Ans:

TEU stands for Twenty foot Equivalent Unit. It is a method of calculating vessel load or capacity, in units of containers that are twenty feet long. For example, a 40ft long container measure 2TEUs.

[View All Answers](#)

Question - 26:

Tell me what do you like most about being a logistics engineer?

Ans:

I have never been a practicing logistics engineer. I have modeled a variety of physics-related problems in C, C++ and Python. I have analyzed large amounts of data, reduced the data using statistical methods, using optimization techniques, linear regression, non-linear best fit and other numerical techniques. What I like about that aspect is that I seem to be a natural computer programmer. I have used computational techniques to solve a multitude of problems. Imagination is a very important aspect to solving problems computationally. Many people think the computer does all the work. Actually, if a program is poorly written, the computer will do very little work because the program is inefficient. Therefore, imagination is important to writing efficient computer codes.

[View All Answers](#)

Question - 27:

Explain what is the different position a person can work in logistic industry?

Ans:

person can work under various position

- Logistic director
- Logistic supervisor
- Logistic associate
- Logistic engineer
- Logistic coordinator
- Logistic specialist
- Logistic analyst

[View All Answers](#)

Question - 28:

What is the difference between document against acceptance and document against payment?

Ans:

* Document against payment: The document remains with bank and importers have to pay the exporter before they release the documents. In this payment is immediate, and document is released quickly

* Document against acceptance: In this importer gives 30-45 days to bank to deduct the amount and then release the documents. In this provision, there is much risk, and if there is no sufficient balance in the account then, the process will get delayed.
