## MCSD.NET - 70-089 Interview Questions And Answers Guide.

### Question - 1:

You are the SMS administrator for ComPany.com. The company has a single SMS site. Employees use Windows mobile devices. You use the Device Client to manage these devices with the SMS Device Management Feature Pack. You want to ensure that the mobile devices meet the following security guidelines:

1. Passwords comply with complexity requirements.
2. Desktop computers use digital certificates while connecting over the virtual private network (VPN).

You need to configure the mobile devices to comply with these guidelines.

Which two tasks should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Use an advertisement to run a Microsoft Visual Basic Scripting Edition (VBScript) script to configure VPN settings.
- B. Use an advertisement to run a Microsoft Visual Basic .NET assembly to configure VPN settings.
- C. Use Device Settings Manager to configure the VPN settings.
- D. Use Device Settings Manager to configure the password policy.

### Ans:

- C: Use Device Settings Manager to configure the VPN settings.
- D: Use Device Settings Manager to configure the password policy.

### Question - 4:

You are the SMS administrator for ComPany.com. The SMS hierarchy consists of a single primary site. You use SMS to deploy a program that examines the latest version of the antivirus software that is used by the computers on the network. Two advertisements use this program. One advertisement runs daily on servers and portable computers. Another advertisement runs weekly on desktop computers. You discover a security flaw in the program that collects the antivirus software information. You need to prevent computers from running the program until you fix the security flaw. You need to ensure that all other advertisements function normally. You want to achieve this goal by using the least amount of administrative effort. What should you do?

- A. Disable the program.
- B. Delete the program.
- C. Disable the Advertised Programs Client Agent.
- D. Delete each advertisement.

**Ans:**

A: Disable the program.
