**Question - 7:**

What are your weaknesses for Hydro Plant Technician position?

**Ans:**

Try not to be too critical when answering this question. Instead, pick one of your weaknesses and try to turn it into a positive.

For example, you could be a perfectionist, which means that you sometimes take longer on tasks, but you make sure that they are completed to a high quality. It is important to make a negative into a positive as it doesn't make you appear overly critical and shows you can reflect on your own performance.

**Question - 21:**

Suppose there are three light switches outside a room. Inside is a single light bulb, controlled by one of the three switches. You need to determine which switch operates the bulb. You can turn the switches on and off as many times as you wish (they are all off to begin with), but may only enter the room once. There is no one there to help you. The door to the room is closed, and there are no windows, so you cannot see inside. How can you discover which switch operates the bulb?

**Ans:**

Do the following steps:

- \* 1. Turn ON two switches, and leave one OFF.
- \* 2. Wait a few minutes.
- \* 3. Turn one switch from ON to OFF. One is now ON and two are OFF
- \* 4. Enter the room. - If the light is ON, it is controlled by the switch you left ON. - If the light bulb is OFF, touch it. If it is warm it is controlled by the switch you turned ON and OFF. If it is cold, it is controlled by the switch you never turned on.

**Question - 22:**

If you look at a clock and the time is 3:15, what's the angle between the hour and the minute hands?

**Ans:**

Usually, if the answer to a brainteaser seems too easy, chances are the answer's wrong. And in this case, the answer is not zero degrees. The hour hand, remember, moves as well. That is, in addition to the minute hand. And so, at 3:15, the hour hand and the minute hand are not on top of each other. In fact, the hour hand has moved a quarter of the way between the 3 and 4. This means it's moved a quarter of 30 degrees (360 degrees divided by 12 equals 30). So the answer, to be exact, is seven and a half degrees (30 divided by four).

**Question - 48:**

How many square feet of pizza are eaten in the United States each month?

**Ans:**

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

**Question - 51:**

What are your salary expectations As Hydro Plant Technician?

**Ans:**

This question is like a loaded gun, tricky and dangerous if you're not sure what you are doing. It's not uncommon for people to end up talking salary before really selling their skills, but knowledge is power as this is a negotiation after all. Again, this is an area where doing your research will be helpful as you will have an understanding of average salary.

One approach is asking the interviewer about the salary range, but to avoid the question entirely, you can respond that money isn't a key factor and you're goal is to advance in your career. However, if you have a minimum figure in mind and you believe you're able to get it, you may find it worth trying.

**Question - 52:**

What do you think is your greatest weakness?

**Ans:**

Don't say anything that could eliminate you from consideration for the job. For instance, "I'm slow in adapting to change" is not a wise answer, since change is par for the course in most work environments. Avoid calling attention to any weakness that's one of the critical qualities the hiring manager is looking for. And don't try the old "I'm a workaholic," or "I'm a perfectionist."

[View All Answers](#)

**Question - 53:**

What do you think we could do better or differently?

**Ans:**

This is a common one at startups. Hiring managers want to know that you not only have some background on the company, but that you're able to think critically about it and come to the table with new ideas. So, come with new ideas! What new features would you love to see? How could the company increase conversions? How could customer service be improved? You don't need to have the company's four-year strategy figured out, but do share your thoughts, and more importantly, show how your interests and expertise would lend themselves to the job.

**Question - 58:**

Are you planning to continue your studies and training As Hydro Plant Technician?

**Ans:**

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

**Question - 61:**

What problems have you encountered at work?

**Ans:**

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.

**Question - 62:**

What relevant work experience do you have in this career field As Hydro Plant Technician?

**Ans:**

Talk about specific work related experience for the position you're interviewing for. Make sure the experience is relevant. Don't talk about previous experience that is not related to the position in question. If you don't have specific career related experience speak about prior experience that has helped you develop the specific knowledge and skills required for the position you are applying for.

**Question - 63:**

Have you ever you have been in a position As Hydro Plant Technician where you've had to fire someone? How did you feel about that experience?

**Ans:**

Be very thoughtful about your answer. This is a very serious matter for most companies and requires a very serious answer. You need to express that you will do it when it is the right thing to do but you don't want to give the impression that you're callous to the process. Don't forget that firing is not the same as laying someone off - it typically is for the direct benefit of the company.

**Question - 64:**

Tell us about a suggestion you have made that has benefited an organization you've worked for?

**Ans:**

This is another opportunity to show the interviewer what you're capable of so make sure to be prepared for this type of question. Have an example ready and make sure it's an example of a suggestion you've made that was accepted and that has positive influence. If you can come up with an example that relates to the position you're applying for that would be even better.

**Question - 65:**

What is your dream job?

**Ans:**

There is almost no good answer to this question, so don't be specific. If you tell the interviewer that the job you're applying for with his/her company is the perfect job you may lose credibility if you don't sound believable (which you probably won't if you're not telling the truth.) If you give the interviewer some other job the interviewer may get concerned that you'll get dissatisfied with the position if you're hired. Again, don't be specific. A good response could be, "A job where my work ethic and abilities are recognized and I can make a meaningful difference to the organization."

**Question - 66:**

Did the salary we offer attract you to this job?

**Ans:**

The interviewer could be asking you this question for a number of reasons. Obviously, the salary is an important factor to your interest in this job, but it should not be the overriding reason for your interest. A good answer to this question is, "The salary was very attractive, but the job itself is what was most attractive to me."

**Question - 67:**

How do you measure success?

**Ans:**

There may be several good answers. Some include: you're able to set realistic, yet aggressive goals that push you and you're able to achieve them, you go the extra mile on all projects, client satisfaction is high, your boss is elated at your performance on all projects, etc.

**Question - 68:**

Do you have any blind spots?

**Ans:**

This question is often meant to trick candidates since acknowledgment of blind spots would indicate they were aware of them. Also, do not disclose bad habits or other personal concerns. Let the interviewer find out about your personal flaws through the course of the interview without directly stating these flaws.

**Question - 70:**

Explain what are your strengths As Hydro Plant Technician?

**Ans:**

Bad Answer: Candidate is unprepared for question or only gives generic answers.

This is the most common job interview question - everybody should be expecting it. If they don't seem prepared, or give a fairly stock answer, it's probably a bad sign.

Good answer: The consensus is to go for quality, not quantity here. Candidates should give a short list of strengths, and back each one up with examples that illustrate the strength. Also, they should explain how these strengths will be useful in the job you're applying for, and use this question to say something interesting about themselves.

**Question - 71:**

What can you offer us that someone else can not?

**Ans:**

Bad Answer: Going negative - if the candidate starts trash talking other candidates, it's a sure sign of a bad attitude. Also, if they can't provide a solid answer, it may show that they lack thorough knowledge of the skills the job requires, and an understanding of where they fit in.

Good answer: The candidate can name specific skills, abilities or understandings they have that apply directly to the job that other candidates are unlikely to have, or are in short supply.

**Question - 72:**

What is your desired salary As Hydro Plant Technician?

**Ans:**

Bad Answer: Candidates who are unable to answer the question, or give an answer that is far above market. Shows that they have not done research on the market rate, or have unreasonable expectations.

Good answer: A number or range that falls within the market rate and matches their level of mastery of skills required to do the job.
