Test Documents Reporting Interview Questions And Answers Guide.

Question - 1:

How to report defects in your company?

Ans:

We reports our defects to our defect tracking team via test lead.

[View All Answers](#)

Question - 2:

How to know whether your reported defect rejected?

Ans:

Every organization will maintain their own tool for the defect posting,So this tool can be asseble for the dev's and the testers.So if developer wants to reject the reported bug then he changes the bug status from open to Rejected.If tester agree for that rejected bug he changes the status from rejected to closed.if he not accepted he will communicate with the developer or team lead.

Question - 5:

Do you know how many levels of regression testing is available in our testing process?

Ans:

There are 3 type of R.T

1. Unit R.T
2. Regional R.T
3. Full R.T.

In unit R.T test only the unit i.e have confidence that it

not break other area of the module in that case testing particular unit called Unit R.T
Regional R.T. after fixing bug retest the fixed area & impact area which ll break the other area identify impact area and test or do regression testing on those area this is most widely used in company
Full R.T. in this case after fixing bug the changes affecting whole module that case insted of checkig impact area do full regression testig

Question - 7:

How to how many levels of regression testing is available in our testing process?

Ans:

There are 3 types of regression

- 1)Unit regression : nothing but retesting ie testing to make sure that bug is properly fixed or not / new enhanced feature is working according to the specification.
- 2)Regional Regressin : Unit regression + testing the impact area to make sure that bug fixation or new feature not affecting the unchanged module.90% of the case industry prefers this regression.
- 3)Full Regression : when it is difficult to identify the impact area after the bug fixation or after adding the new feature ,instead of wasting time in identifying the impact area they will go with full regression.

Question - 9:

Explain how the Risks for the basic web page testing in the Test Plan, as i am writing my first test plan?

Ans:

If u r thinking about any application point of view, the basic risks would include the following :

1. Critical Defects may be found @ later stages of Testing.
2. Time and Schedule is important concern.
3. If it is a New Application for which u r writing Test Plan, the Risk may be like QA resources are still learning the application and may need more time to find critical defects.
4. Modules with Low risk may be not be tested @ later levels.

Their r many risks to point out if u r writing a Test Plan for an Enhancement related to a Product.
