Data Entry Interview Questions And Answers Guide.

Question - 1:

Tell us what is your typing speed?

Ans:

Internationally it is expected of Data Entry Clerks to have an average typing speed of 30 to 40 words per minute. Do not place too much emphasis on typing speeds that vastly exceed this average. Remember that quality shouldn't suffer because of quantity.

Question - 18:

Explain me when you look at a page, how do you know which details are important for entry?

Ans:

Especially if they're working remotely, data entry specialists won't always be able to easily ask questions about the documents they're working with. In these cases, they should feel confident in their ability to scan complex and often incomplete records and recognize which entries matter most. Depending on your business needs, these entries will vary.

Question - 24:

Tell us when you find your mind wandering at work, how do you refocus and make sure you're entering the information correctly?

Ans:

I enjoy data entry so I don't anticipate getting overly distracted. If I feel my concentration slipping, I take a quick break or stand up and stretch. That always seems to help.

View All Answers

Question - 25:

As you know data entry can be a very repetitive job. How do you keep from getting bored or distracted while working?

Ans:

Experienced data entry specialists should have strategies for staying focused and ensuring accuracy, even after several hours of work. Some strategies might include taking short breaks or alternating data entry with another task for short periods. They might also vary their process, for example by changing the order in which they input various entries, forcing their brains to focus on each task individually.

View All Answers

Question - 26:

Explain me how do you ensure accuracy while typing?

Ans:

Data is only useful if it's accurate. Good candidates should be able to describe strategies they use to ensure that they're accurately transcribing information. Good answers might include reading the data multiple times before entering, or manually comparing their entries against the originals before submitting. Some database management systems, including Excel and SQL, also have tools for data validation that experienced freelancers will be familiar with.

Question - 38:

Explain me how do you handle sensitive information?

Ans:

At times, a Data Entry Clerk may need to work with confidential information. Make sure the potential hire can handle confidential information in an appropriate manner.

View All Answers

Question - 39:

Explain me when you encounter a lot of data on a page, how do you know what details are important for entry?

Ans:

Data entry interview questions will tap into your time management skills when it comes to data entry. Companies who have enough data to manage that it requires specific clerks to enter it, likely have a lot of forms to process. Interviewers like to know that you are going to be efficient.

View All Answers

Question - 40:

Suppose ou have a lot of documents to digitize and only a few hours to do it in. How do you prioritize which records to digitize?

Ans:

This question should give you insight into how comfortable the specialist is working independently: they should be able to identify and prioritize the information that's most critical and prioritize that over other tasks.

View All Answers

Question - 41:

Tell us what is your WPM? How would you rate your touch-typing skills?

Ans:

After accuracy, speed is the most important quality of a good data entry specialist. Traditionally, words per minute (WPM) has been the standard metric for measuring typing speeds. A good rule of thumb is to look for a typing speed somewhere in the neighborhood of 55-80 words per minute (WPM). Touch typing, the ability to type without looking at the keyboard, is important not only because it allows workers to type more quickly, it also allows them to catch (and fix) errors much more reliably.
