Question - 8:

Explain me about a time you failed as Finance Analyst?

Ans:

I was put in a group one time in school for a project, and some of our members did not mesh well with others, as such, they did not help towards the project, and ultimately the quality of the project ended up being poor because others had to over compensate.

[View All Answers](#)

Question - 9:

Please explain what is a deferred tax asset and why might one be created?

Ans:

Deferred tax asset arises when a company actually pays more in taxes to the IRS than they show as an expense on their income statement in a reporting period. Differences in revenue recognition, expense recognition (such as warranty expense), and net operating losses (NOLs) can create deferred tax assets.

[View All Answers](#)

Question - 10:

Tell me what is the difference between journal entry and a ledger?

Ans:

The book which has the original entry is called a journal. The book is mandatory one as it has all the transactions that associate to the company for the specific financial year. The journal can also be mentioned as the mother of the ledger. In this scenario, all the accounts are portioned as debit and credit as per rules. The ledger is one which has particular accounts which is taken from the original journal.

[View All Answers](#)

Question - 16:

Tell me why should we hire you for financial analyst position?

Ans:

For this finance related interview question, the candidate should formulate the answer by associating his skills, education, personality, and experience along with the job role. To answer this question the candidate must understand the job description and also the culture of the company. You can also show that you're a good team player by linking them with examples. When you do not possess much of skills, experience or qualification, it is important to show your energy and passion. Employers look out for charismatic people who have complete energy and confidence in their speech. And hence, it is mandatory to present yourself as a confident, motivated and energetic individual.

[View All Answers](#)

Question - 17:

What is financial modeling?

Ans:

The usual practice in conducting a financial analysis is called financial modeling. It can also be mentioned as a quantitative analysis which is mainly utilized for asset pricing or for general corporate finance. The important aspect of financial modeling is that hypothetical variables are utilized in the formula so that the impact on economic conditions, profitability, and market behavior can be determined. It is always advisable to present your answers with an example. You can mention that financial modeling can be used to find out the jet fuel cost for airlines for the annual rise of 5% in crude oil for future years.

[View All Answers](#)

Question - 18:

Please explain how do you interpret data concerning investment programs?

Ans:

Well interpreting financial data is one of the main tasks of "Financial Analyst". For interpreting data affecting investment programs one should have the deep knowledge of current trends in business practices, price, yield, stability and economic influences and have the ability to develop forecast reports, spreadsheets and statistical software packages.

[View All Answers](#)

Question - 19:

What do you know about our company and its financial matters?

Ans:

This is a very important finance question for interview and the candidate needs to prepare for the same. The candidate should make sure to visit the company website, run through the about us page and careers page. To get to know more about the company the candidate should go through the LinkedIn page of the company. To know the latest updates and news about the company, google search as press releases along with the company name. It is not necessary to mention everything you learned, but mention the services and products the company sells. Give a data about the period through which the company has been running the business. Mention the mission statement of the company, the culture of the company, and how the values associate with your personality.

[View All Answers](#)

Question - 20:

Explain me what is a deferred tax liability and why might one be created?

Ans:

Deferred tax liability is a tax expense amount reported on a company's income statement that is not actually paid to the IRS in that time period, but is expected to be paid in the future. It arises because when a company actually pays less in taxes to the IRS than they show as an expense on their income statement in a reporting period.

Differences in depreciation expense between book reporting (GAAP) and IRS reporting can lead to differences in income between the two, which ultimately leads to differences in tax expense reported in the financial statements and taxes payable to the IRS.

[View All Answers](#)

Question - 21:

Explain me do you have experience in annual planning processes?

Ans:

Yes, I manage the annual budget preparation process. I send out a template to each department heads requesting their budget numbers for the next fiscal year. Once I get all budget requests back, I compile the information into one document and conduct a meeting to review each budget with the CEO, CEO, director of Operations and each of the department heads. Then compile the final numbers and together with the CEO, ratify the budget.

[View All Answers](#)

Question - 22:

Tell me how is it possible for a company to show positive net income but go bankrupt?

Ans:

Two examples include deterioration of working capital (i.e. increasing accounts receivable, lowering accounts payable), and financial shenanigans.

[View All Answers](#)

Question - 23:

Tell me how do you feel about travel?

Ans:

Accounts Receivable Impact Since accounts receivable and inventory are balance sheet items, they do not directly affect your company's income statement. Fluctuations or changes in these two current assets always appear on the balance sheet and on the cash flow statement. Revenues on the income statement show up as A/Rs or cash on the balance sheet and cash flow statement. The payment of A/Rs by customers converts A/Rs to cash, which in no way impacts the income statement. **Inventory Impact** As your company sells products, it reflects its inventory costs in the cost of goods sold line item on the income statement. Therefore, any fluctuations or modifications to the cost basis of that inventory will impact the income statement via the cost of goods sold. However, as with A/Rs, the cost of goods sold on the income statement already reflects inventory valuations on the balance sheet, so inventory-level fluctuations do not affect the income statement.

[View All Answers](#)

Question - 24:

Explain me the single best evaluation metric for analyzing company stock?

Ans:

There is no specific answer to this analyst interview question and hence, it is mandatory to mention a reasonable point of evaluation and explain the context for using the metrics. When you estimate a company, mention the first point as the operating margin profit as the metric. Mention that you opt for this metric because it shows the management of the company overall apart from the basic profitability. The price earnings to growth ratio can also be mentioned as a single most complete equity valuation metric. You can give a reason that it considers projected earnings growth rate and also higher ranked commonly used price/ earnings ratio (P/E). Make sure to pick any evaluation metric that you prefer is the best. The main trick in answering this question is explaining the strength of the particular metric that you mention.

[View All Answers](#)

Question - 25:

Suppose I buy a piece of equipment, walk me through the impact on the 3 financial statement?

Ans:

Initially, there is no impact (income statement); cash goes down, while PP&E goes up (balance sheet), and the purchase of PP&E is a cash outflow (cash flow statement)

Over the life of the asset: depreciation reduces net income (income statement); PP&E goes down by depreciation, while retained earnings go down (balance sheet); and depreciation is added back (because it is a non-cash expense that reduced net income) in the cash from operations section (cash flow statement).

- * What do you consider as the biggest mistake ever when it comes to transactions on financial markets?

[View All Answers](#)

Question - 32:

Explain me why are increases in accounts receivable a cash reduction on the cash flow statement?

Ans:

Since our cash flow statement starts with net income, an increase in accounts receivable is an adjustment to net income to reflect the fact that the company never actually received those funds.

[View All Answers](#)

Question - 33:

Tell me what is the difference between p&l account and income and expenditure statement?

Ans:

Business concerns who desire to earn profits by functioning business are ones who use profit and loss account. In the same manner, trusts, non-profit organizations make use of income and expenditure statement. It is the trading organizations that prepare P&L account in order to find out the net profit or loss of the organization's operation. Non-trading organizations prepare income and expenditure account, to find out if they have made a profit to run their business further or is in a loss.

Tell me what is variance analysis and mention about the time that you used variance analysis to conclude?

Ans:

The evaluation of performance by means of variance is mentioned as variance analysis. Its timely reporting is one which enhances the opportunity for remedial action. You can mention your previous example about variance analysis and the way you used it. in order to answer this question make sure to identify the issue, discourse about variance analysis, its reason and impact and also a projected corrective measure.

[View All Answers](#)

Question - 39:

Tell me what are the programs that you will use in order to prepare illustrated technical graphs, charts or spreadsheets?

Ans:

For answering this accounting interview question you must not mention the specific program but mention the usage of one program over the other. You can also mention that you would be willing and have the capability to use any program that the organization opts. You can mention that Microsoft excel is the one you prefer as it provides more of statistical and analytical references. In the same manner, to have an enhanced view of graphs or charts which assist in illustration of points, you can mention reports ultimate.

Irrespective of whatever you have used, mention that you have utilized multiple software programs in preparation of reports. Also never forget to mention that you have the ability to capture and become proficient in whatever program the organization follows for the preparation of reports.

[View All Answers](#)

Question - 40:

Explain me why do capital expenditures increase assets (PP&E), while other cash outflows, like paying salary, taxes, etc., do not create any asset, and instead instantly create an expense on the income statement that reduces equity via retained earnings?

Ans:

Capital expenditures are capitalized because of the timing of their estimated benefits - the lemonade stand will benefit the firm for many years. The employees' work, on the other hand, benefits the period in which the wages are generated only and should be expensed then. This is what differentiates an asset from an expense.

[View All Answers](#)

Question - 41:

Do you know what is goodwill?

Ans:

Goodwill is an asset that captures excess of the purchase price over fair market value of an acquired business. Let's walk through the following example: Acquirer buys Target for \$500m in cash. Target has 1 asset: PPE with book value of \$100, debt of \$50m, and equity of \$50m = book value (A-L) of \$50m.

* Acquirer records cash decline of \$500 to finance acquisition

* Acquirer's PP&E increases by \$100m

* Acquirer's debt increases by \$50m

* Acquirer records goodwill of \$450m

[View All Answers](#)
