Top 13 Situational Interview Questions As Scientific Consultant:

Ans:

Situational interviews As Scientific Consultant are similar to behavioral interview questions - but they are focused on the future, and ask hypothetical questions, whereas behavioral interview questions look at the past.

The advantage is that employers can put all candidates in the same hypothetical situations, and compare their answers.

1. What would you do if you made a strong recommendation in a meeting, but your colleagues decided against it?
2. How would you handle it if your team resisted a new idea or policy you introduced?
3. How would you handle it if the priorities for a project you were working on were suddenly changed?
4. What would you do if the work of an employee you managed didn't meet expectations?
5. What would you do if an important task was not up to standard, but the deadline to complete it had passed?
6. What steps would you take to make an important decision on the job As Scientific Consultant?
7. How would you handle a colleague you were unable to form a positive relationship with?
8. What would you do if you disagreed with the way a manager wanted you to handle a problem?
9. What would you do if you were assigned to work with a difficult client As Scientific Consultant?
10. What would you do if you worked hard on a solution to a problem, and your solution was criticized by your team?
11. How would you handle working closely with a colleague who was very different from you?
12. You're working on a key project that you can't complete, because you're waiting on work from a colleague. What do you do?
13. You realize that an early mistake in a project is going to put you behind deadline. What do you do?

[View All Answers](#)

Question - 47:

What problems have you encountered at work?

Ans:

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.

Question - 64:

Give an example of a time you successfully worked As Scientific Consultant on a team?

Ans:

On the whole I prefer to stick to doing what I'm told rather than setting myself up to fail by doing things off my own bat. But there was this one time when I suggested to my boss at the pizza parlor that she try offering an 'all you can eat' deal to students to boost trade on Mondays. She thought it was an interesting idea but

nothing ever came of it.

[View All Answers](#)

Question - 65:

How many square feet of pizza are eaten in the United States each month?

Ans:

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

Question - 66:

What schedule do you hope to work? Are you willing to work extra hours?

Ans:

Be honest. If you really want the job and are willing to work any schedule needed, say so. If, however, you have no intention of working late hours or weekends, simply let the interviewer know the hours that you are available to work. The same applies to extra hours. You are more likely to be hired if you are willing to work any time you are needed. However, saying that you are willing and then complaining about the hours once you start working is a recipe for disaster.
