Technical Support Engineer Interview Questions And Answers Guide.

Question - 1:

What is your typical workweek as an IT support officer?

Ans:

The employers would like to know what the candidate would do while they work. Take a deep look at the job role you have applied for and how it relates to your previous role. When you wanted to talk about typical work for a week, avoid discussing about non-work related activities. During the time of the company, you should use the time in a productive manner. Your answers must be focused on work and formulate your answers in a way which presents that you are organized.

OU means for Organizational Unit. It is a container within Active Directory which can hold users, groups and computers. It is the smallest unit on which administrator can assign group policy settings.

[View All Answers](#)

Question - 43:

Explain me a situation where you have had to deal with a difficult person and how you handled it? Do you think you should have done anything differently?

Ans:

This question is best answered by reference to a successful outcome to a difficult situation that you have encountered. In general terms, you could say that you understand the frustration of end users and that good communication often goes a long way to resolving issues.

[View All Answers](#)

Question - 44:

Tell me what do you feel is an appropriate salary for this position?

Ans:

Salary is a delicate question. You can answer in several ways. You can give a figure based on industry norms for the position or else you could say that you cannot give a realistic answer until you know more details of the job. Do not undersell yourself - you will regret giving a figure that is too low. Equally, if the figure is too high, you will put off the employer. It is best to avoid being too specific but do not give the impression that salary is unimportant.

[View All Answers](#)

Question - 45:

Explain difference between a WORKGROUP and a DOMAIN?

Ans:

In a Workgroup, all the computers function as Peers. But in a Domain, One computer is the Server and the others are Clients.

[View All Answers](#)

Question - 46:

What are the components needed to setup a Basic Home Network?

Ans:

- * LAN Cards
- * LAN Cables
- * Router/Hub

[View All Answers](#)

Question - 58:

Tell me what is a Data Cable?

Ans:

A Data Cable is a Thin Plastic band-like cable used to connect the Data-Devices like Hard-disk drives, Floppy Disk Drives, CD/DVD-ROM drives with the motherboard. Data Cables are primarily used for Data Transfer.

[View All Answers](#)

Question - 59:

Tell me have you used any of our products or similar products/competitors?

Ans:

If you have used the company's product or a product of the competitor, it does give you an advantage as you would have a basic idea about the functionalities. However, if you have not used any such product, don't worry. If you have the ability to grab things quickly and pick up the technology fast, you can prove yourself to be a potential candidate. For example, you can say something like this, "I am afraid, I haven't used your's or competitor's products first hand. However, I have seen others using them. Once I get hold of a product, I have an ability to understand the features quickly and I am quick at grabbing new technologies. So, I don't think it will pose any problem for me."

[View All Answers](#)

Question - 60:

Tell me what are the Hardware Components of a Desktop Computer / Laptop?

Ans:

The Hardware Components of a Desktop Computer / Laptop are as follows:

- * The Processor (CPU)
- * Motherboard

[View All Answers](#)

Question - 81:

Tell me what tools are most helpful to you when trouble shooting and solving a problem?

Ans:

Experience, knowledge, manuals, team members are some of the tools that come handy while trouble shooting. However, don't exhibit support from team members as your primary tool as you are expected to deal with a customer independently most of the times.

[View All Answers](#)

Question - 82:

Tell me what technical skills do you possess that would benefit our company?

Ans:

You must do some home work to answer this question effectively. Dig out the information about some products and technologies on which they work, match them with your skills set and prepare an effective answer. Company's website and job notification can be a good source for this information. To answer this question, you can say something like - "I see that your company sells security softwares for mail servers. I have a good knowledge of various mail servers, their performance and the security loop holes in them. This will help me in providing effective and efficient support to both the customers facing technical issues with your product as well those wanting to buy a new product."

[View All Answers](#)

Question - 83:

Tell me what is a "Default Gateway"?

Ans:

Default gateway is the IP address of the router in the network. In any case, if the users wants to switch on to another network, or if they cannot locate their particular network than their query will be forwarded to default gateway.

[View All Answers](#)

Question - 84:

Explain me what are the benefits of a child domain?

Ans:

Benefits of child domain are:

- * Low network traffic
- * Low administrative overhead
- * Security boundary

[View All Answers](#)

Question - 85:

What technical skills do you possess that would benefit our company?
What is your basic technical experience and qualifications?

Ans:

Technical support positions deal with a specific base or model of products. A basic knowledge of the company's products and their uses is the key here. Research the company's products in order to familiarize yourself with them as best as you can. Other than basic hands-on knowledge of a product, a willingness to learn as much as necessary is required. Even if you are not familiar with their product, most companies have several training programs available to those with the desire to learn.

[View All Answers](#)

Question - 86:

Tell me in two or three years from now, what do you see yourself doing?

Ans:

This is a test of your ambition and possible loyalty. You should be clear about what you hope to achieve and could ask the interviewers if your objectives are a possibility with their company.

[View All Answers](#)

Question - 87:

Tell me what is your style of management?

Ans:

Tailor your answer to the management style of the company to show that your style will complement it. A good maxim to remember is 'task needs, group needs and individual needs'. You might also mention motivation and delegation.

Question - 93:

Please explain about your basic technical experience and qualifications?

Ans:

You can consider this question as an ice breaker. You will find yourself facing this question in almost all the interviews for this position. An effective answer to this question will summarize your basic technical qualification along with some information about the technologies and products you have worked on. Here, you can go on to talk about any revolutionary or recent technology you have worked on. For e.g. "I have completed by BE - Electronics with 78% marks and have a 2 years experience of working in the industry of security software. I have the privilege of working in the team which developed and supported the revolutionary Winsock Layer technology". The trick is to put the full stop at the right place to provoke the desired next question. With this answers, you can immediately expect a question "What is Winsock Layer Technology?"

Question - 97:

Tell me as an IT support engineer have you learned from your mistakes?

Ans:

The real fact is that everyone who works makes a mistake. There is no loss in making a mistake while working. The main aspect of asking this question is to know if the candidate makes mistakes and learns from it without repeating. To make this question an apt one, you can state an example where you made a mistake and learned from it and also never repeated the same.
