## Bulnex Interview Questions And Answers Guide.

### Question - 1:

What is the difference between waterfall model and software process model?

### Ans:

Waterfall model is one type of software process model. So there is no difference between the two but they share a parent-child relationship.

A software process model is used in software engineering and it encompasses a set of activities, methods, actions, tasks and products.

A waterfall models is a linear model that suggests a systematic, sequential approach to develop a software starting from communication with the client and passing through planning, modeling, construction to the deployment, delivery and feedback.

### Question - 2:

Explain the difference between a bug and a defect?

### Ans:

While similar to each other and tracked using the same tools, a bug is considered to be an error in satisfying requirements while a defect is missing a requirement altogether.
