Oracle GL Interview Questions And Answers Guide.

Question - 1:

In GL there is no org id. So how do we differentiate the data from different operating units?

Ans:

In GL you will have Set of Books Id defined for each set of books you define for the organizations. Using SOB's ID you will distinguish the Books or Organizations.

[View All Answers](#)

Question - 2:

At what stage is the subledger data posted to GL?

Ans:

Basically after entering the transactions, report will be taken to verify the transactions. In case, if approval is needed, it is approved after verifying the transactions. Once you are sure that the transactions are correct, the same can be posted to GL. Once it is posted, most of the informations for the posted transaction can not be modified in the subledger. In case of any wrong entry, you need to follow the reversal procedure.

Practically, the verification of transactions are done only during the initial stages after implementation. Once the system becomes stable, it is not followed strictly.

Note : Make sure that GL period is open for the transaction GL date.

[View All Answers](#)

Question - 3:

What is the difference between GL date and GL posted date?

Ans:

GL Posted Date : It is the defaultly current date, but you can change it.

GL Date : Beginning and ending GL dates that will be picked up when interface is executed.

[View All Answers](#)

Question - 4:

Can we change the profile value? How?

Ans:

nd_profile API can be used to set the profile value
fnd_profile.put(name in varchar2,value in varchar2)

[View All Answers](#)

Question - 5:

What is the MD form 50?

Ans:

MD50 is a Functional design document used in AIM methodology.

mainly used for Application Extensions and Interface functional design.

Question - 7:

Explain ADI and its features?

**Ans:**

Broadly following are the feature / elements of ADI

- 1.Journal Wizard.
- 2.Budget Wizard.
- 3.Report Wizard.
- 4.Account Hierarchy Editor.
- 5.Analysis Wizard.
- 6.Request Center.

[View All Answers](#)

Question - 8:

What is meant by ADI?

Ans:

ADI is used to interface spreadsheet uploads with Oracle applications data. ADI allows users take advantage of many of the data-entry shortcuts of a spreadsheet, such as copying and pasting cells, dragging and dropping ranges of cells and using formulas to calculate journal line amounts. ADI validates the data entered against the accounts, security rules and reference information that are defined in the General Ledger (GL).

[View All Answers](#)

Question - 9:

Can anyone please say me what is EDI and its functions?

Ans:

EDi - Electronic Data Interchange, to send the data to another server/destination via EDI server.,edi is a toll where in whenever the customer is sending the PO it gets saved in this toll, again when the supplier after supplying the material will send an invoice through EDI ,wherein the EDI of the customer will match the PO with the invoice and the invoice will get processed automatically, in case if it is not matching it will be in the error sheet

[View All Answers](#)

Question - 15:

How can we integrate AR or AP to GL?

Ans:

we integrate AR or AP to GL through Set of Books

[View All Answers](#)

Question - 16:

Can you disable budgetary control for a set of books?

Ans:

Yes, you can disable budgetary control for a set of book by unchecking the 'Enable Budgetary Control' check box in the Budgetary control tab page of the define set of books window.

[View All Answers](#)

Question - 17:

Is there a limit to the number of periods in a budget year or how many years a budget can span?

Ans:

One can define budgetary control for n number of years however, one year can have maximum of 60 fiscal periods.

[View All Answers](#)

Question - 18:

I was able to post a budget journal to a closed period, why?

Ans:

Yes you can do so, reason being budget journal is not linked with your accounting period. Once you have open the budget period then you can book budget journal for that whole period.

[View All Answers](#)

Question - 19:

How many Current budgets can you have?

Ans:

For each set of books you can have only one current budget at a time.

[View All Answers](#)

Question - 20:

Why do not my budget amounts appear on FSGs?

Ans:

In Coulum we have to mention the no. for control and also in report set we have put the budget defined in control field

[View All Answers](#)

Question - 21:

What is a funding budget?

Ans:

A budget against which accounting transactions are checked for available funds when budgetary control is enable for your set of books.

[View All Answers](#)

Question - 22:

Ans:

Yes you can update an existing account range in Budget Organization.

[View All Answers](#)

Question - 23:

Can I delete a budget?

Ans:

No can not delete a budget

[View All Answers](#)

Question - 24:

Can anyone tell me about MRC and Multi-Org?

Ans:

Let me brief you about both MRC and Multi Org. MRC stands for Multi reporting currency . which means you should have different SOBs, One must be primary and others are reporting. (max. 8).

Where as Multi Org concept is we will set up a organisation where we will have a Business group then SOBS then Legal entities then Operating units then Inventory

organisations and lastly sub Inventory category.. This set up will help to avoid multiple installations and have only one installation. We will attach all sub ledgers like AP, AR etc at Operating level and GL and FA at SOB level..
HR at Business group level.. There is a lot to discuss on this topic. please refer any available oracle material for more details.

Question - 25:

I am confused about inter company journal balancing.

As far as I can tell, it does one or both of:

1) If you enable it you can post incorrect (i.e. imbalanced) journals. And if you disable it you cannot (i.e. all journals must balance - A GOOD THING, RIGHT)?

Ans:

Option 1 is the correct one. If we enable it then we can post unbalanced intercompany journals i.e. debit <> credit for a balancing entity. For this we have to define intercompany accounts in setup-->Accounts-->Intercompany accounts, which will post the unbalance part to this intercompany account.

And if you disable it you cannot post the journals which are out of balance.

[View All Answers](#)

Question - 26:

What are the setup steps for AP, AR, and GL?

Ans:

For GL:

1. Set of Books (Chart of Accounts)
2. Calendar
3. Currency

For AP:

1. Suppliers (Creditors)
2. Invoice
3. Look up codes
4. Selection of Set of Books
5. Payment Terms
6. Financial & Payable Option
7. Define Banks

For AR:

1. Flexified
2. System option
3. Payment Terms
4. Open period
5. Auto Accounting
6. Transaction Type
7. Transaction Source

[View All Answers](#)

Question - 27:

How do we integrate AP or AR to GL?

Ans:

GL is like AR->GL<-AP

AR and AP both transfer the data in GL.

AR Contains all Invoices/Receipts /CM/DM and same way AP also have AP Vouchers.

[View All Answers](#)

Question - 28:

What is the difference between GL date and GL posted date in GL?

Ans:

GL date is the date used to determine the correct accounting period for your transactions where as the GL posting date is the date when the journal entry is posted to GL.

[View All Answers](#)

Question - 29:

In GL there is no org id. So how can we differentiate the data different operating units when no other modules are given?

Ans:

HR data is at business group level.

GL Data is differentiated based on set of books id.

AP and AR data is mostly at operating unit level.

Inventory, BOM, WIP data is at inventory organization level.

Question - 30:

What is FSG and its use?

Ans:

Overview of the Financial Statement Generator

Financial Statement Generator (FSG) is a powerful report building tool for Oracle General Ledger. With FSG, you can:

* Generate financial reports, such as income statements and balance sheets, based upon data in your general ledger.

Note: If you have average balance processing enabled in your set of books, you can report on functional, foreign, entered, or translated average balances.

* Define segment value security rules to restrict financial information contained in FSG report output generated by specific users and responsibilities.

Note: To apply segment value security rules, the profile option FSG: Enforce Segment Value Security must be enabled. See: FSG:

Enforce Segment Value Security: page B ? 9

* Define your reports with reusable report objects, making it easy to create new reports from the components of reports you've already defined.

* Design custom financial reports to meet specific business needs.

* Print as many reports as you need, simultaneously.

* Print the same report for multiple companies, cost centers, departments, or any other segment of your account structure, in the same report request.

* Schedule reports to run automatically.

* Produce ad hoc reports whenever you need them.

* Print reports to tab-delimited files for easy import into

client-based spreadsheet programs. In addition, you can use the Report Wizard feature of Applications Desktop Integrator to design and submit your financial report

Question - 31:

What is an Invoice? How many?

Ans:

AR invoice is a document sent to the customer with details like, Bill-to customer code, product code, qty sent, price, currency, credit terms, tax details, etc. Based on this invoice, customer will make payment to the company and the same is applied against the invoice.

AP invoice is the document received from the supplier and contains information such as supplier details, product code, qty, price and tax details. This invoice is entered in the AP module and payment is made to the supplier against this invoice.

[View All Answers](#)

Question - 32:

What are different types of Journal entries?

Ans:

There are 4 types of journal entries.

1. Basic Journal Entry - Used for most of the accounting transactions
2. Reversing JE - Created by reversing the existing journal entry
3. Recurring JE - Defined once and then generated for subsequent accounting period
4. Mass Allocation - Created to allocate the revenues and assets to a group of resources (cost centers, depts, divisions, etc) from a single Journal.

[View All Answers](#)

Question - 34:

What are recurring invoices? What are AP setup steps?

Ans:

Sometimes suppliers would not be sending any invoices. But still the payment has to be made to him, e.g., rent, lease rentals. In this situation we have to create an invoice every period wise. For that purpose we have to create one recurring invoice template. Template means with one master copy creating the multiple invoices is called template. Here we are creating the one invoice master copy is formally known as a recurring invoice or recurring invoice template. SET UP:

- 1) we have to create one special calendar
- 2) we have to create one full distribution set
- 3) we have to enter payment terms in the recurring invoice window
- 4) enter the template no, first invoice amount, special invoice amounts

[View All Answers](#)

Question - 35:

What are different types of invoices and what is a recurring invoice?

Ans:

Types of Invoice: Standard, CM, DM, Expense, Pre-Payment

Recurring Invoice is a type of invoice which occurs at definite intervals of time. The best example for a recurring invoice is Rent paid to the Owner.

[View All Answers](#)

Question - 36:

In how many ways can you enter a journal in GL?

Ans:

1. Manual entry
2. Subledger Entry
3. Spreadsheet Entry
4. Recurring Entry
5. Mass Allocation

[View All Answers](#)

Question - 37:

What is the difference between cross-validation rules and security-rules?

Ans:

Cross Validation Rule: Rules that define valid combinations of segment values a user can enter in an account. Cross-validation rules restrict users from entering invalid combinations of account segment values.

Security Rule: It determines the accounting transaction user can view at different levels of hierarchy, such as at Site Level --> Application Level --> Responsibility Level --> User level.

[View All Answers](#)

Question - 38:

Explain types of invoices are there in AP and AR?

Ans:

Types of invoices:

- Invoice
- Credit Memo
- Debit Memo
- Gaurantee
- Charge Back
- Deposit

[View All Answers](#)

Question - 39:

What are different period types?

Ans:

If it is accounting period types, then there are three pre-defined types, namely month, quarter and year. User can also add period types.

If it is period status, then there are 5 period status, namely Never opened, Open, Future Enterable, closed and Permanently closed.

Ans:

VB.NET is a windows application

Where as C# is a console

vb.net is supported multiple inheritance c# does not supported multiple inheritances

[View All Answers](#)

Question - 42:

Get the following message on Drilldown - Function not available to this responsibility. Change responsibility or contact your system administrator?

Ans:

All the setups (Form, form function, form function attaching to menu, menu to responsibility) are fine. But even I am getting the error Function is not available to this responsibility, please contact the system administrator.

This error we are getting for all custom developed forms. Same things are working fine in other instances.

[View All Answers](#)

Question - 43:

What are Summary Accounts and Rollup groups?

Ans:

Summary Account is an account whose balance represents the sum of other account balances. You can use summary accounts for faster reporting and inquiry as well as in formulas and allocations.

Rollup group is a collection of parent segment values for a given segment. You use rollup groups to define summary accounts based on parents in the group. You can use letters as well as numbers to name your rollup groups.

[View All Answers](#)

Question - 44:

What are cycles of GL, AP, and AR?

Ans:

GL Accounting cycle can be further elaborated like this...

- 1.Open Period.
- 2.Create Functional and foreign journal entries.(including the journal import from legacy systems and subledgers).
- 3.Reverse journal entries.
- 4.Post the journals.
- 5.Review and correct the balances.
- 6.Revalue foreign currency balances.
- 7.Translate foreign currency balances.
- 8.Consolidate set of books.
- 9.Run accounting reports.
- 10.Close the accounting periods.

AP cycle

Purchase Order --> Receipt --> AP voucher --> Payment made

AR Cycle

Sales Order --> Shipment --> Invoice --> Payment receipt

GL cycle

Direct GL JE / Transfer subledger data to GL --> Post

[View All Answers](#)

Question - 45:

What is the difference between discounts and adjustments?

Ans:

Discount refers to the payment terms or on quantity(bulk order discount)ordered.In the invoice received from supplier,discounts term is sepcificaly stated.E.G. If paid with in 15 days discount @ 2%,what you need to do is pay 2% less then the original invoice amount,however caution should be taken that the freight amount should not be considered while calculating the discount.Adjusment could be for various reasons.Over priced invoice,short delivery of quantity as per goods received note,poor quality etc.Agreed upon amount will be deducted from the invoice, while making the payments.
