Non Technical Interview Questions And Answers Guide.

Question - 1:

What is difference between VAT & CST?

Ans:

Under the CST Act, the tax is collected at one stage of purchase or sale of goods. Therefore, the burden of the full tax bond is borne by only one dealer, either the first or the last dealer. However, under the VAT system, the tax burden would be shared by all the dealers from first to last. Then, such tax would be passed upon the final consumers.

Question - 14:

Impact of us recession in India in regard to different sectors?

Ans:

the recession which started from u.s had propagated the entire world and now the entire world is facing the problem of global crisis. if india is to be considered we find that india is not that much affected as other european countries. to my view the most probable reason for this is that india being an agricultural economy. but india will face the heat of this economic recession very soon mainly because a large share of gdp comes from service sector which contributes 52% of the total gdp. the recession will affect the countries outsourcing industry whereby it provides it services to western countries. many reputed companies have started layoffs for eg. wipro laid off about 1000 employees and is planning to lay off another 2000 who are put under scanner. take the case of satyam computers who have given pink slips to about 4500 employees which constitutes about 9% of its total strength of 51000 employees. this reputed firms say that the layoffs are performance based and those who cannot perform will perish. but the matter of fact being that these people are paying the price for economic recession
