Clear Case Interview Questions And Answers Guide.

Question - 1:

Can you explain What does aldb_server do?

Ans:

The albd server handles a varienty of tasks.
when a cleint program wants access a service (avob or view
serverfor example)on cleracase host,it uses a remote
procedure call to send a request to the albd server on that
host. the albd server starts the requested services if it
is not already started. then isssues a responce telling the
client the service's port number. thereafetr the client
communicates directly with the specific service, without
invoving the albd_server.
responding to requests for registry information on rational
cleracase registry on server host.
responding to requests for licenses information on a
rational cleracase license server hpst.

Question - 5:

What are version control tools? How are they use full can any body name few version control tools?

Ans:

Version control : versioning is the making of copies of data
at some meaningful point in order to return to that point at
a later date, if necessary.
In Software feild so many version control tool are there
SCM tool
VSS tool
cvs tool
pvcs tool
Rational clearcase proides tool support versions all types
file and directories in source repositry .
 software feild best version tool is clearcase it support
version control,merging,compare version of software
resource,parallel development...
Version control tools help multiple users to make
simultaneous changes to a collection of documents/files,
without clobbering each others' work or resulting in version
confusion
