Question - 3:

What is the importance of proficiency in several languages for a pilot?

Ans:

A private pilot may limit himself to knowledge of English good enough to understand control towers. Other pilots, being more publicly involved figures by necessity, greatly benefit from knowing more than one language.

[View All Answers](#)

Question - 4:

What is your Proudest accomplishment?

Ans:

Becoming a pilot and graduating from college as to be the biggest accomplish so far.

[View All Answers](#)

Question - 5:

What is the 1-2-3 rule?

Ans:

Requirements for filing an alternate. 1-2-3: 1hr before to 1hr after estimated time of arrival, the weather must be forecast to be 2000' ceiling and 3SM vis.

[View All Answers](#)

Question - 6:

What makes a good captain or what do you expect from a Captain?

Ans:

one that is knowledgeable, decisive, conservative and safety conscious, good people skills, superior communication skills, solid piloting skills, can manage stress and avoid confrontation

[View All Answers](#)

Question - 7:

List your qualifications as a pilot?

Ans:

Besides relevant college degree(s), pilots graduate from flying school and participate in annual additional training.

[View All Answers](#)

Question - 8:

What is GRID MORA?

Ans:

It's an altitude derived by Jepp or provided by state authorities. If derived by Jepp, Grid MORA clear all terrain and structures by 1000' in areas where highest elevations are 5000' MSL or lower. MORA values clear all terrain and structures by 2000' in areas where highest elevations are 5001' MSL or higher. Grid MORA (State) altitude supplied by the State Authority provides 2000' clearance in mountainous areas and 1000' in non-mountainous areas. Also... a +/- denote doubtful accuracy but are believed to provide sufficient reference point clearance.

Question - 10:

What is V_{so} of your most recent aircraft?

Ans:

Cessna 172 is 41Kts

[View All Answers](#)

Question - 11:

What is the max distance from the runway if you were to circle to land?

Ans:

Depends on your speed

[View All Answers](#)

Question - 12:

Have you applied anywhere else?

Ans:

Just be honest on this one. If you are in the job hunt, it's normal to apply to several companies. It's great to tell them that Cathay is your top choice, but it would be suspect to say Cathay is your only choice.

[View All Answers](#)

Question - 13:

What is mach tuck?

Ans:

As the aircraft reaches critical mach the nose of the aircraft tends to pitch downwards due to the flow of air over the wing reaching supersonic speeds producing additional lift and center of pressure moving rearward. As the center of pressure moves rearward the elevators become less effective, pushing the aircraft into a potentially unrecoverable dive.

[View All Answers](#)

Question - 65:

What is definition of "min fuel"?

Ans:

When you can accept little or no delay, not an emergency situation, just an advisory to atc

[View All Answers](#)

Question - 66:

Explain What is VDP?

Ans:

at this point, if you gain view of positive visual runway environment, it guarantees a 3 degree decent slope (normal) down to the runway.

[View All Answers](#)

Question - 67:

What is viscous hydroplaning?

Ans:

Hydroplaning that requires a very smooth surface (ie new pavement, rubber coated pavement). Thin layer of water, low tire speed. Anything more than gentle braking can cause tires to lock.

[View All Answers](#)

Question - 68:

Tell me how winglets serve to conserve fuel?

Ans:

The winglet will allow a new airplane that already flies farther, higher and more economically than competing products to extend its range, carry more payload, save on fuel and benefit the environment. Unlike traditional winglets typically fitted at abrupt angles to the wing, this new advanced "blended" design gently curves out and up from the wing tip, reducing aerodynamic drag and boosting performance. A Next-Generation 737-800 equipped with the new winglet will be able to fly farther, burn 3 percent to 5 percent less fuel, or carry up to 6,000 pounds more payload. Quick answer is...it reduces drag cause by aerodynamic forces acting on the wingtip. Because of that it gets less fuel burn or greater cargo loads, or both.

[View All Answers](#)

Question - 69:

Describe the landing gear of the plane you are flying?

Ans:

We have a tricycle gear set up, each main gear has four-wheel truck and the nose gear has two wheels. They are ABS/Anti-skid equipped, and the emergency braking system has hydraulic accumulators that provide up to 7 full applications of brake pressure. You have to be careful when applying the brakes to avoid getting into an oscillation between the braking action and your brake pedal pressure

[View All Answers](#)

Question - 70:

Why do you want to work here as Airline Pilot?

Ans:

I continue to enjoy the experience of traveling. Atlas provides a diversity of flying experiences like few other airlines. It has proven its ability to accurately price and deliver ACMI/CMI

[View All Answers](#)

Question - 71:

What will be your biggest challenge at training for AWAC?

Ans:

Following company procedures verbatim

[View All Answers](#)

Question - 72:

What is the Long and Lat of Dubai?

Ans:

25.2 N 55.3 E

[View All Answers](#)

Question - 73:

What is RVSM?

Ans:

Reduced vertical separation minimums.

[View All Answers](#)

Question - 74:

What is the difference between GPWS and EGPWS?

Ans:

1. EGPWS is safer and more advanced than GPWS.
2. EGPWS uses GPS while GPWS doesn't.
3. EGPWS uses a terrain database that is not available in GPWS.
4. GPWS is only aware of the ground below it while EGPWS is aware of a larger area.

[View All Answers](#)

Question - 75:

What is maximum speed in class charlie airspace within 4 nm from an airport?

Ans:

200 Knots

[View All Answers](#)

Question - 76:

What is the definition of a cold front and what is the associated weather?

Ans:

A cold front occurs when a mass of cold dense and stable air advances and replaces a body of warmer air. It is associated with heavy weather such as thunderstorm, heavy rain/hail/lightning and may produce tornadoes. It is also producing squall line. High due point and falling baro pressure are indicative of cold front.

[View All Answers](#)

Question - 77:

Have you ever gone out of the way for a passenger?

Ans:

Absolutely, she wasn't a passenger, but one of my WSOs was feeling sick when we were getting ready for a flight back from Nellis in Las Vegas. The training mission we had planned wasn't vital, so we canceled the low-level profile and went straight back to Dyess from Nellis as fast as we could. I was totally prepared to get her to the Flight Doc if necessary or even cancel the flight if required.

[View All Answers](#)

Question - 78:

What does your resume not tell us about you?

Ans:

I am really going to miss my friends from the Air Force, I really enjoy going around the world with them, I met a lot of good people there but now it's time to go.

[View All Answers](#)

Question - 79:

Would you be willing to consider yourself for a DESO position in HKG?

Ans:

They might ask you this, but if you are attending an FO interview, I don't think you have to say yes to profess your loyalty to Cathay and Hong Kong. If you are interviewing for an FO position at one of their foreign freighter, than that is the only position you need to show a serious interest in.

- * What is the worst captain you have flown with?
- * What is the best captain you have flown with?
- * What would your previous employers say about you?
- * What is your current job?
- * Would you take a trip if you had been up all day and the pager goes off at 10pm, ect?

- * Describe yourself using 5 words.
- * What is your biggest weakness?

[View All Answers](#)

Question - 93:

What 3 things must you report when you enter a hold?

Ans:

Time & altitude at the holding fix. EFC has nothing to do with the required report.

[View All Answers](#)

Question - 94:

Have you ever had to intervene with a crew member?

Ans:

Yes

[View All Answers](#)

Question - 95:

On an IFR flight in VFR who is responsible for separation, you or ATC?

Ans:

Yes Me

[View All Answers](#)

Question - 96:

Where do you see yourself in coming 10 years?

Ans:

Chief Pilot

[View All Answers](#)

Question - 97:

What are holding speeds?

Ans:

200 knots up to 6000 230 knots from 6000 to 14000, 265 above 14000 and 310 knots if your in a F-111 or if your at a Navy base

[View All Answers](#)

Question - 98:

Would you fly fatigued?

Ans:

No way. I've done that during an ORE. Nodding off in formation is not cool.

[View All Answers](#)

Question - 99:

Why not the military?

Ans:

Military wasn't required

[View All Answers](#)

Question - 100:

What was your worst day in aviation?

Ans:

The day I was furloughed from Midwest Airlines

[View All Answers](#)

Question - 101:

Describe a NOT so perfect day in your current job?

Ans:

A day when the aircraft breaks down at your last stop before getting to go home.

[View All Answers](#)

Question - 102:

During walk-around before flight in icing conditions, what are you looking for?

Ans:

All external heats on the airplane work

[View All Answers](#)

Question - 103:

What kind of airspace is around LAX?

Ans:

Class B. Very congested airspace.

[View All Answers](#)

Question - 104:

What do you think defines a professional pilot?

Ans:

Someone who is knowledgeable, punctual, able to communicate effectively, take command in all situations, understand his limitation, willing to continue training and adhere to company procedure, and very systematic in his or her approach.

[View All Answers](#)

Question - 105:

Would I depart for an airport if they reported mu-25?

Ans:

Depends on what the GOM says for minimum braking action. Crosswinds would be a big factor to consider in a go/no-go decision as well.

[View All Answers](#)

Question - 106:

How much money do you two make?

Ans:

I doubt they will ask you this question.

[View All Answers](#)

Question - 107:

Your gear is stuck down, do you take another trip?

Ans:

You need a ferry permit to stiff-leg the Cessna 402 to a maintenance base. This requires a Cape Air approved mechanic to inspect the plane and sign off the ferry permit.

[View All Answers](#)

Question - 108:

Three adjectives to describe your work ethic?

Ans:

Here are some ideas.. Adaptable, accurate, open-minded, meticulous, professional, punctual

[View All Answers](#)

Question - 109:

What do you expect to accomplish here?

Ans:

Well, I like win-win situations. I hope to help serve Ameriflight well, and earn a good income to support my family.

[View All Answers](#)

Question - 110:

Tell us about a difficult boss?

Ans:

All bosses are difficult

[View All Answers](#)

Question - 111:

What is needed to descend below D/A?

Ans:

Required visibility, Normal maneuvers to the runway, Runway environment (visual).

[View All Answers](#)

**Question - 112:**

Have you got any questions?

Ans:

Don't say no! Show them that you are interested about the development of the airline by asking a question.

[View All Answers](#)

Question - 113:

If you are up all night with sick spouse/kid and have duty next day, what do you do?

Ans:

You must always follow the best rules for safety. It is always best to prepare for each flight. If, however, you are too sick to work, it is most optimum to call in at your earliest opportunity, so that a replacement can be sought.

[View All Answers](#)

Question - 114:

Why Cape Air?

Ans:

big airline paneer

[View All Answers](#)

Question - 115:

How radiation fog is formed?

Ans:

After sunset the ground radiates the heat it accumulated during the day into the atmosphere. As the ground cools overnight, the air immediately above it cools as well. If it has enough moisture and cools to its dewpoint, fog will form.

[View All Answers](#)

Question - 116:

If that is all you can see (approach lighting) at DH/MDA, what would/can you do?

Ans:

100 ft above touchdown zone unless Runway identifying lights / markings are visible.

[View All Answers](#)

Question - 117:

Tell me the procedures for losing an engine?

Ans:

Airspeed Mixture Throttle Props Flaps Gear Identify Verify Troubleshoot (if at safe altitude) Feather

[View All Answers](#)

Question - 118:

What do you know about our airline?

Ans:

Well, again take a sheet of paper, build up a folder and study it. Internet is a gold mine of information regarding your future airline. Use it! I even knew what where the best restaurants close to the airport base!

[View All Answers](#)

Question - 119:

What is the difference between Decision Altitude and Decision Height?

Ans:

Decision altitude (DA) is the MSL altitude at which the decision to land or go missed is made. Decision height (DH) is the corresponding AGL altitude.

[View All Answers](#)

Question - 120:

What is VDP?

Ans:

(visual descent point) is the last point in which you would be at a normal position to land on a non-precision approach.

[View All Answers](#)

Question - 121:

What you would do if you had an engine fire on final approach and you were at the DH with no airport in site?

Ans:

Those that would go around are you nuts? ALL airlines teach you to LAND! You have no idea where that fire is and how big it is. How well do you think you can do a one engine go around while trying to fight a fire? That's nuts. What if you lost the other engine? You have no idea and NO altitude. How often do you fly an approach with all needles centered and not been right on the centerline? These airplanes will fly you to the ground. LAND!

[View All Answers](#)

Question - 122:

Why ASA?

Ans:

You are the first ones that called!

[View All Answers](#)

Question - 123:

Know what the MSA circle on the approach plate means and what it is used primarily for?

Ans:

Lowest altitude that provides at least 1000ft obstruction/terrain clearance within 25 miles of the navaid it is based off of. For emergency use only and do not always assure signal coverage.

[View All Answers](#)

Question - 124:

If you are 200 miles out @ 310, ATC wants 110 @ 40 DME, when do you start descent?

Ans:

$310 - 110 = 20 \times 3 = 60 + 40 = 100$ kiss

[View All Answers](#)

Question - 125:

When could you start working for our airline?

Ans:

"I was born ready..." you are not a top gun... Find out a way to tell them that you are more than ready! I said: "Since yesterday already!" (with a big smile on my face) and then I precised more seriously that I was able to start immediately.

[View All Answers](#)

Question - 126:

As you are about to push back, Capt has just rushed on board, you smell alcohol (of course you question the Capt), the response the Capt gives: I was at a game and had alcohol spilled on me, that's why we can smell it, what do you do?

Ans:

Captain, I'm concerned about safety and perceptions. Let's contact dispatch and bring them into the loop and get us both tested for alcohol so we can be sure we're both safe to take this flight.

[View All Answers](#)

Question - 127:

What is the speed limit in Class B Airspace?

Ans:

Sec. 91.117 - Aircraft speed.

(a) Unless otherwise authorized by the Administrator, no person may operate an aircraft below 10,000 feet MSL at an indicated airspeed of more than 250 knots (288 m.p.h.).

(b) Unless otherwise authorized or required by ATC, no person may operate an aircraft at or below 2,500 feet above the surface within 4 nautical miles of the primary airport of a Class C or Class D airspace area at an indicated airspeed of more than 200 knots (230 mph).

This paragraph

(b) does not apply to any operations within a Class B airspace area. Such operations shall comply with paragraph

(a) of this section.

(c) No person may operate an aircraft in the airspace underlying a Class B airspace area designated for an airport or in a VFR corridor designated through such a Class B airspace area, at an indicated airspeed of more than 200 knots (230 mph).

[View All Answers](#)

Question - 128:

Now on approach, thunderstorm 3-4 miles away, Capt is flying, what do you do Storm gets closer, you are now @ 600ft and wind is beyond limits, what do you do On your way to the alternate which is 20 min away, would you talk about it How would you bring it up when you do bring it up Are you going to formally let anyone know about this?

Ans:

Inform the Captain the wind is beyond our limits and recommend we divert to our alternate. At 600', if the Captain is still not terminating the approach, I call "Go Around". During the 20 minute divert, I do not talk about the missed approach, just stay focused on preparing for the arrival at the diversion airport. If there is time, I offer to attend to logistics for our passengers. Once we land, I ask the Captain if we can privately debrief the missed approach and diversion. There's no need to formally report the diversion unless the Captain shows a disregard for company procedures, limitations, and safety of flight.

[View All Answers](#)

**Question - 129:**

Would you help load the airplane with boxes if the ground crew is running behind or was short handed?

Ans:

Of course you would.

[View All Answers](#)

Question - 130:

If you are flying 121, can you take off from an airport when the current weather is below landing min's?

Ans:

Yes. But you need to file an alternate , one hour flight distance with one engine inop in still air.

[View All Answers](#)

Question - 131:

How did you get into flying?

Ans:

Childhood Dream

[View All Answers](#)

Question - 132:

Why do you want to fly for AA?

Ans:

Growing up my original dream was to fly for the airlines, after graduating from college, and the necessary flight time, the industry wasn't hiring, now with my current job unstable, I thought this would be a good opportunity to resurrect my dream!

[View All Answers](#)

Question - 133:

What to report in a hold, and min vis for takeoff in a three engine aircraft?

Ans:

Name of Fix, Time, Altitude and EFC time, 1/2 or 2400RVR

[View All Answers](#)

Question - 134:

First Class passenger is annoyed about the delay at the gate due to duty day crew change, FA won't serve drinks, the person then calls FA names, FA comes to you, Captain is not there yet, FA wants passenger kicked off aircraft, what do you do?

Ans:

My airline has a complaints resolution officer. Call dispatch to bring that person in to resolve the issue (Does AA have a rep) In the mean time ask the FA to bring the lead up. Ask the lead if you could talk to the passenger and try to deescalate the situation. If the lead says yes I would take a few min and calmly speak to the pax and let him know we will do everything we can to get you to your destination safely however, if you continue to be abusive we will have to ask you to deplane. I consider my job to treat every passenger as I would like to be treated. That includes giving someone a second chance, if they still continue to act up 86 them.

[View All Answers](#)

Question - 135:

Where is the FAF on a VOR/ILS approach?

Ans:

On a VOR approach, the FAF is whenever you are established on course inbound and the final decent may be started. For non-precision approaches, the FAF is the "Maltese Cross" and for precision, the arrow which identifies the GS intercept.

[View All Answers](#)

Question - 136:

Can you intentionally fly a turbojet beneath Class B?

Ans:

yes I can intentionally fly a turbojet beneath Class B.

[View All Answers](#)

Question - 137:

What is an LDA?

Ans:

a precision approach that is offset from the runway, it may have GS

[View All Answers](#)

Question - 138:

Give us 3 good & bad qualities about yourself?

Ans:

Personal good qualities are always easy to tell but how about bad qualities? I had to say 3 and I had only one the day of my pilot interview. It is not easy to tell the employer you want to work for that you are a bastard! Bad luck for me that day, the psychologist asked me the same question in a different way: "If you sister was able to change one thing about your personality, what would it be?". I was not expecting that one... Well I took the time to think and I shared a small conflicting situation I had with her and how I reacted.

[View All Answers](#)

Question - 139:

Do you speak our local/country language?

Ans:

It is always a very good advantage to speak the local language but if you don't, please don't just say "no" or "no but I am ready to learn", answer in a positive way like "Well, I can't keep a discussion but since I know I had this interview I've started to learn a bit about and I bought a book to learn it" Try to say a few words or to tell them that you will work on that in the local language. It is always appreciated! The best example is when you see tourists talking to you in your language. Don't you like it?!

[View All Answers](#)

Question - 140:

What would you do if you lost your medical?

Ans:

Request a ground instructor position and help in the training department.

[View All Answers](#)

Question - 141:

When is the last time you did something unsafe?

Ans:

Last week

[View All Answers](#)

Question - 142:

What is the effect of aft cg on performance?

Ans:

rearward Cg gives better fuel efficiency

[View All Answers](#)

Question - 143:

What are the CDI/RAIM sensitivities of a GPS outside 30nm? Inside 30nm?

Ans:

+/- 5 mi +/- 1 mi

[View All Answers](#)

Question - 144:

What was your last mistake?

Ans:

Speeding

[View All Answers](#)

Question - 145:

Why do you want to become a pilot?

Ans:

Before I went to the interview I took a sheet of paper and I made a list of all the reasons why I wanted to be a pilot. The list can be long! Take then three to five most relevant point and that is your answer. Try always to explain why taking examples.

[View All Answers](#)

Question - 146:

What would you do: If the captain you suppose to fly with is smelting alcohol? If the captain you suppose to fly with shows you wrong fuel calculation (without changing his mind)?

If the captain you fly with is flying unstably during an ILS approach (with no improvements)? If your best friend is also part of this pilot assessment but there is only one position available?

Ans:

This is the kind of situation in which they will put you. In my case the senior captain in front of me was in the skin of this fu... capt'N. "Check your speed!" "Speed is good young pilot!". "Go around!" "I flew 1000 hours on this aircraft and you tell me to go around?". I took over the controls when the situation was not safe anymore and that is what they wanted! You don't have enough fuel? Check out a few times your calculations and if you're right, explain it to your colleague and again. If

you're right, don't go without enough fuel! Avoid saying "NO" and be CRM (crew resource management) minded!

Question - 154:

Four ways to identify gear's up?

Ans:

Just a follow up in case anyone cares :-)

1. Three greens
2. Transit light out
3. Throttle warning
4. Flap warning

[View All Answers](#)

Question - 155:

Have you ever had a significant disagreement with another pilot?

Ans:

no

[View All Answers](#)

Question - 156:

What makes a good airline pilot in your opinion?

Ans:

One who takes his or her job serious

[View All Answers](#)

Question - 157:

You're taking off, and lose an engine before Vmc. What do you do?

Ans:

Maintain directional control and stop the aircraft on the runway. Then declare to ATC that you have had an emergency (use the word emergency) and am stuck on the runway.

[View All Answers](#)

Question - 158:

What makes a good freight pilot?

Ans:

Avoiding complacency.

[View All Answers](#)

Question - 159:

What is "BR" in a Metar?

Ans:

Mist.. Think (B)aby (R)ain

[View All Answers](#)

Question - 160:

What is Max A/S in Class C?

Ans:

Airspeed maximum of 200 knots indicated within 4 nautical or 5 statute miles and 2500 feet above the ground of the primary airport.

[View All Answers](#)

**Question - 161:**

What is V2?

Ans:

takeoff safety speed

[View All Answers](#)

Question - 162:

What is V1?

Ans:

Take off decision speed

[View All Answers](#)

Question - 163:

What are you ready to do as a pilot for our airline?

Ans:

What a question, I was ready for the interview but not about that one... Flying airplanes? I knew it was not the answer they wanted. In fact you will be representant of the airline in the network of the airline and you must be social, you must show a positive attitude and you must wear your uniform correctly. A lot of people will be facing you since you will have a lot of responsibilities!

[View All Answers](#)

Question - 164:

Could you please introduce yourself to us?

Ans:

I have been introducing myself to them first with generic information (Name, Age, From, Family situation) then I went in the review of my school education, where I've been working and then about my pilot training. I've been talking for about 5 minutes. The most difficult thing is to link everything together and to make it interesting. Tell only key information.

[View All Answers](#)

Question - 165:

How your current boss would describe you?

Ans:

Dedicated team player who wants to make a difference.

[View All Answers](#)

Question - 166:

At what alt. does the speed restriction end in Class B airspace?

Ans:

At the top of class B . NY goes up to 7000 , DC UP TO 10,000

[View All Answers](#)

Question - 167:

Where do you see yourself in 5 years?

Ans:

Check Airman for the company

[View All Answers](#)

Question - 168:

Why working as an airline pilot for our airline instead of another one?

Ans:

Here is a good question eh, why them? Don't worry, you now know that you will get this question and Internet will certainly help you to have an answer! I remember going on Wikipedia to learn first about the airline itself and how big it was. I went into the very beginning until nowadays. The airline survived to the crisis in 2008 and that was one of my key point (job stability)! Does the airline bought some new airplanes? Does the conditions are good enough? Is that a big friendly family atmosphere? Find out at least three relevant points and explain why you want to work there and nowhere else!
