Then once you understand what people set as goals, you can inspire them through 1:1 pep talks, a presentation to multiple people and so forth.

Where do you see yourself in five years As Software Engineer .Net?

**Ans:**

If asked this question, be honest and specific about your future goals, but consider this:

\* a) if you've set realistic expectations for your career,

\* b) if you have ambition (a.k.a., this interview isn't the first time you're considering the question), and

\* c) if the position aligns with your goals and growth. Your best bet is to think realistically about where this position could take you and answer along those lines.

And if the position isn't necessarily a one-way ticket to your aspirations?

It's OK to say that you're not quite sure what the future holds, but that you see this experience playing an important role in helping you make that decision.

**Question - 34:**

Do you value recognition or pay more? Why?

**Ans:**

Either preference is fine, but just remember you have to be able to explain why. If you say recognition, then back that up by describing how achievement really carries weight with you and how you like to feel valued in the work that you do because it validates that you're helping your teammates / customers and so forth. If you choose money, you can also explain that is important to you as validation and you can highlight how money is important to you because of your goals (financial security, providing for your family, and so forth). The key is to be authentic with your answer. However, if you say you value pay more because you're greedy - know that doesn't align usually to most company's values/vision.

What does "collaboration with teammates" mean to you?

**Ans:**

Drinking at the water cooler together is not the best example. Think of how you can collaborate with teammates to generate new ideas, to create initiatives to impact the business' success for the better (specifically in the department that you're applying for). For example, if you're applying to marketing, collaboration could mean discussing new ways of social media advertising to reach an audience of over a million people to strengthen the brand awareness of the company.

[View All Answers](#)

**Question - 38:**

What do you like to do outside of work?

**Ans:**

Interviewers ask personal questions in an interview to "see if candidates will fit in with the culture [and] give them the opportunity to open up and display their personality, too." In other words, if someone asks about your hobbies outside of work, it's totally OK to open up and share what really makes you tick. (Do keep it semi-professional, though: Saying you like to have a few beers at the local hot spot on Saturday night is fine. Telling them that Monday is usually a rough day for you because you're always hungover is not.)

[View All Answers](#)

**Question - 39:**

How have you shown yourself to be a leader?

**Ans:**

Think about a time where you've rallied a group of people around a cause / idea / initiative and successfully implemented it. It could be a small or large project but the key is you want to demonstrate how you were able to lead others to work for a common cause.

**Question - 40:**

Did you get on well with your last manager?

**Ans:**

A dreaded question for many! When answering this question never give a negative answer. "I did not get on with my manager" or "The management did not run the business well" will show you in a negative light and reduce your chance of a job offer. Answer the question positively, emphasizing that you have been looking for a career progression. Start by telling the interviewer what you gained from your last job As Software Engineer .Net

**Question - 42:**

Are you planning to continue your studies and training As Software Engineer .Net?

**Ans:**

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

**Question - 43:**

What would your first 30, 60, or 90 days look like in this role As Software Engineer .Net?

**Ans:**

Start by explaining what you'd need to do to get ramped up. What information would you need? What parts of the company would you need to familiarize yourself with? What other employees would you want to sit down with? Next, choose a couple of areas where you think you can make meaningful contributions right away. (e.g., "I think a great starter project would be diving into your email marketing campaigns and setting up a tracking system for them.") Sure, if you get the job, you (or your new employer) might decide there's a better starting place, but having an answer prepared will show the interviewer where you can add immediate impact-and that you're excited to get started.

How would your friends describe you?

**Ans:**

My friends would probably say that I'm extremely persistent - I've never been afraid to keep going back until I get what I want. When I worked as a program developer, recruiting keynote speakers for a major tech conference, I got one rejection after another - this was just the nature of the job. But I really wanted the big players - so I wouldn't take no for an answer. I kept going back to them every time there was a new company on board, or some new value proposition. Eventually, many of them actually said "yes" - the program turned out to be so great that we doubled our attendees from the year before. A lot of people might have given up after the first rejection, but it's just not in my nature. If I know something is possible, I have to keep trying until I get it.

What problems have you encountered at work?

**Ans:**

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.
