Competency Based Interview Questions And Answers Guide.

Question - 1:

Please tell me what are core competencies?

Ans:

The number of academic standards that have been generated by national organizations and states can be overwhelming. Based on a study the system would need to be changed from a K-12 to a K-22 system in order to adequately teach all standards to mastery. This is certainly a recipe for failure. The Common Core creates a different starting point, focusing on the most important standards. The next step is to translate the standards into core competencies. States can be helpful in identifying a shared set of core competencies that all districts will be building upon. This is also helpful for establishing portability, a key ingredient for ensuring that students with high mobility will benefit directly from a competency-based system.

Question - 2:

What are lifelong learning competencies?

Ans:

The common core includes application of knowledge through high-order skills. However, there are other skills that are important to all students but particularly critical for students living in areas of concentrated poverty and/or violence. These include social-emotional and navigational skills that help them overcome trauma and engage others in helping them to manage highly complex dilemmas in their lives. In addition, workforce and career development are critical for finding jobs to support families and increased motivation through the broadened horizons. For students that are first in their families to go to college, gaining knowledge about the college application and financial aid process is imperative. States can facilitate the development of shared lifelong learning competencies, rubrics and professional development so that educators and community members can work together to support students.

Question - 3:

What should you do when you are asked typical competency based questions?

Ans:

You should have an idea before the interview of the experiences from your life that you could use as examples to demonstrate the key competencies of the firm to which you are applying. You are likely to have to provide at least two examples for each competency during your interview.

It is quite acceptable to ask for and to use a few moments of thinking time before answering competency questions. If necessary, simply notify your interviewer by explaining you "may need to think about this for a few moments". Once you have thought of a good example to use, continue with your answer.

Question - 4:

Why do interviewers ask career motivation questions as competency based key?

Ans:

Interviewers ask career motivation questions to determine why you want to work for their company and why you want to work in role to which you have applied. Career motivation questions are similar to, but not the same as commitment to career questions and are often used as part of a competency based interview.

Question - 38:

What do interviewers ask in competency based interview?

Ans:

In competency based interviews, interviewers will ask questions that require candidates to demonstrate that they have a particular skill or a "key competency" the firm is looking for. Candidates will be asked to do this using examples of situations from their life experiences, to illustrate their personality, skill set and individual competencies to the interviewer.

[View All Answers](#)

Question - 39:

Please tell me who uses competency based interviews?

Ans:

Estimates indicate that a third of all employers are using competency interviews as part of their recruitment process. Large graduate employers are especially likely to use competency interviews as part of their graduate recruitment procedure, in particular as part of an assessment.

[View All Answers](#)

Question - 40:

Why do recruiters use competency based questions in interviews?

Ans:

In the case of applications for graduate jobs, candidates typically have no experience in the industry to which they have applied. Consequently it is not possible to assess their suitability for a job role based upon their CV alone. This has led to the development of competency based interviews becoming the prime way to interview inexperienced graduate applicants.

Question - 53:

How do students receive rapid and differentiated support in competency based model?

Ans:

The core idea of a competency-based model is that all students will master the desired competencies. This requires a rapid response capacity on the part of educators to support students when they are stuck or begin to disengage in frustration. Educator capacity, and student's own capacity to seek out help, will be enhanced by technology-enabled solutions that incorporate predictive analytic tools. This element is essential to a competency-based system. Without it there is risk that the current inequities will be reproduced.

- * Pacing matters - Although students will progress at their own speeds, students that are proceeding more slowly will need more help
- * Learning plans capture knowledge on learning styles, context and interventions that are most effective for individuals students
- * New specialist roles may develop in educator and instructional support roles, providing high quality interventions when students are begin to slip behind
- * Online learning can play an invaluable role in providing feedback to teachers on how students are proceeding

[View All Answers](#)

Question - 54:

How is assessment meaningful and a positive learning experience for students in competency based model?

Ans:

In a competency-based model, the traditional approach to assessment and accountability "of learning" is turned on its head with assessments "for learning." Formative assessments are aligned with learning objectives. Students receive immediate feedback when assessment occurs. This is used to encourage students to return to difficult concepts and skills until they achieve mastery. It is essential that assessments are student-centered in which students are assessed on material with which they are familiar. In order for competency-based pathways to offer high-quality education, the following must be put into place:

- * Schools embrace a strong emphasis on formative assessment.
- * Teachers collaborate to develop understanding of what is an adequate demonstration of proficiency.
- * Teachers assess skills or concepts in multiple contexts and multiple ways.
- * Attention on student learning, not student grades.
- * Summative assessments are adaptive and timely.
