Question - 21:

Does the data entry and filing the same?

Ans:

No, data entry is using an alphanumeric keyboard and/or ten key to enter data into a computer or data base. Filing is organizing data either alphabetically or relevant data into files or folders.

[View All Answers](#)

Question - 22:

Can you please explain the difference between data integrity and data validity?

Ans:

Usually data entry personnel - who enter, for example, 13/25/2010, by mistake, while errors in data integrity are caused by bugs in computer programs that, for example, cause data. Therefore, testing should be performed on a regular basis because data changes over time. Data Validity Errors caused due to incorrect data entry, called data validity errors, are probably the most.
