Question - 67:

What would your first 30, 60, or 90 days look like in this role As Space Sciences Director?

Ans:

Start by explaining what you'd need to do to get ramped up. What information would you need? What parts of the company would you need to familiarize yourself with? What other employees would you want to sit down with? Next, choose a couple of areas where you think you can make meaningful contributions right away. (e.g., "I think a great starter project would be diving into your email marketing campaigns and setting up a tracking system for them.") Sure, if you get the job, you (or your new employer) might decide there's a better starting place, but having an answer prepared will show the interviewer where you can add immediate impact-and that you're excited to get started.

Give an example of a time you successfully worked As Space Sciences Director on a team?

Ans:

On the whole I prefer to stick to doing what I'm told rather than setting myself up to fail by doing things off my own bat. She thought it was an interesting idea but nothing ever came of it.

**Question - 69:**

What types of personalities do you work with best?

Ans:

In the past, I have found it difficult to work with others who see themselves as better than others, who can take criticism, and who refuse to work with others. I have found it challenging to work with them b/c I am a team oriented person who feels the importance of working together over the needs of the individual especially in a learning environment.

Question - 70:

What do you think is your greatest weakness?

Ans:

Don't say anything that could eliminate you from consideration for the job. For instance, "I'm slow in adapting to change" is not a wise answer, since change is par for the course in most work environments. Avoid calling attention to any weakness that's one of the critical qualities the hiring manager is looking for. And don't try the old "I'm a workaholic," or "I'm a perfectionist."

Question - 71:

How would your friends describe you?

Ans:

My friends would probably say that I'm extremely persistent - I've never been afraid to keep going back until I get what I want. When I worked as a program developer, recruiting keynote speakers for a major tech conference, I got one rejection after another - this was just the nature of the job. But I really wanted the big players - so I wouldn't take no for an answer. I kept going back to them every time there was a new company on board, or some new value proposition. Eventually, many of them actually said "yes" - the program turned out to be so great that we doubled our attendees from the year before. A lot of people might have given up after the first rejection, but it's just not in my nature. If I know something is possible, I have to keep trying until I get it.

Question - 72:

Why are you leaving your current job?

Ans:

This is a toughie, but one you can be sure you'll be asked. Definitely keep things positive-you have nothing to gain by being negative about your past employers. Instead, frame things in a way that shows that you're eager to take on new opportunities and that the role you're interviewing for is a better fit for you than your current or last position. For example, "I'd really love to be part of product development from beginning to end, and I know I'd have that opportunity here." And if you were let go? Keep it simple: "Unfortunately, I was let go," is a totally OK answer.
