Question - 2:

What do you know about this organization?

Ans:

You have to do your homework prior to the job interview. Doing the background work will help you stand out. Find out who the main players are, have they been in the news recently? You are not expected to know every date and individual, but you need to have a solid understanding of the company as a whole.

Question - 3:

Have you ever faced any problem due to caching?

Ans:

Yes, sometime I receive issues related to outdated pages being rendered to the user. In those cases I clear the cache and then try to investigate the reason for that. Sometime the issue is due to comparatively high refresh interval. In those cases I reduce the cache refresh interval.

Question - 4:

What is your greatest weakness as production support analyst?

Ans:

I am a perfectionist and therefore, I rarely believe in anyone who can work as well as me. As a result, I am afraid to delegate important tasks to others. This approach has a weak side as that if you are not clever, you will cause the employer to believe that you are cheating him.

Question - 5:

What have you done to improve your Production support knowledge in the last year?

Ans:

Employers look for applicants who are goal oriented. Show a desire for continuous learning by listing hobbies non-work related. Regardless of what hobbies you choose to showcase, remember that the goal is to prove self-sufficiency, time management and motivation.

Question - 10:

What all caching has been used in your application?

Ans:

I am using Akamai as web server cache in my application.

[View All Answers](#)

Question - 11:

Have you done any sort of automation in your system monitoring tasks?

Ans:

Yes, I have created System as well as Log monitoring scripts to keep track of exceptions. I am also using a tool that will inform the stake holders if an exceptional event occurs with the system.

Question - 20:

What is a system security?

Ans:

System security means preventing viruses and hackers from reaching the computer system. It is achieved by various strategies, like antivirus and firewall installation, crypting, restricting user online activity, etc. Another way to enhance security is to have system and data recovery means ready and up to date.

[View All Answers](#)

Question - 21:

What would your previous colleagues say about you?

Ans:

This is not the arena for full disclosure. You want to stay positive and add a few specific statements or paraphrase. Something like "Joe Blogs always mentioned how reliable and hard working I was" is enough.

[View All Answers](#)

Question - 22:

Tell me about yourself?

Ans:

This is probably the most asked question in a interview. It breaks the ice and gets you to talk about something you should be fairly comfortable with. Have something prepared that does not sound rehearsed. It is not about you telling your life story and quite frankly, the interviewer just is not interested.

[View All Answers](#)

Question - 23:

Why are you looking for another job?

Ans:

This appears to be a simple question, yet it is easy to slip. I would suggest not mentioning money at this stage as you may come across as totally mercenary. If you are currently employed, you can say it is about developing your career and yourself as an individual.

[View All Answers](#)

Question - 24:

What is a production support person?

Ans:

A production support person is responsible for the receiving incidents and requests from the end users, analyzing these and either responding to end user with a solution or escalating it to the other IT teams. These teams may include developers, system engineers and database administrators.

[View All Answers](#)

Question - 25:

What is production support?

Ans:

Production support is the practices and disciplines of supporting the IT systems/applications which are currently being used by the end users.
