[View All Answers](#)

Question - 35:

Tell us a situation where your proactive thinking avoided a certain accident?

Ans:

During an oil drilling project the drillers were using PPE but the audit revealed they were not using proper eye gear. I designed and recommended sealed eye gear for them and insisted on its use which paid off because the drillers came across a pungent gas during drilling which could have damaged their eyes causing serious threats on site and long term health issues had they not worn that equipment.

[View All Answers](#)

Question - 36:

Can you tell us have you ever been involved in a situation which has tested your mettle as a safety officer on a personal level?

Ans:

There was this situation in which the university that I was working for fell under a vandalism attack. All security personnel looked for the perpetrator for three months but I was the one who managed to pinpoint a student responsible for the vile acts. It was unfortunate that the student was the son of my best friend. I had no option but to hand him in even though I knew I could very well let him go with a warning and none would be the wiser! My ethics said otherwise.

[View All Answers](#)
