Engineering and Scientific Programmer Interview Questions And Answers Guide.

Question - 1:

Can you describe your ideal boss/supervisor?

Ans:

During the interview As Engineering and Scientific Programmer process employers will want to find out how you respond to supervision. They want to know whether you have any problems with authority, If you can work well as part of a group (see previous question) and if you take instructions well etc. Never ever ever, criticize a past supervisor or boss. This is a red flag for airlines and your prospective employer will likely assume you are a difficult employee, unable to work in a team or take instruction and side with your former employer.

[View All Answers](#)

Question - 2:

What qualities do you look for in a boss?

Ans:

Remain optimistic and do not be too specific. Good attributes include moral character, honesty, and intelligence since managers usually believe they possess these qualities.

[View All Answers](#)

Question - 3:

What can you offer us that someone else can not?

Ans:

Bad Answer: Going negative - if the candidate starts trash talking other candidates, it's a sure sign of a bad attitude. Also, if they can't provide a solid answer, it may show that they lack thorough knowledge of the skills the job requires, and an understanding of where they fit in.

Good answer: The candidate can name specific skills, abilities or understandings they have that apply directly to the job that other candidates are unlikely to have, or are in short supply.

[View All Answers](#)

Question - 4:

How did you hear about the position As Engineering and Scientific Programmer?

Ans:

Another seemingly innocuous interview question, this is actually a perfect opportunity to stand out and show your passion for and connection to the company and for job As Engineering and Scientific Programmer. For example, if you found out about the gig through a friend or professional contact, name drop that person, then share why you were so excited about it. If you discovered the company through an event or article, share that. Even if you found the listing through a random job board, share what, specifically, caught your eye about the role.

[View All Answers](#)

Question - 5:

Describe your management style?

Ans:

Try to avoid specific classifications, whatever it may be. Organizations usually prefer managers who can adapt their skills to different situations.

[View All Answers](#)

Question - 6:

Do you consider yourself successful?

Ans:

You should always answer yes to this question. Briefly explain why without going on and on. If you communicate that you're more successful than you really are you

may come off as arrogant or unrealistic. A goof explanation is that you have set professional goals and that you have met some of these goals and are on track to meet more in the near future.

[View All Answers](#)

Question - 7:

Do you know anyone that works with our company?

Ans:

Sometimes companies have policies relating to the hiring of individuals related to current company employees. If you are related to anyone working for the company make sure you're aware of company policies before you enter the interview. If you have a friend or acquaintance working for the company make sure have good relationship with this individual before mentioning them.

[View All Answers](#)

Question - 8:

What do you know about our company?

Ans:

You always want to make sure that you're pretty familiar with the company that you're interviewing with. Nothing looks worse than a candidate who knows nothing about the company they say they're interested in working for. Find out everything you can about the company, its culture and its goals. You will also want to know how the company is positioned in its market as well as who its major competitors are.

[View All Answers](#)

Question - 9:

When were you most satisfied in your job As Engineering and Scientific Programmer?

Ans:

I'm a people person. I was always happiest and most satisfied when I was interacting with community residents, making sure I was able to meet their needs and giving them the best possible comfort in a tough situation. It was my favorite part of the job, and it showed. Part of the reason I'm interested in this job is that I know I'd have even more interaction with the public, on an even more critical level.

[View All Answers](#)

Question - 10:

Why are you interested in working As Engineering and Scientific Programmer for [insert company name here]?

Ans:

Bad Answer: They don't have a good reason, or provide a generic answer, "I think it represents a great opportunity."

Good answer: One that shows they've done research on the company, and are truly excited about specific things they can do at the job. This not only shows enthusiasm for the work and basic preparation skills, gives you clues about the cultural fit.

[View All Answers](#)

Question - 11:

What position do you prefer on a team working on a project?

Ans:

Do not claim to be comfortable with a specific role if you in are in fact not comfortable with it. However, if you have no problem working in certain roles or situations, be sure to discuss this with the interviewer.

[View All Answers](#)

Question - 12:

Why are you leaving last job?

Ans:

Although this would seem like a simple question, it can easily become tricky. You shouldn't mention salary being a factor at this point As Engineering and Scientific Programmer. If you're currently employed, your response can focus on developing and expanding your career and even yourself. If you're current employer is downsizing, remain positive and brief. If your employer fired you, prepare a solid reason. Under no circumstance should you discuss any drama or negativity, always remain positive.

[View All Answers](#)

Question - 13:

What did you like least about your last (or current) job As Engineering and Scientific Programmer?

Ans:

Don't vent or focus on the negative with brutally honest answers such as "My boss was a jerk," or "The company culture was too politically correct," or "They just weren't giving me the opportunity to take my career to the next level." Instead, keep the emphasis on the positive, even though there are sure to be things you weren't happy about.

[View All Answers](#)

Question - 14:

What are your greatest professional strengths As Engineering and Scientific Programmer?

Ans:

When answering this question, we recommends being accurate (share your true strengths, not those you think the interviewer wants to hear); relevant (choose your

strengths that are most targeted to this particular position As Engineering and Scientific Programmer); and specific (for example, instead of "people skills," choose "persuasive communication" or "relationship building"). Then, follow up with an example of how you've demonstrated these traits in a professional setting.

[View All Answers](#)

Question - 15:

Explain me about a problem or disagreement you had with previous supervisor?

Ans:

This question is trap. It is meant to see whether or not you'll speak poorly of an employer. No one wants to hire someone who's going to speak poorly of them down the road. Stay upbeat and positive - and most of all don't say anything negative about a previous employer.

[View All Answers](#)

Question - 16:

Tell us something about yourself?

Ans:

Bad Answer: Candidates who ramble on about themselves without regard for information that will actually help the interviewer make a decision, or candidates who actually provide information showing they are unfit for the job.

Good answer: An answer that gives the interviewer a glimpse of the candidate's personality, without veering away from providing information that relates to the job. Answers should be positive, and not generic.

Question - 17:

Top 17 Behavioral Interview Questions As Engineering and Scientific Programmer:

Ans:

Behavioral interviews As Engineering and Scientific Programmer where popularized by industrial psychologists in the 1970s, and have been used at big companies like AT&T. The idea behind them is that past responses to situations are the best predictor of how candidates will respond in the future.

1. Tell me about a time you faced a conflict while working as part of a team.
2. Talk about a goal you set for yourself. What did you do to make sure you met the goal?
3. Give an example of a time when you had to work with someone with a very different personality from yours.
4. Talk about an instance where you wish you'd handled a situation differently with a team member.
5. What's the most difficult problem you have had to solve As Engineering and Scientific Programmer?
6. Give an example of how you handled a situation where you needed information from a colleague who wasn't responsive.
7. Talk about a time when you had problems building a relationship with a key team member. What did you do?
8. Tell me about an instance when it was important to make a great impression on a client. What did you do?
9. Tell me about a situation where you had to work with a difficult client.
10. Tell me about a situation where you disappointed a client, and how you tried to fix it.
11. Talk about a time when you had to strategize to meet all your obligations.
12. Talk about a time when you failed at something. How did you react?
13. Talk about a time you took on a leadership role.
14. Tell me about a long-term project you oversaw. How did you keep it focused and on schedule?
15. Talk about a time when you were under a lot of stress. What caused it, and how did you manage?
16. Do you prefer to work alone or with others As Engineering and Scientific Programmer?
17. Tell me about a time when you were overwhelmed by the amount of work on your agenda. How did you handle it?

[View All Answers](#)

Question - 18:

What have you done to improve your skills over the past year As Engineering and Scientific Programmer?

Ans:

You'll want to be prepare with some very specific examples of what you've done over the last year and what you're currently doing to improve your professional knowledge and skill set as well as anything else you're doing the shows self improvement.

[View All Answers](#)

Question - 19:

What has been your biggest professional disappointment?

Ans:

When discussing a professional disappointment, make sure to discuss a scenario you could not control. Be positive about the experience and accept personal responsibility where applicable.

[View All Answers](#)

Question - 20:

What's your management style?

Ans:

The best managers are strong but flexible, and that's exactly what you want to show off in your answer. (Think something like, "While every situation and every team member requires a bit of a different strategy, I tend to approach my employee relationships as a coach...") Then, share a couple of your best managerial moments, like when you grew your team from five to 15 or coached an underperforming employee to become the company's top employee.

[View All Answers](#)

Question - 21:

What have you learned from mistakes on this job?

Ans:

Candidates without specific examples often do not seem credible. However, the example shared should be fairly inconsequential, unintentional, and a learned lesson should be gleaned from it. Moving ahead without group assistance while assigned to a group project meant to be collaborative is a good example.

[View All Answers](#)

Question - 22:

What type of people do you not work well with?

Ans:

Be very careful answering this question as most organization employ professionals with an array of personalities and characteristics. You don't want to give the impression that you're going to have problems working with anyone currently employed at the organization. If you through out anything trivial you're going to look like a whiner. Only disloyalty to the organization or lawbreaking should be on your list of personal characteristics of people you can't work with.

[View All Answers](#)

Question - 23:

Basic 15 Interview Questions that Test Communication Skills As Engineering and Scientific Programmer:

Ans:

For most jobs, communication skills As Engineering and Scientific Programmer are important. It's hard to work as a team if people aren't communicating well.

At some jobs, like customer service or sales, communication skills are an absolute essential.

These questions are meant to help gauge a candidate's ability to communicate.

1. How do you prefer to build rapport with others?
2. How would you go about simplifying a complex issue in order to explain it to a client or colleague?
3. How would you go about persuading someone to see things your way at work?
4. How would you go about explaining a complex idea/problem to a client who was already frustrated?
5. What would you do if you there was a breakdown in communication at work?
6. Talk about a successful presentation you gave and why you think it did well.
7. How would you explain a complicated technical problem to a colleague with less technical understanding?
8. Do you prefer written or verbal communication As Engineering and Scientific Programmer?
9. Describe a time when you had to be careful talking about sensitive information. How did you do it?
10. What would you do if you misunderstood an important communication on the job?
11. Talk about a time when you made a point that you knew your colleagues would be resistant to.
12. Is it more important to be a good listener or a good communicator As Engineering and Scientific Programmer?
13. Tell me about a time you had to relay bad news to a client or colleague.
14. Rate your communication skills on a scale of 1 to 10. Give examples of experiences that demonstrate the rating is accurate.
15. How have you handled working under someone you felt was not good at communicating?

[View All Answers](#)

Question - 24:

If you had enough money to retire would you?

Ans:

Just be honest. If you would retire then say so. But since you can't retire, and the interviewer already knows this, simply answer that since you can't this is type of work you prefer doing. However, if you wouldn't retire if you had the money then explain why. Work is an important element of happiness for most people and many won't retire even when they can.

[View All Answers](#)

Question - 25:

Did you consider yourself a team player?

Ans:

Of course you're a team player - who isn't. But a simple yes probably isn't the response the interviewer is looking for. Be ready to provide specific example of how you've worked as part of a cohesive team to get things accomplished and how you've focus on team performance rather than individual performance. Make sure not to brag as this will make it appear as that you're more concerned about your own performance and accomplishments than those of the team.

[View All Answers](#)

Question - 26:

How would your boss and co-workers describe you?

Ans:

First of all, be honest (remember, if you get this job, the hiring manager will be calling your former bosses and co-workers!). Then, try to pull out strengths and traits you haven't discussed in other aspects of the interview As Engineering and Scientific Programmer, such as your strong work ethic or your willingness to pitch in on other projects when needed.

[View All Answers](#)

Question - 27:

What challenges are you looking for in this position?

Ans:

A typical interview question to determine what you are looking for your in next job, and whether you would be a good fit for the position being hired for, is "What challenges are you looking for in a position As Engineering and Scientific Programmer?" The best way to answer questions about the challenges you are seeking is to discuss how you would like to be able to effectively utilize your skills and experience if you were hired for the job. You can also mention that you are motivated by challenges, have the ability to effectively meet challenges, and have the flexibility and skills necessary to handle a challenging job. You can continue by describing

specific examples of challenges you have met and goals you have achieved in the past.

[View All Answers](#)

Question - 28:

Why are you leaving the present company?

Ans:

According to me we can not grow in the field without taking more responsibilities and risks and also we can't enhance our team leading capabilities, managerial skills without expose to wide range of people.

[View All Answers](#)

Question - 29:

Why were you fired?

Ans:

OK, if you get the admittedly much tougher follow-up question as to why you were let go (and the truth isn't exactly pretty), your best bet is to be honest (the job-seeking world is small, after all). But it doesn't have to be a deal-breaker. Share how you've grown and how you approach your job and life now as a result. If you can position the learning experience as an advantage for this next job, even better.

[View All Answers](#)

Question - 30:

What do you consider to be your weaknesses?

Ans:

What your interviewer is really trying to do with this question-beyond identifying any major red flags-is to gauge your self-awareness and honesty. So, "I can't meet a deadline to save my life As Engineering and Scientific Programmer" is not an option-but neither is "Nothing! I'm perfect!" Strike a balance by thinking of something that you struggle with but that you're working to improve. For example, maybe you've never been strong at public speaking, but you've recently volunteered to run meetings to help you be more comfortable when addressing a crowd.

[View All Answers](#)

Question - 31:

Are You a 'People' Person?

Ans:

Although it may be phrased a little differently, the gist of this question is clear:

Do you like being around people? If you don't, being a medical assistant isn't a good fit for you. After all, you'll be working directly with patients throughout the day. It helps a lot if you sincerely like interacting with them. While answering this question, make sure to mention that you like helping people too. This will drive home the point that you are a talented medical assistant and would be a valuable part of the team As Engineering and Scientific Programmer.

[View All Answers](#)

Question - 32:

How do you deal with conflict in the workplace As Engineering and Scientific Programmer?

Ans:

When people work together, conflict is often unavoidable because of differences in work goals and personal styles. Follow these guidelines for handling conflict in the workplace.

- * 1. Talk with the other person.
- * 2. Focus on behavior and events, not on personalities.
- * 3. Listen carefully.
- * 4. Identify points of agreement and disagreement.
- * 5. Prioritize the areas of conflict.
- * 6. Develop a plan to work on each conflict.
- * 7. Follow through on your plan.
- * 8. Build on your success.

[View All Answers](#)

Question - 33:

What is your greatest strength? How does it help you As Engineering and Scientific Programmer?

Ans:

One of my greatest strengths, and that I am a diligent worker... I care about the work getting done.. I am always willing to help others in the team.. Being patient helps me not jump to conclusions... Patience helps me stay calm when I have to work under pressure.. Being a diligent worker.. It ensures that the team has the same goals in accomplishing certain things.

[View All Answers](#)

Question - 34:

What motivates you to succeed?

Ans:

Your interviewer will likely want to know the reasons why you will remain motivated to do your best during your employment with the company As Engineering and Scientific Programmer. Perhaps you are interested in being challenged, but you may also have interest in being recognized for your hard work in the form of the number of sales you can attain. A great example answer for this question is "I always do my best in everything, including my job. I take pride in my success, and I also want the company for which I work to be successful. Being affiliated with a company that is known for its excellence is very important to me."

[View All Answers](#)

Question - 35:

Why should we select you not others?

Ans:

Here you need to give strong reasons to your interviewer to select you not others. Sell yourself to your interviewer in interview in every possible best way. You may say like I think I am really qualified for the position. I am a hard worker and a fast learner, and though I may not have all of the qualifications that you need, I know I can learn the job and do it well."

[View All Answers](#)

Question - 36:

Do you work well on a team? How would you define teamwork?

Ans:

I would define team work as getting the job done As Engineering and Scientific Programmer whether that means if I have to do more then the guy next to me as long as the work gets finished.

[View All Answers](#)

Question - 37:

If you have seven white socks and nine black socks in a drawer, how many socks do you have to pull out blindly in order to ensure that you have a matching pair?

Ans:

if the first one is one color (say, white), and the second one is the other color (black), then the third one, no matter what the color, will make a matching pair. (Sometimes you're not supposed to think that hard.)

[View All Answers](#)

Question - 38:

How would you be an asset to us As Engineering and Scientific Programmer?

Ans:

Think again about the job specification and the skills needed for this role As Engineering and Scientific Programmer. Have a paragraph prepared highlighting how you will be able to do the job and what you can bring to the team. It goes without saying that this paragraph should be positive.

[View All Answers](#)

Question - 39:

What other companies are you interviewing with?

Ans:

Companies ask this for a number of reasons, from wanting to see what the competition is for you to sniffing out whether you're serious about the industry. "Often the best approach is to mention that you are exploring a number of other similar options in the company's industry." It can be helpful to mention that a common characteristic of all the jobs you are applying to is the opportunity to apply some critical abilities and skills that you possess. For example, you might say 'I am applying for several positions with IT consulting firms where I can analyze client needs and translate them to development teams in order to find solutions to technology problems.'

[View All Answers](#)

Question - 40:

What does success mean to you?

Ans:

I am punctual, I always have excellent attendance on any job As Engineering and Scientific Programmer, I have a keen eye for both large and small details, and I am always finding ways to improve a process and shorten the length of time it takes to complete a project.

[View All Answers](#)

Question - 41:

Why are manhole covers round?

Ans:

This is a classic brainteaser, which was reportedly first asked by a Microsoft interviewer. Here's how to ""solve"" this brainteaser (remember to speak and reason out loud while solving this brainteaser): Why are manhole covers round? Could there be a structural reason? Why aren't manhole covers square? It would make it harder to fit with a cover. You'd have to rotate it exactly the right way.

The pipes below are also round, so fitting them might be easier, as might be making them. So many manhole covers are round because they don't need to be rotated. There are no corners to deal with. Also, a round manhole cover won't fall into a hole because it was rotated the wrong way, so it's safer. Looking at this, it seems corners are a problem. You can't cut yourself on a round manhole cover. And because it's round, it can be more easily transported. One person can roll it.

[View All Answers](#)

Question - 42:

Do you like being around people?

Ans:

People skills are a necessity for medical assistants. When answering this question, be sure to show that you enjoy interacting and working with others and that you also derive great enjoyment from helping others. This will show that you are a team player and that you would be a valuable team member As Engineering and

Scientific Programmer.

[View All Answers](#)

Question - 43:

What are your salary requirements As Engineering and Scientific Programmer?

Ans:

The #1 rule of answering this question is doing your research on what you should be paid by using site like Global Guideline. You'll likely come up with a range, and we recommend stating the highest number in that range that applies, based on your experience, education, and skills. Then, make sure the hiring manager knows that you're flexible. You're communicating that you know your skills are valuable, but that you want the job and are willing to negotiate.

[View All Answers](#)

Question - 44:

What is your greatest failure As Engineering and Scientific Programmer, and what did you learn from it?

Ans:

When I was in college, I took an art class to supplement my curriculum. I didn't take it very seriously, and assumed that, compared to my Engineering classes, it would be a walk in the park. My failing grades at midterm showed me otherwise. I'd even jeopardized my scholarship status. I knew I had to get my act together. I spent the rest of the semester making up for it, ended up getting a decent grade in the class. I learned that no matter what I'm doing, I should strive to do it to the best of my ability. Otherwise, it's not worth doing at all.

[View All Answers](#)

Question - 45:

Why do you feel you will excel at this job?

Ans:

This question presents an excellent opportunity for you to discuss your education, qualifications and personal traits. You might say something like "I studied property management as well as behavior during my college years and I have two years' experience in real estate.

I can gauge the homes or apartments in which clients will be interested based solely upon the needs of their families. Finally, my organizational skills will allow me to schedule appointments or showings confidently and arrive for them punctually." This shows your interviewer that you have all of the skills necessary to become successful not only for yourself, but also for your employer.

[View All Answers](#)

Question - 46:

What can you tell me about team work as part of the job As Engineering and Scientific Programmer?

Ans:

There is usually a team of staff nurses working in cooperation with each other. A team of nurses has to get along well and coordinate their actions, usually by dividing their responsibilities into sectors or specific activities. They help each other perform tasks requiring more than one person.

[View All Answers](#)

Question - 47:

How would your former employer describe you?

Ans:

In all likelihood, the interviewer will actually speak with your former employer so honesty is key. Answer as confidently and positively as possible and list all of the positive things your past employer would recognize about you. Do not make the mistake of simply saying you are responsible, organized, and dependable. Instead, include traits that are directly related to your work as a medical assistant, such as the ability to handle stressful situations and difficult patients, the way you kept meticulous records, and more.

[View All Answers](#)

Question - 48:

How many tennis balls can you fit into a limousine? 1,000? 10,000? 100,000? Seriously?

Ans:

Well, seriously, you might get asked brainteaser questions like these, especially in quantitative jobs. But remember that the interviewer doesn't necessarily want an exact number-he wants to make sure that you understand what's being asked of you, and that you can set into motion a systematic and logical way to respond. So, just take a deep breath, and start thinking through the math. (Yes, it's OK to ask for a pen and paper!)

[View All Answers](#)

Question - 49:

Suppose there are three light switches outside a room. Inside is a single light bulb, controlled by one of the three switches. You need to determine which switch operates the bulb. You can turn the switches on and off as many times as you wish (they are all off to begin with), but may only enter the room once. There is no one there to help you. The door to the room is closed, and there are no windows, so you cannot see inside. How can you discover which switch operates the bulb?

Ans:

Do the following steps:

* 1. Turn ON two switches, and leave one OFF.

* 2. Wait a few minutes.

* 3. Turn one switch from ON to OFF. One is now ON and two are OFF

* 4. Enter the room. - If the light is ON, it is controlled by the switch you left ON. - If the light bulb is OFF, touch it. If it is warm it is controlled by the switch you turned ON and OFF. If it is cold, it is controlled by the switch you never turned on.

[View All Answers](#)

**Question - 50:**

What makes a product successful?

Ans:

Basing on the monetization, these questions give you the chance to prove your personal try. Do not show extremely your optimism and pursue the unreality. Give your answers the reality.

It is useful to predict a five to ten- year- scenario of expectations in order to gain your targets that you set up and it is the period of time to see how your plans and targets are performed.

Therefore, the quality of the product and marketability of the mentioned industry need to be highlighted. This will help you to achieve the interviewer's attention and insurance to you personality and you can get the honest and long- term goals.

[View All Answers](#)

Question - 51:

If hired, how do you intend on making a difference with our company?

Ans:

Dedicate myself to learn everything about the new company that I can, look for ways and ideas that could improve, processes, safety, removing obstacles from the associates, I want to advance within the company.

[View All Answers](#)

Question - 52:

Did you get on well with your last manager?

Ans:

A dreaded question for many! When answering this question never give a negative answer. "I did not get on with my manager" or "The management did not run the business well" will show you in a negative light and reduce your chance of a job offer. Answer the question positively, emphasizing that you have been looking for a career progression. Start by telling the interviewer what you gained from your last job As Engineering and Scientific Programmer

[View All Answers](#)

Question - 53:

What is your biggest achievement?

Ans:

Quality work to be is about doing work to the require or set standard, which is very important when it comes to warehouse operations.

[View All Answers](#)

Question - 54:

What are three positive things your last boss would say about you?

Ans:

It's time to pull out your old performance appraisals and boss's quotes. This is a great way to brag about yourself through someone else's words:

"My boss has told me that I am the best designer he has ever had. He knows he can rely on me, and he likes my sense of humor."

[View All Answers](#)

Question - 55:

Why should the we hire you as this position As Engineering and Scientific Programmer?

Ans:

This is the part where you link your skills, experience, education and your personality to the job itself. This is why you need to be utterly familiar with the job description as well as the company culture. Remember though, it's best to back them up with actual examples of say, how you are a good team player.

[View All Answers](#)

Question - 56:

How much do you expect to get paid As Engineering and Scientific Programmer?

Ans:

For this be prepared and research salary to find out what similar positions are paying in your area before you go to the interview. Try to find this information out before giving your salary expectations. You can and should provide a range instead of an exact number. But again, don't say any numbers you're not comfortable with because if the employer offers you a salary at the lowest end of your range, you don't have much to negotiate with when it comes to getting a higher salary.

[View All Answers](#)

Question - 57:

Do you like to start personal relationships with other employees?

Ans:

Well, the right answer is yes and no. Good personal relations can improve the overall performance of a team. But on the other hand, you should not let your emotions to affect your decisions in work.

[View All Answers](#)

Question - 58:

Explain an idea that you have had and have then implemented in practice?

Ans:

Often an interview guide will outline the so-called 'STAR' approach for answering such questions; Structure the answer as a situation, task, action, and result: what the context was, what you needed to achieve, what you did, and what the outcome was as a result of your actions.

Question - 60:

What would your first 30, 60, or 90 days look like in this role As Engineering and Scientific Programmer?

Ans:

Start by explaining what you'd need to do to get ramped up. What information would you need? What parts of the company would you need to familiarize yourself with? What other employees would you want to sit down with? Next, choose a couple of areas where you think you can make meaningful contributions right away. (e.g., "I think a great starter project would be diving into your email marketing campaigns and setting up a tracking system for them.") Sure, if you get the job, you (or your new employer) might decide there's a better starting place, but having an answer prepared will show the interviewer where you can add immediate impact-and that you're excited to get started.

Question - 63:

Do you have good computer skills?

Ans:

It is becoming increasingly important for medical assistants to be knowledgeable about computers. If you are a long-time computer user with experience with different software applications, mention it. It is also a good idea to mention any other computer skills you have, such as a high typing rate, website creation, and more.

Question - 64:

What do you know about the company?

Ans:

Any candidate can read and regurgitate the company's "About" page. So, when interviewers ask this, they aren't necessarily trying to gauge whether you understand the mission-they want to know whether you care about it. Start with one line that shows you understand the company's goals, using a couple key words and phrases from the website, but then go on to make it personal. Say, "I'm personally drawn to this mission because..." or "I really believe in this approach because..." and share a personal example or two.

Question - 65:

How would your friends describe you?

Ans:

My friends would probably say that I'm extremely persistent - I've never been afraid to keep going back until I get what I want. When I worked as a program developer, recruiting keynote speakers for a major tech conference, I got one rejection after another - this was just the nature of the job. But I really wanted the big players - so I wouldn't take no for an answer. I kept going back to them every time there was a new company on board, or some new value proposition. Eventually, many of them actually said "yes" - the program turned out to be so great that we doubled our attendees from the year before. A lot of people might have given up after the first rejection, but it's just not in my nature. If I know something is possible, I have to keep trying until I get it.

Question - 67:

Describe a typical work week for this position As Engineering and Scientific Programmer?

Ans:

Interviewers expect a candidate for employment to discuss what they do while they are working in detail. Before you answer, consider the position As Engineering and Scientific Programmer you are applying for and how your current or past positions relate to it. The more you can connect your past experience with the job opening, the more successful you will be at answering the questions.

Question - 68:

Have you got any questions?

Ans:

This is your final opportunity to persuade the interviewer that you are the right candidate for the job. Now is not the time to ask questions about holidays, pay or pensions - all these things can be asked later when you get an offer of employment. Now is the time to ask about any reservations that the interviewer may have about your suitability for the role. You will then give yourself one last chance to persuade the interviewer that you are the right candidate for the job.

Example Thank you. I think we have covered everything. Before we finish the interview I would like to take the opportunity to ask if you have any reservations about my suitability for this role?

Question - 74:

How do you keep each member of the team involved and motivated?

Ans:

Many managers mistakenly think that money is the prime motivator for their employees. However, according to surveys by several different companies, money is consistently ranked five or lower by most employees. So if money is not the best way to motivate your team, what is?

Employees' three most important issues according to employees are:

- * Respect
- * A sense of accomplishment
- * Recognition

Question - 75:

Are you planning to continue your studies and training As Engineering and Scientific Programmer?

Ans:

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

Question - 76:

What do you think we could do better or differently?

Ans:

This is a common one at startups. Hiring managers want to know that you not only have some background on the company, but that you're able to think critically about it and come to the table with new ideas. So, come with new ideas! What new features would you love to see? How could the company increase conversions? How could customer service be improved? You don't need to have the company's four-year strategy figured out, but do share your thoughts, and more importantly, show how your interests and expertise would lend themselves to the job.
