[View All Answers](#)

Question - 12:

What are the benefits for organizations by using Blackberry?

Ans:

The BlackBerry Connect technology allows the organizations for standardizing BlackBerry platform and leverages their existing BlackBerry solution investments. The employees productivity and performance can also be boosted by providing them the mobile access for their emails and calendars.

[View All Answers](#)

Question - 13:

List the features of Blackberry?

Ans:

- * The standard features of a BlackBerry are calendar, notes, calculator, tasks, alarm clock and few games.
- * In addition to the standard features, BlackBerry also has a feature for downloading third party applications.
- * Most of the BlackBerry handhelds are capable of using Bluetooth, which allows for using wireless Bluetooth headsets for handling telephone calls.

[View All Answers](#)

Question - 14:

Tell me how synchronization takes place with Blackberry technology?

Ans:

The handheld device is used as a network device, which always connected to the data account of the user via re-director software. The software is installed on the BlackBerry Enterprise Server. The communication between the software, BE Server and the hand held devices software is always a two-way street. BES immediately updates the mobile device or the email or the calendar account, whenever a change in email account occurs.

The push technology of BlackBerry keeps the device instantly in synchronization without any effort by the user.

[View All Answers](#)

Question - 15:

Describe BlackBerry internet service?

Ans:

The primary alternative to BlackBerry Enterprise Server is BlackBerry Internet Service. The development of this service is aimed at the average consumer rather than for the business consumer. POP3 and IMAP integration are allowed by these services for the personal user. It allows upto 10 e-mail accounts could be accessed including popular emails Gmail, Hotmail, Yahoo and AOL. MySpace, Facebook and MSN can also be accessed by using special bundles.

Latest BlackBerry devices are using proprietary BlackBerry Messenger for sending and receiving instant messages through BlackBerry PIN or barcode scan. This is a BlackBerry Alliance program for the partners who work under contract with RIM for creating new BlackBerry applications.

[View All Answers](#)

**Question - 16:**

Define BlackBerry enterprise server?

Ans:

The BlackBerry handhelds are integrated into the e-mail system of the organization through software BlackBerry Enterprise Server. The BES versions are available for MS Exchange, Novell GroupWise and Lotus Domino. A connector was made by Google for BES for making BES available for Google Apps. A new feature is added which enables to track the current location of an individual through trailation.

BES provides handhelds with the connectivity of TCP/IP which can be accessed through a component known as Mobile Data Service Connection Service MDS-CS. This allows the development of custom application development using data streams on BlackBerry devices which are based on the Sun JME platform.

BES also provides network security in the form of Triple DES or AES encryption standard of all data including e-mail and MDS traffic, which travels between the BlackBerry handheld devices and a BES.

Question - 17:

What CPU used in Blackberry technology?

Ans:

Earlier, BlackBerry 8000 series with Pearl was based on the 312 MHz ARM XScale ARMv5TE PAXA900. BlackBerry 8707 was based on 80 MHz Qualcomm 3250 chipset, and the device was often slower for downloading and render the web pages over 3G than the 8700 was over EDGE networks.

[View All Answers](#)

Question - 18:

What is Blackberry OS(operating system)?

Ans:

* The operating system provides support for Java MIDP 1.0 and WAP 1.2.

* The current version supports Novell Group Wise and Lotus Notes.

* Third-party software can be developed using BlackBerry APIs as well, with certain restriction functionality must be signed by RIM digitally, so that it can be associated to a developer account.

[View All Answers](#)

Question - 19:

Explain Blackberry technology?

Ans:

BlackBerry is nothing but a handheld wireless device that is just like a two way pager.

It supports the features like mobile telephone, push e-mail, text messaging, web browsing, internet faxing.

In addition to these, all types of wireless information services and multi-touch interfaces are also included.

[View All Answers](#)

Question - 20:

Question - 22:

Suppose I am trying to sign in to my BlackBerry Internet Service Account, but I am getting this error message: "The User ID and Password provided are invalid. Please re-enter your User ID and Password and try again." What should I do?

Ans:

First, verify that you're entering the correct User ID and password. If you can't remember your password, you can have a new one sent to your device:

Go to the BlackBerry website.

Click Forgot Password?

Enter your User ID in the User name field.

Click Request Password.

A new password will be sent to your device, which you can use to sign in to your BlackBerry Internet Service account.

Question - 23:

What do you know about BlackBerry 7?

Ans:

BlackBerry 7 is a mobile OS created by the BlackBerry company (formally named Research In Motion). It originally launched in April 2011, and a 7.1 version update was released in January 2012.

[View All Answers](#)

Question - 24:

How to Recover a Dead BlackBerry?

Ans:

1. Physical damage, water is the worst enemy of delicate electronic device. Try drying it with a desiccant and replacing the battery. If there is no activity, you can still try the last ditch technique, nothing to loose anyway.
2. Your device is not able to start, something has gone wrong and the OS is corrupt. Failed Upgrade suggestions. Link failed, Post #384 of this thread.
3. Geeks call this an "Uncaught exception error". That is a polite way of saying, the last thread has terminated, the OS has halted because it is corrupt. In many cases, the Application Loader can be used from Desktop Manager or Windows, see Ref #1 for the CrackBerry 101 discussion.

Question - 25:

How to Remove an I.T. Policy from a BlackBerry?

Ans:

- Step 1 Ensure the Blackberry Desktop Manager is installed using Blackberry Internet Service, and not Blackberry Enterprise Server. If you are unsure, it would probably be a good idea to uninstall the Desktop Manager and start again. If you don't have the CD that came with your Blackberry, the Software can be downloaded here.
 - Step 2 Download the file policy.bin and save it in your Blackberry installation directory (C:\Program Files\Research In Motion\BlackBerry).
 - Step 3 Wipe your Blackberry, creating a backup if necessary. Select Options/Security/Wipe on the Device. If this option is unavailable, you may have to install the latest software on your Blackberry. You need to Download and install the latest Desktop Manger Software, then the latest Handheld Software. Connect your device, open the Desktop Manager, select Application Loader, and follow the prompts.
 - Step 4 Close the Desktop Manager if it is open.
 - Step 5 From the Windows Start Menu select Run..., and at the prompt type regedit. In the tree on the left hand side, navigate to: HKEY_Current_Users\Software\Research In Motion\BlackBerry\PolicyManager. Right-Click the Policy Manager Folder and select New/String Value. Name the value Path. Now, Double-Click the Path Subkey and set Value Data to: C:\Program Files\Research In Motion\BlackBerry\policy.bin
 - Step 6 Open the Desktop Manager.
 - Step 7 Connect the Device.
- Verification
Once complete, the Options/Security screen on your Blackberry should not contain references to an IT Policy, you should now be able to change all settings (including password prompts), and install Third Party Applications.

Question - 26:

How to Wipe / Load OS Using BBSAK?

Ans:

1. Always backup your phone. Backup your phone using Desktop Manager.
2. You can backup your 3rd party apps too if you want but I usually don't. I will do a fresh download of those apps to be on the safe side.
3. Plug in the cable to your phone and run BBSAK.
4. You will see a box to enter the password. If you don't have a password, leave it blank and press OK. If you have a password, key in the password and press OK.
5. You will be able to see your BlackBerry PIN at the PIN box if the phone is connected correctly to BBSAK.
6. Search for the option to Wipe Device and it will prompt you if you are sure to wipe. If you have not backup your phone (or forgotten to), this is a good time to exit and backup first.
7. Press Wipe Device and wait until the box appear saying Wipe Complete.
8. The phone will reboot and you will then proceed to a white screen. It will prompt you Error 507. Do not panic and follow the next step and don't unplug the cable.
9. If you have the desired OS installed in your computer, select the option for Load OS.
10. From here, everything is straight forward and just follow the instructions.

Question - 27:

How to Increase BlackBerrys File free memory?

Ans:

Memory Optimization Procedure (MOP)

Our Consumer BlackBerrys come packed full of features, samples, themes and support for highly sophisticated communications. It makes for a great, out of the box experience. It also represents the working limits of the device. The geeks had to stop somewhere, or there would be no free memory at all. In order to run smoothly, our 'berrys needs roughly 12,000,000 of free space. If it drops much lower, built in low memory programs kicks in and cleans up. It does a great job, clears out all it's temporary files, but it doesn't stop there. It also clears out logs files, messages and past calender entries. The best defence is a regular back up. The cure is removing the memory consuming stuff.
