Tell me what is hot work permit?

**Ans:**

Any work which involves spark flame, temperature is called HWP

[View All Answers](#)

**Question - 89:**

Tell us how do you handle record-keeping?

**Ans:**

Your prospective employer is trying to determine whether you place proper importance on protecting the company from liability. A good answer may go something like this: "I've found that keeping accurate records, while it may not be exciting, is critical in protecting both the company and the employees. If there were an accident, for instance, it would be important to be able to prove that we had provided necessary training and had the right policies in place. I also think it's crucial to make a thorough report of an accident right away, while the details are still fresh. If an injured employee later tells a different story, it's important to have an accurate record."

**Question - 98:**

Explain me about the biggest challenge on your last job?

**Ans:**

The purpose of this question is to get some insight into your personality and to what type of thing you find difficult. If you describe something that's a common occurrence at your prospective employer, you're unlikely to get the job. One good approach is to mention things that are likely to annoy your prospective employer, too, like employees who are always trying to circumvent safety procedures.

### Question - 109:

Tell me what would you do if someone called and said there had been a serious accident at our facility?

#### Ans:

The point of this question is to find out whether you can balance company policy with common sense. So a good answer might go something like this, "Well, one of the first things I'd do is familiarize myself with your procedures ahead of time so I could make sure my response is in alignment. Barring that, I'd find out what type of first response was needed - both to treat the injured and resolve the situation if it was ongoing - and get that response started."

[View All Answers](#)

### Question - 110:

Do you know what is a near-miss? Share a near-miss experience and what you learnt from it?

#### Ans:

Near miss is a situation where an accident could happen but did not. These indicate leaks in security arrangements. Last year, during a renovation project someone placed heavy tiles on the first floor just where the floor was not strong enough to carry their weight. The floor gave in and a couple of tiles fell down, no one was hurt but I learnt to always place safety tags on weak parts of structures being renovated.

**Question - 114:**

Explain me how to erect scaffolding?

**Ans:**

1. It should be erected on levels firm ground
2. It erected by trained / skilled person
3. It is constructed using metal pipes and wooden boards
4. It should be design and constructed from good and sound material
5. Not to be erected on loose earth
6. Clamps should fixed
7. Properly bracing
8. Sole plate is necessary the base of vertical pipe

[View All Answers](#)

**Question - 115:**

Explain brief note about fork lift truck?

**Ans:**

1. Check breaks, lift tilt and tires.
2. Check the stability of load before moving it
3. Never leave your fork lift truck un-attend with motor running
4. Never park fork lift truck on passage way
5. Never drive with wet or greasy hands
6. Always drive with a safe speed and slow down at turning point
7. When driving without load forks about 6 inches above the floor or ground
8. Never operate trunk in gaseous area
9. Never carry a load so high that you can not head, If necessary operate truck in reverse
10. Avoid carrying lose materials on forks
11. Never allow one to go under elevated loads
12. Warn other employees to stand clear when staking or removing materials
13. Exhaust pipe should have flame arrestor
14. Fork should be lowered to the floor when the truck is unattended
15. Stay alert t all times

[View All Answers](#)

**Question - 116:**

Explain what is tool box talk?

**Ans:**

1. Job related safety aspects
2. Job related hazards / risk
3. Control / preventive measure
4. Adequacy of PPE's / condition
5. Following safety rules / procedures
6. Safe work procedures / methods

**Question - 122:**

Tell me what are risks in vehicle permit?

**Ans:**

- \* Sparks,
- \* Accidents
- \* Pollution

[View All Answers](#)

### Question - 123:

Explain me how would you handle a plant manager who thought safety procedures were a waste of time?

#### Ans:

This question is partly about whether you're naive enough to think that everyone is as enchanted with safety as you are, and it's partly about how you handle opposition. A good answer would include trying to convince the plant manager of the importance of safety using facts and figures (accident claims, down time, lawsuits, etc.). You'd also want to cover what you'd do if you absolutely couldn't win the plant manager over. One good answer could be acknowledging both the plant manager's feelings as well as the company's requirements that he abide by safety regulations anyway - and asking for his suggestions on what they can do.

[View All Answers](#)

### Question - 124:

Tell me how would you define safety and its relevance to real time situations?

#### Ans:

Safety is a condition which provides you freedom from risk. While most people say safety and think "people", it is not just about people. It is also about buildings and assets. Real time situations that may warrant safety include physical hazards such as fire, natural calamities, intended harm and emergencies.

### Question - 131:

Tell me how many steps in safety?

#### Ans:

- \* There are 4 steps in safety
- \* Policy
- \* Implementation
- \* Take advantages of factory act
- \* Safe working conditions.

[View All Answers](#)

### Question - 132:

Explain personal protective equipments? P.P.E?

#### Ans:

1. Head protection - Hard hat, cap, and helmet
  - \* Made - aluminum, PVC, fiber glass, Plastic
  - \* Protect - heal, spark, danger materials
2. Face and eye protection - Spectacles, Welding goggles, face shield
  - \* Protect - flying particles, radation
3. Hand protection - Gloves, hand pads
  - \* Made - leather, rubber, PVC, asbestos
  - \* Protect - acid, oil grease, pure Alex rubber gloves electrical
4. Foot and leg protection - Safety shoes, gum boots, foot leg guard
  - \* Made - Metal, leather, rubber
  - \* Project - falling materials and electrical work
5. Body protection - Apron, hood, coverall, jacket
  - \* Made rubber, leather canvas, lead, PVC asbestos
  - \* Asbestos hood - Fire fighting
  - \* Rubber, PVC full suit - ( Corrosively liquid, fumes, vapour
  - \* Safety belts - work exceeds 3 mts
6. Ear protection - earmuff - noise - 30 - 135DB
7. Ear plug - 115 - 120 DB

### Question - 153:

Do you know general safety precautions in construction?

#### Ans:

1. Adequate first aid equipment should be kept ready
2. Adequate fire fighting equipment should be available
3. All general electrical rules should be followed
4. suitable lighting arrangements should be necessary at night work
5. Work men at height should be wear safety belts
6. Work men handling cement should be provided with goggles, rubber gloves and rubber boots by nose mask.
7. The moving parts of grinding machines used construction site should be covered with guards
8. The moving parts of grinding machines used construction site should be covered with guards
9. Excavated material should not kept near the excavated
10. Very short duration of work red flags must be hoisted and more duration red banners must be stretched
11. Defective tools should not be used
12. The worker should not carry tools in his hands when climbing a ladder
13. Excavation should be guarded by suitable fencing

[View All Answers](#)

### Question - 154:

Explain me a brief note about crane and LE?

#### Ans:

1. Only authorized and competent person should operated cranes
2. The correct sling must be used for the load to be lifts
3. Lifting equipment must be certified from competent authority and mark with its SWL
4. Never be used for loads excess of its SWL
5. Cables and slings must be padded when passing over sharp edges of equipments
6. Check the condition of the ground before parking the crane and use out riggers
7. All moving parts must be guarded
8. Uncertified chains, ropes, slings and hooks should not be use
9. All slings to be inspected by third party inspectors
10. Never stand or work under a suspended load
11. Place the out riggers on firms ground
12. Guide ropes shall be used to control swing of lifted material

13. Never operate the crane at the time of speed wing
14. Lifting over live equipment should not be encouraged
15. The crane should under go periodical maintenance as per manufactures

[View All Answers](#)

### Question - 155:

Explain me how many types inspection?

#### Ans:

There are 5 types inspection ; pressures of boilers( supervisor)

1. Continuous inspection - select employees / operator
2. Periodical Inspection - material storage, fire fighting equipments, handling equipments
3. Intermittent inspection - un announced inspection done by safety officer, safety committee. ( Particular work spot)
4. Statutory inspection - storage area, location at height ( cranes, ropes, chains, it my tackles inspection)
5. Special inspection - accident investigation
6. Inspection of new building, general lighting, use of PPE's etc. construction work.

[View All Answers](#)

### Question - 156:

Tell me how many types of safety?

#### Ans:

There are three types of safety.

- \* Plant safety
- \* Workers safety
- \* Consumer safety

[View All Answers](#)

### Question - 157:

Tell us what precaution are necessary for protect of fires?

#### Ans:

1. Buildings and plants shall be so laid out and roads, passage ways etc.
2. Doors and windows shall be located in suitable positions on all external walls of the building.
3. Smoking lighting or carrying matches are to be prohibited
4. Gas cylinders should not be stored near high flammable substances
5. Flammable liquids shall be stored in suitable containers with close fitting covers.
6. In every factory has to suitable fire fighting equipment
7. All fire fighting equipment shall be subjected to routine maintenance inspection and testing by proper trained persons.
8. Sufficient number of persons shall be trained in the proper handling of fire fighting equipment.

**Question - 176:**

Explain me what would you do if a plant manager asked you to ignore a safety violation?

**Ans:**

This question is designed to see how you balance ethics, professional responsibility, and common sense. A good answer might sound something like this: "If it were a minor technical violation that was unlikely to result in injury, I might give the manager 24 hours to fix it. At that time, I'd do another inspection. If it were a major hazard, however, I'd have to refuse to ignore it."
