## About Interview Questions Answers

**Interview Questions Answers . ORG** is an interview preparation guide of thousands of Job Interview Questions And Answers, Job Interviews are always stressful even for job seekers who have gone on countless interviews. The best way to reduce the stress is to be prepared for your job interview. Take the time to review the standard interview questions you will most likely be asked. These interview questions and answers on Data Link Layer will help you strengthen your technical skills, prepare for the interviews and quickly revise the concepts.

If you find any **question or answer** is incorrect or incomplete then you can **submit your question or answer** directly with out any registration or login at our website. You just need to visit [Data Link Layer Interview Questions And Answers](#) to add your answer click on the *Submit Your Answer* links on the website; with each question to post your answer, if you want to ask any question then you will have a link *Submit Your Question*; that's will add your question in Data Link Layer category. To ensure quality, each submission is checked by our team, before it becomes live. This [Data Link Layer Interview preparation PDF](#) was generated at **Wednesday 29th November, 2023**

## Data Link Layer Interview Questions And Answers Guide.

### Question - 1:

What is Virtual Private Network?

#### Ans:

Virtual Private network is a network that used the public telecommunication infrastructure. This means that it used public wires to connect the nodes. E.g. Internet. VPN supports remote access to computers and allow data to be transmitted over this public network. Even though the data is transmitted over a public network, encryption and decrypting data to ensure security.

### Question - 2:

Explain what are the responsibilities of Data Link Layer?

#### Ans:

The Data Link Layer transforms the physical layer, a raw transmission facility, to a reliable link and is responsible for node-node delivery.

- Framing
- Physical Addressing
- Flow Control
- Error Control
- Access Control

### Question - 3:

Tell me why data link layer is divided into two layers?

#### Ans:

Data link layer is divided into MAC layer and LLC layer.

This LLC LAYER is formed for NOVELL AND IPX protocol. For IP protocol we use SRC ADDRESS and DEST ADDR (for communication), but when we use IPX/NOVELL protocol the frame includes 1 more byte named "don't know" (through which communication happens @ 2nd layer)... (in short to communicate with IP and IPX/NOVELL we form LLC layer.)

### Question - 4:

Explain VPN?

#### Ans:

A VPN is a service that offers secure, reliable connectivity over a shared public network infrastructure such as the Internet. VPNs maintain the same security and management policies as a private network. They are the most cost-effective method of establishing a virtual point-to-point connection between remote users and an enterprise customer's network.

### Question - 5:

What is Spanning-Tree Protocol (STP)?

#### Ans:

Spanning-Tree Protocol (STP) as defined in the IEEE 802.1D is a link management protocol that provides path redundancy while preventing undesirable loops in the network. For an Ethernet network to function properly, only one active path can exist between two stations. Loops occur in networks for a variety of reasons. The most common reason you find loops in networks is the result of a deliberate attempt to provide redundancy - in case one link or switch fails, another link or switch can take over.

**Question - 6:**

Do you know what Is a MAC Address?

**Ans:**

MAC (Media Access Control) addresses are globally unique addressed that are written into hardware at the time of manufacture. The MAC address is a unique value associated with a network adapter. MAC addresses are also known as hardware addresses or physical addresses. They uniquely identify an adapter on a LAN. MAC addresses are 12-digit hexadecimal numbers (48 bits in length).
