About Interview Questions Answers

Interview Questions Answers . ORG is an interview preparation guide of thousands of Job Interview Questions And Answers, Job Interviews are always stressful even for job seekers who have gone on countless interviews. The best way to reduce the stress is to be prepared for your job interview. Take the time to review the standard interview questions you will most likely be asked. These interview questions and answers on System Analysis will help you strengthen your technical skills, prepare for the interviews and quickly revise the concepts.

If you find any **question or answer** is incorrect or incomplete then you can **submit your question or answer** directly with out any registration or login at our website. You just need to visit [System Analysis Interview Questions And Answers](#) to add your answer click on the *Submit Your Answer* links on the website; with each question to post your answer, if you want to ask any question then you will have a link *Submit Your Question*; that's will add your question in System Analysis category. To ensure quality, each submission is checked by our team, before it becomes live. This [System Analysis Interview preparation PDF](#) was generated at **Wednesday 29th November, 2023**

You can follow us on FaceBook for latest Jobs, Updates and other interviews material.

System Analysis Interview Questions And Answers Guide.

Question - 1:

Would you provide the documentation required by the system analyst?

Ans:

Describe the various documentations you keep as part of your daily responsibilities. Analysts document problems as well as the solutions required or implemented. They make records of inventory and maintain system documentation.

[View All Answers](#)

Question - 2:

Tell me what is your technical expertise in this field?

Ans:

Be specific about what you actually have training and experience in. But generally speaking, system analysts are usually experts in computer systems, hardware platforms, and programming techniques.

Question - 3:

Structured design produces computer programs that are:

- A. easily
- B. maintained
- C. easily understood
- D. both (a) and (b)

Ans:

D. both (a) and (b)

Question - 4:

A system design is said to be functionally modular if:

- A. the system is able to handle all the function of the application
- B. each module performs a specific function and can be developed relatively independently by programmers
- C. the system makes extensive use of function. keys for maximum user assistance
- D. the system is developed using structured programming through COBOL or PASCAL
- E. None of the above

Ans:

B. each module performs a specific function and can be developed relatively independently by programmers

Question - 5:

Which of the following tools is not used in modeling the new system?

- A. decision tables
- B. data dictionary
- C. data-flow diagrams
- D. All of the above

Ans:

D. All of the above

[View All Answers](#)

Question - 6:

Nassi - Schneider charts:

- A. are being replaced by flowcharts

- B. often describe overlapping control structures
- C. are made up of boxes within boxes
- D. both (a) and (c)

Ans:

- C. are made up of boxes within boxes

Question - 7:

The first step in systems Development Life Cycle is:

- A. database design
- B. system design
- C. preliminary investigation and analysis
- D. graphical user interface
- E. None of the above

Ans:

- C. preliminary investigation and analysis

[View All Answers](#)

Question - 8:

The longest method of conversion is:

- A. direct
- B. parallel
- C. phased
- D. pilot
- E. None of the above

Ans:

- A. direct

Question - 9:

Back-up procedure helps in:

- A. restoring the operation whenever there is a disk failure
- B. restoring both application and system software whenever there is disk corruption.
- C. restoring the data files whenever there is a system crash
- D. All of the above

Ans:

- D. All of the above

[View All Answers](#)

Question - 10:

Which are the tools not used for System Analysis:

- A. System - test data
- B. Decision table
- C. Data Flow Diagram
- D. Flowcharts
- E. None of the above

Ans:

- A. System - test data

[View All Answers](#)

Question - 11:

The rule(s) to follow in constructing decision tables is (are):

- A. a decision should be given a name
- B. the logic of the table is independent of the sequence in which conditions rules are written, but the action takes place in the order in which the events occur.
- C. standardized language must be used consistently.
- D. All of the above
- E. None of the above

Ans:

- D. All of the above

Question - 12:

Management's decision to rent a computer system may be based upon:

- A. tax advantages
- B. desire to avoid a large one-time payment
- C. operational flexibility in changing hardware
- D. All of the above
- E. None of the above

Ans:

D. All of the above

Question - 13:

Indexed-Sequential organization:

- A. means storing records in contiguous blocks according to a key.
- B. Stores records sequentially but uses an index to locate records
- C. uses an index for each key type
- D. has records placed randomly throughout the file
- E. None of the above

Ans:

B. Stores records sequentially but uses an index to locate records

Question - 14:

In the system concepts, term Integration:

- A. implies structure and order
- B. refers to the manner in which each component functions with other components of the system.
- C. means that parts of the computer system depend on one another.
- D. refers to the holism of systems
- E. None of the above

Ans:

D. refers to the holism of systems

Question - 15:

Which of the following is not a characteristic of good test data:

- A. users do not participate at this preliminary stage
- B. should be comprehensive
- C. every statement should be executed
- D. All of the above
- E. None of the above

Ans:

A. users do not participate at this preliminary stage

Question - 16:

On a systems flowchart, the online manual keeping of input data is identified by using the:

- A. online storage symbol
- B. Online keyboard symbol
- C. keeping operation symbols
- D. manual operation symbols
- E. None of the above

Ans:

B. Online keyboard symbol

Question - 18:

Which of the following appropriately explains the desirable characteristic of good system design?

- A. Modular approach
- B. Proper documentation
- C. Conversion
- D. Long discussions
- E. None of the above

Ans:

A. Modular approach

Question - 20:

Data manipulation language (DML):

- A. describes how data are structured in the data base
- B. specifies for the DBMS what is required; the techniques used to process data
- C. determine how data must be structured to produce the user's view
- D. All of the above
- E. None of the above

Ans:

- B. specifies for the DBMS what is required; the techniques used to process data

Question - 22:

During the system study, the executive vice-president and the other managers exercise their responsibility of:

- A. planning
- B. controlling
- C. directing
- D. organizing
- E. None of the above

Ans:

- B. controlling

[View All Answers](#)

Question - 23:

Elapsed time, between initiating a query and receiving a response is called:

- A. response time
- B. waiting time
- C. processing time
- D. Turnaround time
- E. None of the above

Ans:

- D. Turnaround time

[View All Answers](#)

Question - 24:

An appraisal, of a system's performance after it has been installed, is called system:

- A. planning
- B. review
- C. maintenance
- D. batch Processing
- E. None of the above

Ans:

- B. review

**Question - 25:**

A branch office, location or other data processing centers, where a newly developed system is used under normal operating conditions for several months, to test it, is called:

- A. beta test data
- B. alpha test data
- C. string test data
- D. system test data
- E. None of the above

Ans:

- A. beta test data

[View All Answers](#)

Question - 26:

A _____ is an outline of a process that keeps develop successful information systems:

- A. System Development Life Cycle
- B. CASE tool
- C. Phased Conversion
- D. Success Factors
- E. Move of the above

Ans:

- A. System Development Life Cycle

Question - 27:

On the feasibility committee, department representatives serve as:

- A. direct users of the new system
- B. liaison to their departments
- C. ready sources of information
- D. All of the above
- E. None of the above

Ans:

- D. All of the above

[View All Answers](#)

Question - 28:

A decision table facilitates conditions to be related to:

- A. actions
- B. programs
- C. tables
- D. operation
- E. None of the above

Ans:

- A. actions

[View All Answers](#)

Question - 29:

Top-down programming is:

- A. a group of related fields
- B. a map of the programmer's view of the data
- C. an approach in which the top module is first tested then program modules are added from the highest level to the lowest level
- D. a series or group of components that perform one or more operations of a more complex system
- E. None of the above

Ans:

- C. an approach in which the top module is first tested then program modules are added from the highest level to the lowest level

Question - 30:

Decision tree uses:

- A. pictorial depiction of alternate conditions
- B. nodes and branches
- C. consequences of various depicted alternates
- D. All of the above
- E. None of the above

Ans:

- D. All of the above

[View All Answers](#)

Question - 31:

Problem analysis is done during:

- A. system design phase
- B. systems analysis phase
- C. before system test
- D. All of the above
- E. None of the above

Ans:

- B. systems analysis phase

[View All Answers](#)

Question - 32:

The mistake, committed by interchanging two digits in a numeric held, during data entry, is called:

- A. transposition error
- B. transcription error
- C. Beta testing error
- D. Alpha testing error
- E. None of the above

Ans:

- A. transposition error

[View All Answers](#)

Question - 33:

During the maintenance phase:

- A. System requirements are established
- B. System analysis is carried out
- C. Programs are tested
- D. All of the above
- E. None of the above

Ans:

- E. None of the above

[View All Answers](#)

Question - 34:

In phase 1 of the system development life cycle, which of the following aspects are usually analyzed?

- A. outputs
- B. input (transactions)
- C. controls
- D. All of the above
- E. None of the above

Ans:

- D. All of the above

[View All Answers](#)

Question - 35:

Data Definition Language (DDL):

- A. describes how data are structured in the data base
- B. specifies for the DBMS what is required; the techniques used to process data
- C. determine how data must be structured to produce the user's view
- D. All of the above

Ans:

- A. describes how data are structured in the data base

[View All Answers](#)

Question - 36:

Positive testing is:

- A. running the system with line data by the actual user
- B. making sure that the new programs do in fact process certain transactions according to Specifications
- C. is checking the logic of one or more programs in the candidate system
- D. testing changes made in an existing or a new program
- E. None of the above

Ans:

- B. making sure that the new programs do in fact process certain transactions according to Specifications

[View All Answers](#)

Question - 37:

Managers who are potential users of the MIS:

- A. select the optimum equipment configurations
- B. evaluate alternate equipment configurations
- C. describe information needs

- D. All of the above
- E. None of the above

Ans:

- E. None of the above

[View All Answers](#)

Question - 38:

Which of the following is not true of the conversion phase of the development life cycle?

- A. the user and systems personnel must work closely together.
- B. steps must be taken to phase out the old system
- C. documentation should be emphasized
- D. the non machine components of the system should be considered
- E. None of the above

Ans:

- C. documentation should be emphasized

[View All Answers](#)

Question - 39:

System Implementation Phase entails:

- A. System check outs
- B. Pilot run
- C. Parallel runs
- D. All of the above
- E. None of the above

Ans:

- A. System check outs

[View All Answers](#)

Question - 40:

Documentation is prepared:

- A. at every stage
- B. at system design
- C. at system analysis
- D. at system development
- E. None of the above

Ans:

- A. at every stage

[View All Answers](#)

Question - 41:

The two classifications of inputs are:

- A. energies and maintenance
- B. maintenance and waste
- C. maintenance and signal
- D. products and waste
- E. None of the above

Ans:

- C. maintenance and signal

[View All Answers](#)

Question - 42:

Which of the following statements, is (are) not true for the lease option:

- A. Lease charges are lower than rental charges for the same period and are also tax deductible.
- B. Lease may be written to show higher payments in early years to reflect the decline in value of the system
- C. Insurance, maintenance and other expenses are included in the rental charge
- D. All of the above
- E. None of the above

Ans:

- C. Insurance, maintenance and other expenses are included in the rental charge

[View All Answers](#)

Question - 43:

A problem's _____ will answer the question, What information will the computer need to know in order to either print or display the output times?

- A. Input
- B. Output
- C. Processing
- D. Purpose

Ans:

A. Input

[View All Answers](#)

Question - 44:

The primary tool used in structured design is a:

- A. data-flow diagram
- B. module
- C. structure chart
- D. program flowchart

Ans:

C. structure chart

[View All Answers](#)

Question - 45:

A Ring, refers to a record chain, the last of which refers to the first record, in the chain, is called a/an:

- A. addressing
- B. location
- C. pointer
- D. loop

Ans:

C. pointer

[View All Answers](#)

Question - 46:

Which of the following is not a factor in the failure of the systems developments projects?

- A. size of the company
- B. inadequate user involvement
- C. failure of systems integration
- D. continuation of a project that should have been cancelled

Ans:

A. size of the company

[View All Answers](#)

Question - 47:

The approach used in top-down analysis and design is:

- A. to identify the top level functions by combining many smaller components into a single entity
- B. to prepare flow charts after programming has been completed
- C. to identify a top level function and then create a hierarchy of lower-level modules and components.
- D. All of the above

Ans:

C. to identify a top level function and then create a hierarchy of lower-level modules and components.

[View All Answers](#)

Question - 48:

The step-by-step instructions that solve a problem are called _____.

- A. An algorithm
- B. A list
- C. A plan
- D. A sequential structure

Ans:

A. An algorithm

[View All Answers](#)

Question - 49:

In Prototyping:

- A. BASIC is used
- B. COBOL is used
- C. 4GLs are used
- D. system is documented
- E. None of the above

Ans:

C. 4GLs are used

[View All Answers](#)

Question - 50:

In a _____ one module of the new information system is activated at a time.

- A. System Development Life Cycle

- B. CASE tool
- C. Phased Conversion
- D. Success factors

Ans:

- C. Phased Conversion

[View All Answers](#)

Question - 51:

The primary tool used in structured design is a:

- A. structure chart
- B. data-flow diagram
- C. program flowchart
- D. module

Ans:

- A. structure chart

[View All Answers](#)

Question - 52:

System Study involves:

- A. study of an existing system
- B. documenting the existing system.
- C. identifying current deficiencies and establishing new goals
- D. All of the above

Ans:

- D. All of the above

[View All Answers](#)

Question - 53:

Define characteristics should a system analyst possess to be good at his job?

Ans:

System analysts are technical experts and outstanding analytical thinkers. They are highly organized and knowledgeable about many different types of technological systems. They are also able to adapt to the various unique technological conditions which each new company brings. They possess reasonable communication skills and are able to prepare effective reports, flowcharts, and diagrams.

[View All Answers](#)

Question - 54:

Tell me what experience do you have with team work?

Ans:

The job of a system analyst often requires communicating with relevant staff to coordinate information and operation in order to optimize the system at all levels, in all departments. Effective team communication is vital.

[View All Answers](#)

Question - 55:

Tell me what experience you have with hardware and software?

Ans:

Generally speaking, system analysts provide tech-support for hardware and software or using hardware and software tools. Analysts install and maintain, as well as do research on hardware and software in order to optimize performance. They also provide specifics about the types of hardware and software they have actually worked with and in what context.
