Question - 2:

What Does SRM Stand For?

Ans:

SRM stands for Supplier Relationship Management.

It's very effective for the companies which have a large number of users whom can directly purchase the material using the Shopping Cart screen for which the materials can be selected from the available Catalogs.

It's an extended form of ERP where data gets transferred between SAP R/3 and the SRM screen (vice versa) which will work in Internet so that the every Vendor coordination will be more better and which will fully avoid the paper work and unwanted confusions.
