Artificial Intelligence Language Processing Interview Questions And Answers Guide.

Question - 1:

Explain AI Checkers?

Ans:

The main programs here are Arthur Samuel's, the rote learning method which is a lot like a memory based method, generalization learning which is a lot like backprop and a signature table approach that also gives you a feed-forward type network. One of Samuel's programs did beat a checkers champion and the AI community has often make a fuss over that saying that this AI program played a "championship-level" game however that expert beat the program in the next 6 games. Note too, what Samuels says: "the program is quite capable of beating any amateur player and can give better players a good contest".

Question - 2:

Explain AI Backgammon?

Ans:

This section looks at Berliner's program, two backprop versions by Tesauro and a temporal difference method by Tesauro. This latter program is VERY good and has found strategies that now human backgammon players acknowledge are better than some of the old humanly devised strategies.

Question - 6:

What is Discourse Integration?

Ans:

The meaning of any sentence depends upon the meaning of the sentence just before it. In addition, it also brings about the meaning of immediately succeeding sentence.

[View All Answers](#)

**Question - 7:**

What is Syntactic Analysis?

Ans:

It involves analysis of words in the sentence for grammar and arranging words in a manner that shows the relationship among the words. The sentence such as "The school goes to boy" is rejected by English syntactic analyzer.

[View All Answers](#)

Question - 8:

What is Semantic Analysis?

Ans:

It draws the exact meaning or the dictionary meaning from the text. The text is checked for meaningfulness. It is done by mapping syntactic structures and objects in the task domain. The semantic analyzer disregards sentence such as "hot ice-cream".

Mapping the given input in natural language into useful representations.

Analyzing different aspects of the language.

[View All Answers](#)

**Question - 24:**

List the components of NLP?

Ans:

There are two components of NLP as given:

- * Natural Language Understanding (NLU)
- * Natural Language Generation (NLG)

[View All Answers](#)

Question - 25:

What is Natural Language Processing?

Ans:

Natural Language Processing (NLP) refers to AI method of communicating with an intelligent systems using a natural language such as English.

Processing of Natural Language is required when you want an intelligent system like robot to perform as per your instructions, when you want to hear decision from a dialogue based clinical expert system, etc.

[View All Answers](#)

Question - 26:

What is Artificial intelligence Language Processing?

Ans:

Artificial intelligence language processing (AILP) is a field of computer science and linguistics concerned with the interactions between computers and human (natural) languages; it began as a branch of artificial intelligence. In theory, natural language processing is a very attractive method of human-computer interaction. Natural language understanding is sometimes referred to as an AI-complete problem because it seems to require extensive knowledge about the outside world and the ability to manipulate it.
