Director chemistry Interview Questions And Answers Guide.

Question - 1:

What have you done to improve your skills over the past year As Director chemistry?

Ans:

You'll want to be prepared with some very specific examples of what you've done over the last year and what you're currently doing to improve your professional knowledge and skill set as well as anything else you're doing that shows self-improvement.

[View All Answers](#)

Question - 2:

What do you know about our company?

Ans:

You always want to make sure that you're pretty familiar with the company that you're interviewing with. Nothing looks worse than a candidate who knows nothing about the company they say they're interested in working for. Find out everything you can about the company, its culture and its goals. You will also want to know how the company is positioned in its market as well as who its major competitors are.

[View All Answers](#)

Question - 3:

What are your strengths As Director chemistry?

Ans:

This is one of the most common questions you will be asked. Give an answer relevant to the skills and qualities relevant to the position you are applying to. The interviewer is trying to find if your strengths match the job. For example, if you are applying for a job As Director chemistry where accuracy is an important issue, one of your strengths could be that you have an eye for detail. It may be useful to find different words to describe similar attributes and qualities in order to avoid repetition.

[View All Answers](#)

Question - 4:

Tell me about a time when you helped resolve a dispute between others?

Ans:

Be sure to discuss a very specific example. Tell the interviewer what methods you used to solve the problem without focusing on the details of the problem.

[View All Answers](#)

Question - 5:

Tell us about a suggestion you have made that has benefited an organization you've worked for?

Ans:

This is another opportunity to show the interviewer what you're capable of so make sure to be prepared for this type of question. Have an example ready and make sure it's an example of a suggestion you've made that was accepted and that has a positive influence. If you can come up with an example that relates to the position you're applying for that would be even better.

[View All Answers](#)

Question - 6:

What has been your biggest professional disappointment?

Ans:

When discussing a professional disappointment, make sure to discuss a scenario you could not control. Be positive about the experience and accept personal responsibility where applicable.

[View All Answers](#)

Question - 7:

What have you done to improve your knowledge As Director chemistry in the last year?

Ans:

Try to include improvement activities that relate to the job As Director chemistry. A wide variety of activities can be mentioned as positive self-improvement. Have some good ones handy to mention.

[View All Answers](#)

Question - 8:

How do you stay organized?

Ans:

By maintaining proper routine every day. Putting my strongest points with my weakness. High priority always comes first As Director chemistry.

[View All Answers](#)

Question - 9:

What is your biggest weakness As Director chemistry?

Ans:

No one likes to answer this question because it requires a very delicate balance. You simply can't lie and say you don't have one; you can't trick the interviewer by offering up a personal weakness As Director chemistry that is really a strength ("Sometimes, I work too much and don't maintain a work-life balance."); and you shouldn't be so honest that you throw yourself under the bus ("I'm not a morning person so I'm working on getting to the office on time.")

[View All Answers](#)

Question - 10:

How would your boss and co-workers describe you?

Ans:

First of all, be honest (remember, if you get this job, the hiring manager will be calling your former bosses and co-workers!). Then, try to pull out strengths and traits you haven't discussed in other aspects of the interview As Director chemistry, such as your strong work ethic or your willingness to pitch in on other projects when needed.

[View All Answers](#)

Question - 11:

Why did you leave your last job As Director chemistry?

Ans:

Regardless of why you left your last job make sure to stay positive. Always smile and focus on the positive reason such you were seeking the opportunity to expand your career opportunities, your interest in working with a new firm that provided greater opportunity, you desired to work in a new location, etc. Don't reference previous job problems or differences with management that caused you to leave. If you stay positive, your answer may help you. If you're negative, you will likely decrease your chances of getting the job for which you're interviewing.

[View All Answers](#)

Question - 12:

Have you ever you have been in a position As Director chemistry where you've had to fire someone? How did you feel about that experience?

Ans:

Be very thoughtful about your answer. This is a very serious matter for most companies and requires a very serious answer. You need to express that you will do it when it is the right thing to do but you don't want to give the impression that you're callus to the process. Don't forget that firing is not the same as laying someone off - it typically is for the direct benefit of the company.

[View All Answers](#)

Question - 13:

What is your dream job?

Ans:

There is almost no good answer to this question, so don't be specific. If you tell the interviewer that the job you're applying for with his/her company is the perfect job you may lose credibility if you don't sound believable (which you probably won't if you're not telling the truth.) If you give the interviewer some other job the interviewer may get concerned that you'll get dissatisfied with the position if you're hired. Again, don't be specific. A good response could be, "A job where my work ethic and abilities are recognized and I can make a meaningful difference to the organization."

[View All Answers](#)

Question - 14:

What has disappointed you about a previous job?

Ans:

Again, this question could get you in trouble so tread carefully. Some good answers might be that your previous job didn't provide any room for growth, that you were laid off due to a mandatory reduction in staff, that they closed their office in your state and required you to relocate, etc. Make sure not to mention anything negative about the people you worked with, the company in general or the job itself.

[View All Answers](#)

Question - 15:

Explain what are your weaknesses As Director chemistry?

Ans:

Red flags: This is the peanut butter to the previous question's jelly. Again, everyone should expect it, so it's a bad sign if someone seems totally unprepared, or gives a stock answer like, "I'm a perfectionist." Also, of course, candidates crazy enough to blurt out some horrible personality trait should go in the red flagged pile.

Good answer: Candidates should talk about a real weakness they've been working on improving. For instance, they're not good at public speaking, but they've been taking a course to help them improve. Or maybe they feel that they're easily distracted when working online, but have installed software that helps them stay on task. Answers like these show a desire for improvement, self awareness and discipline.

[View All Answers](#)

Question - 16:

How do you think you might fit this position As Director chemistry?

Ans:

An important part of research before the interview is what the company does and how the job role relates to that. This includes the company philosophy and working methods. Questions such as this seek to find out how a candidate will fit into the organisation As Director chemistry. Answer positively; including practical examples of how you anticipate you would perform in the new role.

[View All Answers](#)

Question - 17:

Do you think you are overqualified for this position As Director chemistry?

Ans:

No matter your previous job experience or educational background, be sure to tell the interviewer you have the knowledge and skills to successfully execute the job responsibilities.

[View All Answers](#)

Question - 18:

What motivates you?

Ans:

I've always been motivated by the challenge - in my last role, I was responsible for training our new recruits and having a 100% success rate in passing scores. I know that this job is very fast-paced and I'm more than up for the challenge. In fact, I thrive on it.

[View All Answers](#)

Question - 19:

Top 13 Situational Interview Questions As Director chemistry:

Ans:

Situational interviews As Director chemistry are similar to behavioral interview questions - but they are focused on the future, and ask hypothetical questions, whereas behavioral interview questions look at the past.

The advantage is that employers can put all candidates in the same hypothetical situations, and compare their answers.

1. What would you do if you made a strong recommendation in a meeting, but your colleagues decided against it?
2. How would you handle it if your team resisted a new idea or policy you introduced?
3. How would you handle it if the priorities for a project you were working on were suddenly changed?
4. What would you do if the work of an employee you managed didn't meet expectations?
5. What would you do if an important task was not up to standard, but the deadline to complete it had passed?
6. What steps would you take to make an important decision on the job As Director chemistry?
7. How would you handle a colleague you were unable to form a positive relationship with?
8. What would you do if you disagreed with the way a manager wanted you to handle a problem?
9. What would you do if you were assigned to work with a difficult client As Director chemistry?
10. What would you do if you worked hard on a solution to a problem, and your solution was criticized by your team?
11. How would you handle working closely with a colleague who was very different from you?
12. You're working on a key project that you can't complete, because you're waiting on work from a colleague. What do you do?
13. You realize that an early mistake in a project is going to put you behind deadline. What do you do?

[View All Answers](#)

Question - 20:

What's your management style?

Ans:

The best managers are strong but flexible, and that's exactly what you want to show off in your answer. (Think something like, "While every situation and every team member requires a bit of a different strategy, I tend to approach my employee relationships as a coach...") Then, share a couple of your best managerial moments, like when you grew your team from five to 15 or coached an underperforming employee to become the company's top employee.

[View All Answers](#)

Question - 21:

What do you consider to be your greatest strength?

Ans:

There isn't any right answer. Just make sure to make your response positive and true. A few good examples include: Your ability to solve complex problems, Your ability to work well on a team, Your ability to shine under pressure, Your ability to focus in chaotic situations, Your ability to prioritize and organize, Your ability to cut through the fluff to identify the real issues, Your ability to influence other positively. If your strength relates to the position in question that will be more beneficial - but again be honest, don't create a strength for yourself just because you think it will sound good.

[View All Answers](#)

**Question - 22:**

Tell me about a time when you had to give someone difficult feedback As Director chemistry?

Ans:

By asking this question, your interviewer hopes to learn whether you can communicate effectively, address issues in the workplace and motivate others during difficult times. Giving negative feedback requires honesty, thoughtfulness and tact. Answering this question well can help show an interviewer that you would be a good fit for a managerial position or a position that involves working closely with others.

[View All Answers](#)

Question - 23:

What makes a product successful?

Ans:

Basing on the monetization, these questions give you the chance to prove your personal try. Do not show extremely your optimism and pursue the unreality. Give your answers the reality.

It is useful to predict a five to ten- year- scenario of expectations in order to gain your targets that you set up and it is the period of time to see how your plans and targets are performed.

Therefore, the quality of the product and marketability of the mentioned industry need to be highlighted. This will help you to achieve the interviewer's attention and insurance to you personality and you can get the honest and long- term goals.

[View All Answers](#)

Question - 24:

Why do you want to join our company?

Ans:

This is a question that is aimed at finding out whether you know enough about the company and the basic market. The best way to answer this question is to do some research on the company and highlight its positive points.

[View All Answers](#)

Question - 25:

How would your former employer describe you?

Ans:

In all likelihood, the interviewer will actually speak with your former employer so honesty is key. Answer as confidently and positively as possible and list all of the positive things your past employer would recognize about you. Do not make the mistake of simply saying you are responsible, organized, and dependable. Instead, include traits that are directly related to your work as a medical assistant, such as the ability to handle stressful situations and difficult patients, the way you kept meticulous records, and more.

[View All Answers](#)

Question - 26:

Why are manhole covers round?

Ans:

This is a classic brainteaser, which was reportedly first asked by a Microsoft interviewer. Here's how to ""solve"" this brainteaser (remember to speak and reason out loud while solving this brainteaser): Why are manhole covers round? Could there be a structural reason? Why aren't manhole covers square? It would make it harder to fit with a cover. You'd have to rotate it exactly the right way.

The pipes below are also round, so fitting them might be easier, as might be making them. So many manhole covers are round because they don't need to be rotated. There are no corners to deal with. Also, a round manhole cover won't fall into a hole because it was rotated the wrong way, so it's safer. Looking at this, it seems corners are a problem. You can't cut yourself on a round manhole cover. And because it's round, it can be more easily transported. One person can roll it.

[View All Answers](#)

Question - 27:

Do you like being around people?

Ans:

People skills are a necessity for medical assistants. When answering this question, be sure to show that you enjoy interacting and working with others and that you also derive great enjoyment from helping others. This will show that you are a team player and that you would be a valuable team member As Director chemistry.

[View All Answers](#)

Question - 28:

How do you imagine a typical day of an employee in our company As Director chemistry?

Ans:

Just do not say that you imagine to only walk and watch what people do. Rather try to show them your attention to details and proactive attitude to job. Mention that you would try to observe the problems, weaknesses as well as opportunities to improve the results and take measures according to it.

[View All Answers](#)

Question - 29:

Do you work well on a team? How would you define teamwork?

Ans:

I would define team work as getting the job done As Director chemistry whether that means if I have to do more then the guy next to me as long as the work gets finished.

[View All Answers](#)

Question - 30:

If hired, how do you intend on making a difference with our company?

Ans:

Dedicate myself to learn everything about the new company that I can, look for ways and ideas that could improve, processes, safety, removing obstacles from the associates, I want to advance within the company.

[View All Answers](#)

Question - 31:

What are your salary requirements As Director chemistry?

Ans:

The #1 rule of answering this question is doing your research on what you should be paid by using site like Global Guideline. You'll likely come up with a range, and we recommend stating the highest number in that range that applies, based on your experience, education, and skills. Then, make sure the hiring manager knows that you're flexible. You're communicating that you know your skills are valuable, but that you want the job and are willing to negotiate.

[View All Answers](#)

Question - 32:

How would you describe your approach to Director chemistry?

Ans:

In more general terms, a question such as this gives a candidate the opportunity to talk about their professional philosophy and skills. While the question is general in nature, the best answers are usually quite specific, picking one or two points and exemplifying them with instances from personal history.

[View All Answers](#)

Question - 33:

What is it about this position As Director chemistry that attracts you the most?

Ans:

Use your knowledge of the job description to demonstrate how you are a suitable match for the role.

[View All Answers](#)

Question - 34:

How do you deal with pressure or stressful situations?

Ans:

Choose an answer that shows that you can meet a stressful situation head-on in a productive, positive manner and let nothing stop you from accomplishing your goals. A great approach is to talk through your go-to stress-reduction tactics (making the world's greatest to-do list, stopping to take 10 deep breaths), and then share an example of a stressful situation you navigated with ease.

[View All Answers](#)

Question - 35:

Why were you fired?

Ans:

OK, if you get the admittedly much tougher follow-up question as to why you were let go (and the truth isn't exactly pretty), your best bet is to be honest (the job-seeking world is small, after all). But it doesn't have to be a deal-breaker. Share how you've grown and how you approach your job and life now as a result. If you can position the learning experience as an advantage for this next job, even better.

[View All Answers](#)

Question - 36:

How do you deal with conflict in the workplace As Director chemistry?

Ans:

When people work together, conflict is often unavoidable because of differences in work goals and personal styles. Follow these guidelines for handling conflict in the workplace.

- * 1. Talk with the other person.
- * 2. Focus on behavior and events, not on personalities.
- * 3. Listen carefully.
- * 4. Identify points of agreement and disagreement.
- * 5. Prioritize the areas of conflict.
- * 6. Develop a plan to work on each conflict.
- * 7. Follow through on your plan.
- * 8. Build on your success.

[View All Answers](#)

Question - 37:

Why are you leaving the present company?

Ans:

According to me we can not grow in the field without taking more responsibilities and risks and also we can't enhance our team leading capabilities, managerial skills without expose to wide range of people.

[View All Answers](#)

Question - 38:

What is your greatest failure As Director chemistry, and what did you learn from it?

Ans:

When I was in college, I took an art class to supplement my curriculum. I didn't take it very seriously, and assumed that, compared to my Engineering classes, it would be a walk in the park. My failing grades at midterm showed me otherwise. I'd even jeopardized my scholarship status. I knew I had to get my act together. I spent the rest of the semester making up for it, ended up getting a decent grade in the class. I learned that no matter what I'm doing, I should strive to do it to the best of my ability. Otherwise, it's not worth doing at all.

[View All Answers](#)

Question - 39:

How many tennis balls can you fit into a limousine? 1,000? 10,000? 100,000? Seriously?

Ans:

Well, seriously, you might get asked brainteaser questions like these, especially in quantitative jobs. But remember that the interviewer doesn't necessarily want an exact number-he wants to make sure that you understand what's being asked of you, and that you can set into motion a systematic and logical way to respond. So, just take a deep breath, and start thinking through the math. (Yes, it's OK to ask for a pen and paper!)

[View All Answers](#)

Question - 40:

Are You a 'People' Person?

Ans:

Although it may be phrased a little differently, the gist of this question is clear:

Do you like being around people? If you don't, being a medical assistant isn't a good fit for you. After all, you'll be working directly with patients throughout the day. It helps a lot if you sincerely like interacting with them. While answering this question, make sure to mention that you like helping people too. This will drive home the point that you are a talented medical assistant and would be a valuable part of the team As Director chemistry.

[View All Answers](#)

Question - 41:

Explain me about a challenge or conflict you've faced at work As Director chemistry, and how you dealt with it?

Ans:

In asking this interview question, your interviewer wants to get a sense of how you will respond to conflict. Anyone can seem nice and pleasant in a job interview, but what will happen if you're hired?. Again, you'll want to use the S-T-A-R method, being sure to focus on how you handled the situation professionally and productively, and ideally closing with a happy ending, like how you came to a resolution or compromise.

[View All Answers](#)

Question - 42:

What can you tell me about team work as part of the job As Director chemistry?

Ans:

There is usually a team of staff nurses working in cooperation with each other. A team of nurses has to get along well and coordinate their actions, usually by dividing their responsibilities into sectors or specific activities. They help each other perform tasks requiring more than one person.

[View All Answers](#)

Question - 43:

How would you be an asset to us As Director chemistry?

Ans:

Think again about the job specification and the skills needed for this role As Director chemistry. Have a paragraph prepared highlighting how you will be able to do the job and what you can bring to the team. It goes without saying that this paragraph should be positive.

[View All Answers](#)

Question - 44:

Did you get on well with your last manager?

Ans:

A dreaded question for many! When answering this question never give a negative answer. "I did not get on with my manager" or "The management did not run the business well" will show you in a negative light and reduce your chance of a job offer. Answer the question positively, emphasizing that you have been looking for a career progression. Start by telling the interviewer what you gained from your last job As Director chemistry

[View All Answers](#)

Question - 45:

How do you keep each member of the team involved and motivated?

Ans:

Many managers mistakenly think that money is the prime motivator for their employees. However, according to surveys by several different companies, money is

consistently ranked five or lower by most employees. So if money is not the best way to motivate your team, what is? Employees' three most important issues according to employees are:

- * Respect
- * A sense of accomplishment
- * Recognition

[View All Answers](#)

Question - 46:

What features of your previous jobs have you disliked?

Ans:

It's easy to talk about what you liked about your job in an interview, but you need to be careful when responding to questions about the downsides of your last position. When you're asked at a job interview about what you didn't like about your previous job, try not to be too negative. You don't want the interviewer to think that you'll speak negatively about this job or the company should you eventually decide to move on after they have hired you.

[View All Answers](#)

Question - 47:

What is your greatest weakness As Director chemistry? What are you doing to improve it?

Ans:

I believe my biggest weakness As Director chemistry is wanting to help anyone I can help. What I mean is I am willing to take on task that are not my job. I want to learn all I can. However, that has helped me get promoted or even asked to help in times of need in other department. I have been know as the "go to person" when help is needed.

[View All Answers](#)

Question - 48:

Are you planning to continue your studies and training As Director chemistry?

Ans:

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

[View All Answers](#)

Question - 49:

How many square feet of pizza are eaten in the United States each month?

Ans:

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

[View All Answers](#)

Question - 50:

What was the most important task you ever had?

Ans:

There are two common answers to this question that do little to impress recruiters:

* 'I got a 2.1'

* 'I passed my driving test'

No matter how proud you are of these achievements, they don't say anything exciting about you. When you're going for a graduate job, having a degree is hardly going to make you stand out from the crowd and neither is having a driving licence, which is a requirement of many jobs.

[View All Answers](#)

Question - 51:

Do you have any question regarding this job As Director chemistry?

Ans:

Never ask Salary, perks, leave, place of posting, etc. regarded questions. Try to ask more about the company to show how early you can make a contribution to your organization like. "Sir, with your kind permission I would like to know more about induction and developmental programs?" OR Sir, I would like to have my feedback, so that I can analyze and improve my strengths and rectify my shortcomings.

[View All Answers](#)

Question - 52:

How do you handle stressful situations?

Ans:

By remaining calm, weighing out all my options and executing a plan to get the situation resolve .

[View All Answers](#)

Question - 53:

Give me an example of an emergency situation that you faced. How did you handle it?

Ans:

There was a time when one of my employers faced the quitting of a manager in another country. I was asked to go fill in for him while they found a replacement and stay to train that person. I would be at least 30 days. I quickly accepted because I knew that my department couldn't function without me.

[View All Answers](#)

Question - 54:

What are your salary expectations As Director chemistry?

Ans:

This question is like a loaded gun, tricky and dangerous if you're not sure what you are doing. It's not uncommon for people to end up talking salary before really selling their skills, but knowledge is power as this is a negotiation after all. Again, this is an area where doing your research will be helpful as you will have an understanding of average salary.

One approach is asking the interviewer about the salary range, but to avoid the question entirely, you can respond that money isn't a key factor and you're goal is to advance in your career. However, if you have a minimum figure in mind and you believe you're able to get it, you may find it worth trying.

[View All Answers](#)

Question - 55:

What problems have you encountered at work?

Ans:

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.

[View All Answers](#)

Question - 56:

How would you rate your communication and interpersonal skills for this job As Director chemistry?

Ans:

These are important for support workers. But they differ from the communication skills of a CEO or a desktop support technician. Communication must be adapted to the special ways and needs of the clients. Workers must be able to not only understand and help their clients, but must project empathy and be a warm, humane presence in their lives.

[View All Answers](#)

Question - 57:

Why do you want to work As Director chemistry for this organisation?

Ans:

Being unfamiliar with the organisation will spoil your chances with 75% of interviewers, according to one survey, so take this chance to show you have done your preparation and know the company inside and out. You will now have the chance to demonstrate that you've done your research, so reply mentioning all the positive things you have found out about the organisation and its sector etc. This means you'll have an enjoyable work environment and stability of employment etc - everything that brings out the best in you.

[View All Answers](#)

Question - 58:

Do you work well under pressure?

Ans:

Yes.. When it comes down to the wire, the best thing I can to remain focused, have some flexibility, and understand priorities.. Giving them attention in the order they are needed.

[View All Answers](#)

Question - 59:

Do you have any questions for me?

Ans:

Good interview questions to ask interviewers at the end of the job interview include questions on the company growth or expansion, questions on personal development and training and questions on company values, staff retention and company achievements.

[View All Answers](#)

Question - 60:

What are three positive things your last boss would say about you?

Ans:

It's time to pull out your old performance appraisals and boss's quotes. This is a great way to brag about yourself through someone else's words: "My boss has told me that I am the best designer he has ever had. He knows he can rely on me, and he likes my sense of humor."

Question - 61:

What kind of salary do you need As Director chemistry?

Ans:

This is a loaded question and a nasty little game that you will probably lose if you answer first. So, do not answer it. Instead, say something like, that's a tough question. Can you tell me the range for this position? In most cases, the interviewer, taken off guard, will tell you. If not, say that it can depend on the details of the job. Then give a wide range.

Question - 62:

What's a time you exercised leadership?

Ans:

Depending on what's more important for the the role, you'll want to choose an example that showcases your project management skills (spearheading a project from end to end, juggling multiple moving parts) or one that shows your ability to confidently and effectively rally a team. And remember: "The best stories include enough detail to be believable and memorable,". Show how you were a leader in this situation and how it represents your overall leadership experience and potential.

Question - 63:

What do you think is your greatest weakness?

Ans:

Don't say anything that could eliminate you from consideration for the job. For instance, "I'm slow in adapting to change" is not a wise answer, since change is par for the course in most work environments. Avoid calling attention to any weakness that's one of the critical qualities the hiring manager is looking for. And don't try the old "I'm a workaholic," or "I'm a perfectionist."

Question - 65:

What is your desired salary As Director chemistry?

Ans:

Bad Answer: Candidates who are unable to answer the question, or give an answer that is far above market. Shows that they have not done research on the market rate, or have unreasonable expectations.

Good answer: A number or range that falls within the market rate and matches their level of mastery of skills required to do the job.

Question - 67:

Why are you leaving your current job?

Ans:

This is a toughie, but one you can be sure you'll be asked. Definitely keep things positive-you have nothing to gain by being negative about your past employers. Instead, frame things in a way that shows that you're eager to take on new opportunities and that the role you're interviewing for is a better fit for you than your current or last position. For example, "I'd really love to be part of product development from beginning to end, and I know I'd have that opportunity here." And if you were let go? Keep it simple: "Unfortunately, I was let go," is a totally OK answer.
