](#)

**Question - 38:**

Tell me an occasion when you needed to persuade someone to do something?

**Ans:**

Interpersonal relationships are a very important part of being a successful care assistant. This question is seeking a solid example of how you have used powers of persuasion to achieve a positive outcome in a professional task or situation. The answer should include specific details.

[View All Answers](#)

**Question - 39:**

Do you like being around people?

**Ans:**

People skills are a necessity for medical assistants. When answering this question, be sure to show that you enjoy interacting and working with others and that you also derive great enjoyment from helping others. This will show that you are a team player and that you would be a valuable team member As Semiconductor Design Engineer.

[View All Answers](#)

**Question - 40:**

Why should I hire you As Semiconductor Design Engineer?

**Ans:**

To close the deal on a job offer, you MUST be prepared with a concise summary of the top reasons to choose you. Even if your interviewer doesn't ask one of these question in so many words, you should have an answer prepared and be looking for ways to communicate your top reasons throughout the interview process.

[View All Answers](#)

**Question - 41:**

Why were you fired?

**Ans:**

OK, if you get the admittedly much tougher follow-up question as to why you were let go (and the truth isn't exactly pretty), your best bet is to be honest (the job-seeking world is small, after all). But it doesn't have to be a deal-breaker. Share how you've grown and how you approach your job and life now as a result. If you can position the learning experience as an advantage for this next job, even better.

[View All Answers](#)

**Question - 42:**

How do you handle your anger?

**Ans:**

I don't get angry very easily but in the rare occasion that I do, I hold it in and act as though nothing is wrong.

[View All Answers](#)

**Question - 43:**

Why do you feel you will excel at this job?

**Ans:**

This question presents an excellent opportunity for you to discuss your education, qualifications and personal traits. You might say something like "I studied property management as well as behavior during my college years and I have two years' experience in real estate.

I can gauge the homes or apartments in which clients will be interested based solely upon the needs of their families. Finally, my organizational skills will allow me to schedule appointments or showings confidently and arrive for them punctually." This shows your interviewer that you have all of the skills necessary to become successful not only for yourself, but also for your employer.

[View All Answers](#)

**Question - 44:**

Suppose there are three light switches outside a room. Inside is a single light bulb, controlled by one of the three switches. You need to determine which switch operates the bulb. You can turn the switches on and off as many times as you wish (they are all off to begin with), but may only enter the room once. There is no one there to help you. The door to the room is closed, and there are no windows, so you cannot see inside. How can you discover which switch operates the bulb?

**Ans:**

Do the following steps:

\* 1. Turn ON two switches, and leave one OFF.

\* 2. Wait a few minutes.

\* 3. Turn one switch from ON to OFF. One is now ON and two are OFF

\* 4. Enter the room. - If the light is ON, it is controlled by the switch you left ON. - If the light bulb is OFF, touch it. If it is warm it is controlled by the switch you turned ON and OFF. If it is cold, it is controlled by the switch you never turned on.

[View All Answers](#)

**Question - 45:**

How would you estimate the weight of the Chrysler building?

**Ans:**

This is a process guesstimate where the interviewer wants to know if you know what to ask. First, you would find out the dimensions of the building (height, weight, depth). This will allow you to determine the volume of the building. Does it taper at the top? (Yes.) Then, you need to estimate the composition of the Chrysler building. Is it mostly steel? Concrete? How much would those components weigh per square inch? Remember the extra step: find out whether you're considering the building totally empty or with office furniture, people, etc. If you're including the contents, you might have to add 20 percent or so to the building's weight.

[View All Answers](#)

**Question - 46:**

Why are you leaving the present company?

**Ans:**

According to me we can not grow in the field without taking more responsibilities and risks and also we can't enhance our team leading capabilities, managerial skills without expose to wide range of people.

[View All Answers](#)

**Question - 47:**

If hired, how do you intend on making a difference with our company?

**Ans:**

Dedicate myself to learn everything about the new company that I can, look for ways and ideas that could improve, processes, safety, removing obstacles from the associates, I want to advance within the company.

[View All Answers](#)

**Question - 48:**

If you were an animal, which one would you want to be?

**Ans:**

Seemingly random personality-test type questions like these come up in interviews generally because hiring managers want to see how you can think on your feet. There's no wrong answer here, but you'll immediately gain bonus points if your answer helps you share your strengths or personality or connect with the hiring manager. Pro tip: Come up with a stalling tactic to buy yourself some thinking time, such as saying, "Now, that is a great question. I think I would have to say..."

[View All Answers](#)

**Question - 49:**

What would your first 30, 60, or 90 days look like in this role As Semiconductor Design Engineer?

**Ans:**

Start by explaining what you'd need to do to get ramped up. What information would you need? What parts of the company would you need to familiarize yourself with? What other employees would you want to sit down with? Next, choose a couple of areas where you think you can make meaningful contributions right away. (e.g., "I think a great starter project would be diving into your email marketing campaigns and setting up a tracking system for them.") Sure, if you get the job, you (or your new employer) might decide there's a better starting place, but having an answer prepared will show the interviewer where you can add immediate impact-and that you're excited to get started.

[View All Answers](#)

**Question - 50:**

Describe to me the position As Semiconductor Design Engineer you're applying for?

**Ans:**

This is a "homework" question, too, but it also gives some clues as to the perspective the person brings to the table. The best preparation you can do is to read the job description and repeat it to yourself in your own words so that you can do this smoothly at the interview.

[View All Answers](#)

**Question - 51:**

What types of personalities do you work with best?

**Ans:**

In the past, I have found it difficult to work with others who see themselves as better than others, who can take criticism, and who refuse to work with others. I have found it challenging to work with them b/c I am a team oriented person who feels the importance of working together over the needs of the individual especially in a learning environment.

[View All Answers](#)

**Question - 52:**

Do you have good computer skills?

**Ans:**

It is becoming increasingly important for medical assistants to be knowledgeable about computers. If you are a long-time computer user with experience with different software applications, mention it. It is also a good idea to mention any other computer skills you have, such as a high typing rate, website creation, and more.

[View All Answers](#)

**Question - 53:**

How do you handle stressful situations?

**Ans:**

By remaining calm, weighing out all my options and executing a plan to get the situation resolve .

[View All Answers](#)

**Question - 54:**

What is your desired salary As Semiconductor Design Engineer?

**Ans:**

Bad Answer: Candidates who are unable to answer the question, or give an answer that is far above market. Shows that they have not done research on the market rate, or have unreasonable expectations.

Good answer: A number or range that falls within the market rate and matches their level of mastery of skills required to do the job.

**Question - 55:**

What are three positive things your last boss would say about you?

**Ans:**

It's time to pull out your old performance appraisals and boss's quotes. This is a great way to brag about yourself through someone else's words: "My boss has told me that I am the best designer he has ever had. He knows he can rely on me, and he likes my sense of humor."

**Question - 56:**

Have you got any questions?

**Ans:**

This is your final opportunity to persuade the interviewer that you are the right candidate for the job. Now is not the time to ask questions about holidays, pay or pensions - all these things can be asked later when you get an offer of employment. Now is the time to ask about any reservations that the interviewer may have about your suitability for the role. You will then give yourself one last chance to persuade the interviewer that you are the right candidate for the job.

Example Thank you. I think we have covered everything. Before we finish the interview I would like to take the opportunity to ask if you have any reservations about my suitability for this role?

**Question - 57:**

What do you know about the company?

**Ans:**

Any candidate can read and regurgitate the company's "About" page. So, when interviewers ask this, they aren't necessarily trying to gauge whether you understand the mission—they want to know whether you care about it. Start with one line that shows you understand the company's goals, using a couple key words and phrases from the website, but then go on to make it personal. Say, "I'm personally drawn to this mission because..." or "I really believe in this approach because..." and share a personal example or two.

**Question - 58:**

How do you plan to go by an example for your subordinates?

**Ans:**

Sticking to the rules by yourself, working hard and not mind participating on basic tasks is a good answer.

**Question - 59:**

Give me an example of an emergency situation that you faced. How did you handle it?

**Ans:**

There was a time when one of my employers faced the quitting of a manager in another country. I was asked to go fill in for him while they found a replacement and stay to train that person. I would be at least 30 days. I quickly accepted because I knew that my department couldn't function without me.

**Question - 60:**

How do you evaluate your ability to handle conflict?

**Ans:**

I pride myself on being a good problem solver. Through my previous job and management positions I have faced numerous conflicts in different situations, and my experiences have helped me to hone my issue resolution skills. I believe that it is important to get to and address the root of the issue, in a respectable manner.

**Question - 62:**

Describe a typical work week for this position As Semiconductor Design Engineer?

**Ans:**

Interviewers expect a candidate for employment to discuss what they do while they are working in detail. Before you answer, consider the position As Semiconductor Design Engineer you are applying for and how your current or past positions relate to it. The more you can connect your past experience with the job opening, the more successful you will be at answering the questions.

**Question - 63:**

How do you keep each member of the team involved and motivated?

**Ans:**

Many managers mistakenly think that money is the prime motivator for their employees. However, according to surveys by several different companies, money is consistently ranked five or lower by most employees. So if money is not the best way to motivate your team, what is?

Employees' three most important issues according to employees are:

- \* Respect
- \* A sense of accomplishment
- \* Recognition

**Question - 64:**

What problems have you encountered at work?

**Ans:**

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.

[View All Answers](#)

**Question - 65:**

What schedule do you hope to work? Are you willing to work extra hours?

**Ans:**

Be honest. If you really want the job and are willing to work any schedule needed, say so. If, however, you have no intention of working late hours or weekends, simply let the interviewer know the hours that you are available to work. The same applies to extra hours. You are more likely to be hired if you are willing to work any time you are needed. However, saying that you are willing and then complaining about the hours once you start working is a recipe for disaster.

**Question - 66:**

Do you have any questions for me?

**Ans:**

Good interview questions to ask interviewers at the end of the job interview include questions on the company growth or expansion, questions on personal development and training and questions on company values, staff retention and company achievements.

**Question - 68:**

Explain an idea that you have had and have then implemented in practice?

**Ans:**

Often an interview guide will outline the so-called 'STAR' approach for answering such questions; Structure the answer as a situation, task, action, and result: what the context was, what you needed to achieve, what you did, and what the outcome was as a result of your actions.

**Question - 69:**

How many square feet of pizza are eaten in the United States each month?

**Ans:**

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

**Question - 70:**

How would your friends describe you?

**Ans:**

My friends would probably say that I'm extremely persistent - I've never been afraid to keep going back until I get what I want. When I worked as a program developer, recruiting keynote speakers for a major tech conference, I got one rejection after another - this was just the nature of the job. But I really wanted the big players - so I wouldn't take no for an answer. I kept going back to them every time there was a new company on board, or some new value proposition. Eventually, many of them actually said "yes" - the program turned out to be so great that we doubled our attendees from the year before. A lot of people might have given up after the first rejection, but it's just not in my nature. If I know something is possible, I have to keep trying until I get it.

**Question - 71:**

Do you work well under pressure?

**Ans:**

Yes.. When it comes down to the wire, the best thing I can to remain focused, have some flexibility, and understand priorities.. Giving them attention in the order they are needed.

[View All Answers](#)

**Question - 72:**

What was the most important task you ever had?

**Ans:**

There are two common answers to this question that do little to impress recruiters:

\* 'I got a 2.1'

\* 'I passed my driving test'

No matter how proud you are of these achievements, they don't say anything exciting about you. When you're going for a graduate job, having a degree is hardly going to make you stand out from the crowd and neither is having a driving licence, which is a requirement of many jobs.

[View All Answers](#)

**Question - 73:**

What does quality work mean to you?

**Ans:**

Quality work to be is about doing work to the require or set standard, which is very important when it comes to warehouse operations.

[View All Answers](#)

**Question - 74:**

What is your greatest weakness As Semiconductor Design Engineer? What are you doing to improve it?

**Ans:**

I believe my biggest weakness As Semiconductor Design Engineer is wanting to help anyone I can help. What I mean is I am willing to take on task that are not my job. I want to learn all I can. However, that has helped me get promoted or even asked to help in times of need in other department. I have been know as the "go to person" when help is needed.
