## Autodesk Interview Questions And Answers Guide.

### Question - 1:

Do you consider yourself successful?

#### Ans:

You should always answer yes to this question. Briefly explain why without going on and on. If you communicate that you're more successful than you really are you may come off as arrogant or unrealistic. A goof explanation is that you have set professional goals and that you have met some of these goals and are on track to meet more in the near future.

### Question - 2:

Explain what are your weaknesses In Autodesk?

#### Ans:

Red flags: This is the peanut butter to the previous question's jelly. Again, everyone should expect it, so it's a bad sign if someone seems totally unprepared, or gives a stock answer like, "I'm a perfectionist." Also, of course, candidates crazy enough to blurt out some horrible personality trait should go in the red flagged pile.

Good answer: Candidates should talk about a real weakness they've been working on improving. For instance, they're not good at public speaking, but they've been taking a course to help them improve. Or maybe they feel that they're easily distracted when working online, but have installed software that helps them stay on task. Answers like these show a desire for improvement, self awareness and discipline.

One approach is asking the interviewer about the salary range, but to avoid the question entirely, you can respond that money isn't a key factor and your goal is to advance in your career. **Question - 63:**

How would your friends describe you?

**Ans:**

My friends would probably say that I'm extremely persistent - I've never been afraid to keep going back until I get what I want. When I worked as a program developer, recruiting keynote speakers for a major tech conference, I got one rejection after another - this was just the nature of the job. But I really wanted the big players - so I wouldn't take no for an answer. I kept going back to them every time there was a new company on board, or some new value proposition. Eventually, many of them actually said "yes" - the program turned out to be so great that we doubled our attendees from the year before. A lot of people might have given up after the first rejection, but it's just not in my nature. If I know something is possible, I have to keep trying until I get it.
