### Question - 3:

What are the symptoms of TMJ? How are they treated?

#### Ans:

Problems assoicated with the TMJ are:  
- locking of jaw - headaches - earaches( buzzing in ear)-  
chewing discomfort - mysfacial pain  
Problems with the TMJ can arise from a variety of causesof which include - malocclusions (improper bite) or bruxism (teeth grinding).  
The most common treatment is the use of a an occlusal splint or stabalisation splint as they are sometyimes called. These are removable devices moulded to fit the upper or lower arches of the teeth to regulate an improper bite.  
Bite guards are often used to deal with symptoms resulting from bruxism and are worn in the night.
