Telecom Security Interview Questions And Answers Guide.

Question - 1:

Do you know history of cdma?

Ans:

CDMA was developed during second world war inorder to
transmit signals in military.high security provides a wide
application in military

View All Answers

Question - 2:

Explain how can cdma work?

Ans:

CDMA works on the principle of Spresd spectrum.Herewith
the help of a CODE, data signal is spread like a noise like
signal which is unable to detect by others.it provides
security.Since the spreaded signal is below the noise level
noise has no effect on the signal.its provides noise reduction

View All Answers

Question - 3:

Do you know what is cdma technology?

Ans:

CDMA(CODE DIVISION MULTIPLE ACCESS) technology is a
wireless technology used in transmission os signal from one
place to another with high secury and noise reduction.

Question - 5:

Explain Why is VLAN trunking a security risk?

Ans:

while physical separation between network segments,VLAN
rely on switching should be perfect, if not
so,misconfiguration or a bug could cause the VLAN barriers
to be broken
There i a 2 risk
1.packet leaks from one VLAN to another, possibly revealing
sensitive information
2.In the second, a specially crafted packet is injected
into another VLAN. Any attack that could cause the VLAN
barriers to break requires a machine directly attached to
the physical network. This means that only a local machine

can execute an attack against the switch.
